U. S. Nuclear Regulatory Commission
GENERIC ISSUE MANAGEMENT CONTROL SYSTEM (GIMCS)

GENERIC ISSUE MANAGEMENT CONTROL SYSTEM (GIMCS)

The Generic Issue Management Control System (GIMCS) is a password restricted secure Access database used to store and manage information identifying reactor and non-reactor Generic Issues and the process for their resolution. GIMCS provides an integrated system of reports and procedures maintained on a stand-alone computer. In addition to the technical description, work scope, status of problem/resolution, the schedule milestones and resources assigned to the issue resolution are maintained within GIMCS. GIMCS provides the historical record of all generic issues development and resolution since 1983.

The Generic Issue Program is managed by the NRC Office of Nuclear Regulatory Research (RES)

1. Inputs/Source Documents

Generic Issues are submitted from many sources including the NRC staff and the public. The submittals provide descriptive information and the resolution status and schedules milestones are provided and updated by assigned NRC staff. The GIMCS data are entered and verified by RES staff. The information for open items is updated at least quarterly until the issue is closed.

Disposition: TEMPORARY Information used to provide input and status to the GIMCS issues is cut off after data entry and the information is verified to be correct. The input information is destroyed at cut off. *LGRS 20, items 2a(4) and 2b.)*

Approval
by
Archivist
not
needed

2. Master File

Information contained in GIMCS includes Issue-Specific Information such as

- Generic Safety Issue number and title
- Selected dates (Date identified, Date prioritization screening is complete (prior to 1999), Date of technical assessment, Resolution date)
- Status summary and descriptive text
- Cost and financial data (FIN/expenditures/TAC number)
- Task Manager/Office & Branch assignments
- Description
- Work scope
- Milestones and dates (original, current, actual)
- Closure document / ADAMS ML number

~~**Disposition: PERMANENT** Cut off files at end of each Calendar Year. Transfer an electronic copy to the National Archives for pre accessioning at cut off. Transfer the Master File to the legal custody of the National Archives when the system is replaced or retired in accordance with NARA Bulletin 2004-02 and NARA regulations at 36 CFR 1228.270.~~

Disposition: TEMPORARY. Maintain the information (data) for as long as the NRC administers a program on generic issues. If the generic issues program is terminated, cut off when generic issues system is decommissioned, and delete the data between one and 5 years after cut off.

Above revised disposition for Master File was approved by NRC Records Officer Deborah Armentrout, 9/14/12.

3. Outputs

This system provides reports that are included in the annual NUREG-0933, "A Prioritization of Generic Safety Issues" Information from GIMCS provides the basis for the appendix and is used to create quarterly reports and semi-annual reports to the Commission These reports are available to the public The record copies of the Quarterly Reports are maintained in ADAMS, or other currently approved record keeping system

a. Published GIMCS Contents (e.g., NUREG-0933, Quarterly and Semi-Annual Reports, SECY papers)

Disposition: PERMANENT Cut off at the close of the fiscal year and transfer to the National Archives 5 years after cut off Destroy NRC copy 10 years after transferring the record to NARA [Supersedes N1-431-00-17, Item 9 a]

b. Report as posted on NRC web pages

Status information is also updated quarterly on the NRC public website

Disposition: TEMPORARY. Cut off when superseded by new Destroy by fiscal year, 2 years after cutoff

c. Adhoc System Reports

Reports created from the information in GIMCS are used for the administration of the generic issues resolution program Typical reports may include status listings of the open generic issues (GRS 20, item 16)

Disposition: TEMPORARY Cut off and destroy when no longer required for business purposes as determined by RES management

Approval by Archivist not needed

4. GIMCS System Documentation

Limited system documentation has been created for GIMCS

- Operational Support Guide
- User Guide

Disposition:

a) Initial and Revised Documentation.

Disposition: TEMPORARY. Retain current revisions of these records in a controlled repository (e.g., Rational ClearCase or ADAMS) until development is complete and the software is operational. Transfer the final approved versions and subsequent revisions of these documents to ADAMS, or other currently approved record keeping system, in a format acceptable to the ADAMS Administrators and Records Officer Cut off when the documents are superseded and the revisions placed in ADAMS Destroy at cut off (GRS 20, item 11a(1))

Approval by Archivist not needed

b) Final System Documentation.

~~**Disposition:** PERMANENT. Cut off files when the system is retired or superseded. Transfer an electronic copy to the National Archives at cut off with the GIMCS system data. (Item 2, Master File)~~

Disposition: TEMPORARY. Destroy no less than one year and no more than five years after the system is decommissioned or superseded [GRS 20, Item 11 a (1)]

Approval by Archivist not needed

Above revised disposition for Final System Documentation was approved by NRC Records Officer Deborah Armentrout, 9/14/12.
