This records disposition schedule revises the schedule for Reactor Operator and Senior Operator Docket Files originally described under NC1-431-81-5, Schedule 4, Part 7, Item 2, to expand the description of records, eliminate the early disposal of superseded material, and lengthen the retention period to ten years. The revision is required due to changes in the licensing examination process, new requirements of the Fitness for Duty Rule (10 CFR 26), and extended administrative need for the material beyond the current retention period.

Reactor Operator and Senior Operator Docket Files

Case files containing information pertaining to 10 CFR Part 55 applicants for a license, licensed operators and individuals who previously held licenses. Documentation includes applications for a license, licenses, denial letters, and related licensing correspondence, correspondence pertaining to actions taken against a licensee, 10 CFR Part 50.74 notifications, certifications of medical examinations and related medical information, fitness for duty information, examination results and other docket information.
