

INACTIVE - ALL ITEMS SUPERSEDED OR OBSOLETE

Schedule Number: N2-326-96-001

This schedule provided disposal authority for records previously accessioned into the holdings of the National Archives.

Per NARA Directive 1540 – *Reappraisal and Deaccessioning of Archival Federal Records*:

An internal disposal is the permanent removal of a discrete set of an accessioned series of records from NARA's physical and legal custody, from any number of physical locations (up to and including all physical locations), because they have been reappraised as temporary, without affecting the existing disposition authority for any remaining records. This removal can result in the records being destroyed, permanently returned to an agency, or donated to another organization.

It is assumed that the schedule was implemented after the record scheduling process was completed (concurrence by the agency, notice to the public via the Federal Register, and approval by the Archivist of the United States).

7 Item No	8 DESCRIPTION OF ITEM AND PROPOSED DISPOSITION	9 GRS OR SUPERSEDED JOB CITATION	10 ACTION TAKEN (NARA USE ONLY)
	<p>The 669 cubic feet of records included in this Request for Records Disposition authority are primarily engineering construction project files relating to the construction of facilities at AEC and DOD test sites in the Pacific Ocean Area and Nevada. These records were created by and retired into FRC, Los Angeles by Holmes and Narver, INC, the prime contractor to AEC for construction and facilities maintenance.</p> <p>The records, identified in this request by the 77 FRC Accession numbers under which the records were retired, consist of engineering drawings, photographs, test data, geological data, establishment of reference points, and reports of other tests used for reference purposes. The data provided in the records is preliminary or intermediate. There are no final or other test reports included in these files.</p> <p>Upon archival processing of these records, which had been accessioned over the past several years, their archival value was questioned. Additionally it was discovered that the permanent authority under which the records were retired had never been approved and the records transferred were not, in most cases, as they were described in the schedule.</p> <p>Per request of the National Archives - Pacific Southwest Region, Dick MacKay, NIR, conducted a reappraisal of these records during the week of May 6, 1996. He provided a more complete description and added the recommended disposition for each series that is recommended for deaccessioning and disposal.</p>
