# EPA Records Schedule 436

**Status:** Draft, 03/31/2008

**Title:** National Contaminant Occurrence Database (NCOD)

**Program:** Water

**Applicability:** Headquarters

**Function:** 108-025-03-02 - Management of Public Water Systems

## NARA Disposal Authority:

This schedule authorizes the disposition of the record copy in any media (media neutral), excluding any records already in electronic form. Records designated for permanent retention must be transferred to the National Archives in accordance with NARA standards at the time of transfer.

- N1-412-08-2

## Description:

The National Contaminant Occurrence Database (NCOD) includes data used to identify contaminants on the Candidates Contaminant List (CCL). The data is used to determine whether to develop drinking water standards for a particular contaminant and to develop standards for the contaminants that the Agency selects. The information comes from a number of sources, including public water systems and source (ambient) water data. For public systems, the database holds historical data on regulated and unregulated contaminants. The data is available to the public.

The Safe Drinking Water Accession and Review System (SDWARS) serves as the input to NCOD, and is scheduled as EPA 253.
