10. ACTION TAKEN

Transmission Line Inspections

Periodic inspections are made of TVA transmission lines to check for defects that would impair the integrity of their operation condition. Routine aerial inspections are made by helicopter three times a year. Routine foot patrols are made by the line maintenance crews every two years on the wood pole and steel tower lines. Climbing inspections are made by the line maintenance crews every four years on wood pole lines. Emergency inspections are made when there are indications that the line may have been damaged by storm, fire, or objects striking the line.

Transmission line inspection reports are prepared from information obtained by aircraft observers and line inspectors. The reports include the structure number, pole, crossarm, insulators, conductor, overhead ground wire, and associated hardware defects noted on the system's transmission lines. Also encroachments and condition of rights of way are noted. On climbing inspections and foot patrols one copy is retained in the area office and one copy sent to the Transmission Line

1	<p>Section of the System Engineering Services Branch. On aerial inspections the observer makes a verbal report on a recording device, and the tape is sent to the Transmission Line Section for transcribing on form TVA 6320, Record of Transmission Line Defects or form TVA 6320A, Transmission Line Defects. One copy is retained in the section office, and one is sent to the area office. When the defects are corrected, the work is documented on the area copies and sent to the Transmission Line Section which then destroys the original and keeps the copy identifying the defects and the corrective action taken.</p> <p>The requested retentions are needed for management information, administrative purposes, and reference needs.</p> <p><u>Disposition:</u></p> <p>A. <u>Paper Copy</u></p> <p>(1) <u>Section Office</u> - Destroy in Agency 3 years after inspection or correction of defect.</p> <p>(2) <u>Area Offices</u> - Destroy in Agency 4 years after inspection or correction of defect.</p> <p>B. <u>Tape</u> - Erase and reuse after information is transcribed.</p>	NN-165-68, Item 2
