System Title:

ExIm Docs Document Management System

System Description:

The Export Import Bank of the United States (Ex-Im) is an independent Federal Government Agency that helps finance the overseas sales of United States goods and services. To accomplish its mission of creating and sustaining jobs through exports, Ex-Im offers four (4) financial products: direct loans, guarantees, working capital guarantees, and export credit insurance.

ExIm Docs is a document management system providing the ability to search for insurance and guarantee transaction data. ExIm Docs contains documents dealing with the following business functions: Working Capital, Long Term Loans or Guarantees, Structured Finance or Transportation transactions, and Single Buyer and Medium Term Insurance and Guarantees issued prior to January 1, 2007. Ex-Im Docs contains documents from 1999 to the present.

Master Files

This system contains scanned images of insurance and guarantee transaction records. Transactions may include applications and all supporting documentation, such as financial statements; internal analyses of financial, political, and economic risks, as well as environmental issues; internal memoranda; legal and engineering documents; correspondence; and credit review and compliance documents. Documents contain metadata for policy name/number, insured name/number, buyer name/number, broker name/number, document number, application control system number, and dates of transaction. The system also includes ExIm Docs Fiche, which are scanned images of insurance transaction microfiche records. Currently there are approximately 265,000 documents in the system, which equates to approximately 2,500,000 pages.

Disposition: Temporary. Destroy 12 years after transaction has been closed or terminated (finalized or cancelled).
