- N1-412-09-15

### Description:

The Drinking Water State Revolving Fund (DWSRF) National Information Management System (DWNIMS) is EPA's information system for national management of the DWSRF program. The purpose is to report the status and progress of the DWSRF program. The data are also used for oversight purposes and financial analysis. Results from the data collections are presented at the Council of Infrastructure Financing Authorities (CIFA) annual conferences. All current DWSRF strategic goals are measured and updated with data from DWNIMS.

Current and proposed measures include number of loans, number of projects initiating operations, the Return on Federal Investments, the Fund Utilization Rate, and number of out-of-compliance systems brought into compliance with health-based standards. Input data is received from states and entered into the database either through a Web-portal or a spreadsheet. Output includes national, regional and state reports. Data is currently available for state fiscal years (July-June) beginning 1997.
