Automated Reporting and Management Information System (ARMIS)
43-05 ARMIS Service Quality Report

ARMIS was initiated in 1987 for collecting financial and operating data from the largest incumbent local exchange carriers (ILECs). Additional ARMIS reports were added in 1991 to collect service quality and network infrastructure information from local exchange carriers subject to price cap regulations, and, in 1992 for the collection of statistical data formerly included in Form M. Today, ARMIS consists of 10 reports. The carriers annually file this data on April 1st. The Commission's rules require this information only from carriers having annual operating revenues equal to or above an indexed revenue threshold. A carrier, together with its ILEC affiliates, having an indexed revenue threshold of less than \$8.181 billion, would have streamlined ARMIS reporting requirements. Beginning with the 2002 filing, electronic filing of ARMIS data became mandatory. No paper or diskettes have been received from 2002 forward. Therefore, the paper copies and diskettes for the 2001 data will be the last files transferred to the Federal Records Center.

43-05 ARMIS Service Quality Report

43-05 ARMIS Service Quality Report - Collects at the holding company and study area levels, data designed to capture trends in service quality including installation and repair intervals, total switch downtime, common trunk blockage, and service quality complaints for price cap carriers. This report is filed by mandatory and elective price cap carriers. The ARMIS Report 43-05 improves and standardizes information requirements in a consistent format and is essential to the FCC to monitor service quality under price cap regulation.

Input/Source Records:

Paper copies and Diskettes - Beginning with the 2002 filing, electronic filing of ARMIS data became mandatory. No paper or diskettes have been received from 2002 forward. Therefore, the paper copies and diskettes for the 2001 data will be the last files transferred to the Federal Records Center.

Disposition: Temporary. Transfer to the Federal Records when five years old. Destroy when fifteen (15) years old.

Electronically Imported Data from the Internet.

The Commission's Electronic ARMIS filing System provides on-line submission of carrier filings and provides a user-friendly, feature-rich database system from which users can extract ARMIS data in a variety of ways. Incumbent local exchange carriers are required to file their ARMIS Reports electronically through the Internet. Carriers and other interested parties can access ARMIS data from the Commission's EAFS Home Page at <http://www.fcc.gov/wcb/eafs>.

*governed by
GRS 20,
Items 2a4, 2b*

~~Disposition Temporary Destroy/delete fifteen (15) years after information is imported in ARMIS and the data has been verified~~ Governed by GRS 20, item 25

1. Master Data File

Provides data at the study area level and the holding company level on service quality for each ILEC under elective and mandatory price cap regulation This file includes information on interexchange and local access service installation repairs intervals, local service installation and repair intervals, trunk blockage, and total switch downtime This file includes a public version and may include a business confidential version

Statement of Restriction: There may be FOIA/Privacy Act restrictions

Current Volume: 1 CD for all ILECs for all years Annual accumulation 1/10 of a CD

TEMPORARY DESTROY WHEN 5 YEARS OLD
