Assistant TVA Archivist

7. ITEM NO.

1

8. DESCRIPTION OF ITEM
(With Inclusive Dates or Retention Periods)

TEMPERATURE AND DISSOLVED OXYGEN DETERMINATIONS

Form TVA 17055 (formerly form TVA 9002), Report on Temperature and Dissolved Oxygen Determinations, is used to record information concerning the water temperature and concentration of dissolved oxygen in water samples collected to determine the effect of hydro plants on the quality of water supplies in the Tennessee Valley area. Hydro plant operating personnel initiate the form and record the initial phase of the determination. The forms are submitted weekly to Data Services Branch from twenty-eight (28) TVA hydro plants and from three (3) TVA co-operative hydro plants. The data collected is used to plot an annual curve representing the temperature and dissolved oxygen for each location and is sent to the Environmental Protection Agency for inclusion in their STORET data system. This data is used by Natural Resource Operations in studies and has research reference value. The annual plots constitute a consolidation of determinations and are valuable for research purposes.

Disposition

A. Original-Destroy in Agency when 5 years old.

9. SAMPLE OR JOB NO.

352-S318,
Item 1
