NO. DESCRIPTION OF RECORDSAUTHORIZED DISPOSITION1. Nuclear Power Plant Docket Files

Records documenting licensing of the construction and operation of commercial nuclear reactors for power generation and non-power reactors pursuant to Parts 2, 20, 50, 100, and 140 of Title 10, Code of Federal Regulations. Material consists of individual applicant case files, identified by assigned docket numbers, containing copies of all documents received or generated in review, evaluation, and authorization stages of the licensing process. Each operating license issued is for a fixed time period specified in the license document but in no case exceeds 40 years. Licenses may be renewed by the NRC upon the expiration of the initially authorized operating period. Decommissioning records for these licenses are permanent and require maintenance as a subset of each case file as specified in SECY 90-316. Reference item b. below for authorized disposition.

- a. Official docket files of the Office of Nuclear Reactor Regulation, including the decommissioning segment, located at the NRC File Center, determined by the NRC to have exceptional value because of the historical significance of their contents or their uniqueness. Included are files that:
1. result in judicial decisions or legislation that affect the functions and activities of NRC, e.g., Enrico Fermi No. 1 (Power Reactor Demonstration Co. Reactor),
 2. result in significant changes in regulatory activities and procedures, e.g., Brown's Ferry, or
 3. were the subject of Congressional investigation or were of great public

Permanent. Retain current fiscal year and last four years in NRC File Center. Retire, by facility, to WNRC through IRM annually if the records consist of at least one cubic foot and are over five years old. Closing date is the termination date following completion of decommissioning procedure (which is the license date plus 40 years). Transfer to NARA 20 years after termination of license.
