Air quality program records include correspondence and reports originated by personnel within Air Resources Program (formerly Air Quality Branch, Division of Environmental Planning) relating to the following:

- Special studies conducted to determine the atmospheric impacts in the vicinity of all TVA installations, which include white pine, plume rise and inversion breakup, atmospheric dispersion and fly ash studies;

- Regional air quality activities performed to identify air pollution problems within the Valley which affect regional development and preventive or corrective actions to be taken; and

- Surveillance and control of emissions which includes the establishment of monitoring systems, data analyses, and related appraisals for the control of air emissions at all TVA facilities.

These records are filed by the Divisional, Subject-Numeric and TVA Alpha-Numeric Systems. Accumulation since 1952 is eight (8) cubic feet. Less than 1 on 4/1/85. Item 155-107 is arranged according to the "Divisional" subject file classification system; the remainder of the file is arranged according to the Alpha-Numeric Subject File classification system.

115-107
