<td>Permission is requested, in accordance with FPMR 101-11, 406-2, to destroy 16.52 cubic feet of hard copy records and to retain silver halide master microfiche. The microfiche masters have been determined to be adequate substitutes for the original records in accordance with FPMR 101-11, 506-3. The records are Technical Directives to the NASA Scientific and Technical Information Facility (STIF) contractor which fill in detail, directs lines of inquiry, or otherwise specifically defines work set forth in the contract Statement of Work, and STIF Contractor Management and Operations Reports which contain financial, production and management data on the STIF contract. These documents range from 1968 to 1980. These records, in accordance with the proposed NHB 1441.1a, Schedule 16, Item 18B, are to be destroyed when no longer required for follow-on for contract preparation or after expiration of contract. The master microfiche would therefore be destroyed 25 years after completion of succeeding contract preparation and/or expiration. See attached change to NASA Schedule 16, Item 18b., page 3.</td>
