The following material is maintained at our Boyers, Pa. facility for our Compensation Group and has ceased to have any use.

1. Annuity Award Cards (BRI 49-85) 1960-69, 2915 cu. ft.
2. Death Award Cards (BRI 49-47) 2,774 cu. ft.

These documents served as a manual record of periodic payment information for annuitants and survivor annuitants. All cost-of-living increases were manually posted to these documents through November 1965. On December 1, 1965, the processing of cost-of-living increases (COLA) was converted to the automated data processing system. Until May 1969, a dual system was maintained and COLA data continued to be manually posted to the award cards. During May 1969, the Master Record System was fully operational and all pay data (with the exception of some death files which were purged) was converted to the Automated Master Record System.

A survey of the frequency of retrieval for these records was performed and they concluded that requests for retrieval of these records was rare. It is the consensus of the Retirement program managers that the amount of an award can be reconstructed, if necessary, and that further retention of the records is nonessential.
