	<p align="center"><u>ASSIGNMENT FILES</u></p> <p>These files were created in the Division of Health and Safety, Occupational Health Branch (now obsolete) and consist of work assignment projects conducted by branch staff members - primarily industrial hygienists and chemists - relating to areas affecting the health and safety of employees in their work environment. Projects included but were not limited to the following: carbon monoxide exposures, dust concentrations, ventilation, lighting, and noise levels at TVA facilities; investigations of potential health hazards; laboratory methods; vision surveys and profiles on employees; health protection devices; etc.</p> <p>These projects required more than cursory review or routine inspection yet did not document any unique research or experimental work done by the branch. Delegations were made on form TVA 2279, Assignment Sheet, issued by the branch chief. The original and duplicate copies were sent to the assignee with extra copies (for information only) going to principal staff members. When the work on the assignment was completed, the assignee reported his findings on the original and duplicate copies</p>		<i>1 item</i>
