	Agencywide Documents Access and Management System (ADAMS) Programmatic Records of the NRC Office of Administration		
	ADAMS is an electronic information system that maintains the Nuclear Regulatory Commission's (NRC's) unclassified official programmatic and administrative records in a centralized electronic document repository. ADAMS is designed to meet all National Archives and Records Administration (NARA) regulations to ensure NARA approval of ADAMS as an official electronic recordkeeping system. Beginning April1, 2000, NRC headquarters and regional offices will no longer create or maintain paper-based record collections because the electronic documents in ADAMS will become the "official records" of the agency. The "official record" of documents maintained in ADAMS is a Portable Document Format (PDF) file or a Tagged Image File Format (TIFF) file with an associated document profile containing "fielded" data to describe the document and its attributes. In addition, any electronic data related to a digital signature and/or electronic data that evidence final NRC management and staff concurrence in a document is linked to and considered part of the official record.		-
	Records disposition schedules for the NRC records maintained in ADAMS are divided into two broad groups.
