System Title  Rescheduled Debt Servicing

System Description

Reschedule Debt Servicing is one of the application systems that is a sub-system of Claims & Recovery Debt Servicing System (CARDS) within the Export Import Bank’s Financial and Administrative System.

Reschedule Debt provides the tools necessary to establish and service rescheduled debts. The system captures and reports information related to negotiated debt terms of billing, payments, and the distribution of recovered amounts. The system provides a central and flexible, reliable and comprehensive support to all stages of the rescheduling process. This system also simplifies the setup and servicing of debt entity and provides a more accurate and timely information in support of the allocation of repayments of rescheduled debt.

The reschedule load activity processes involves five (5) basic business functions:

- **Installment Eligibility** that allows the user to capture rescheduled debt terms included in the agreed document. These terms are applied against claims and load defaults to produce an inventory of debt that qualifies for rescheduling.

- **R-load Billing** provided the Treasurer-Controller’s Office with a vehicle for reviewing bills prior to mailing, incorporating the necessary adjustments and producing standardized bills.

- **Payment Application** supports the entry of payments received against rescheduled debts and the selection of the appropriate method of payment application. Several payment application formulas are available to spread payments received. Supervisory review and approval is required before the final processing of payments occur.

- **Participant Distribution** automates the distribution of funds recovered against rescheduled debt to third party participants. Payment vouchers are produced to facilitate the disbursement of funds.

- **Inquiries and Other Functions** allow users to examine load activity information and generate reports for online menus.

1. **System Inputs** provide information on terms of rescheduling, apportionment of rescheduled debt, transfer of rescheduled debt portions, installment of eligibility report parameters, and any sub-loans associated with the rescheduled debt.

Disposition: Temporary—General Records Schedule 20, item 2 (b)
2. **System Outputs** provide reporting and searching capabilities based upon name, type of rescheduled debt, status of repayments, and sub-loans.

**Disposition:** Temporary — General Records Schedule 20, Item 16

3. **Master File** contains data to identify and maintain rescheduled debts. This data includes name, address, amount of debt, repayment schedule, apportionment of debt, distribution of payments received, current amount of debt, and final payment date.

**Disposition:** Temporary — Destroy 12 years after debt has been closed or cancelled.
