PREVIOUS EDITION NOT USABLE

Prescribed by NARA 36 CFR 1228
Program Review Division
Single-Issue Review Records

The following schedule covers records documenting OGE's government-wide single-issue review process. OGE analysts conduct reviews of single issues that are common to all executive branch agency ethics programs rather than of individual agency programs. Reviews periodically include surveying agency ethics officials or employees. Reviews address issues such as an assessment of the conflict of interest waiver process, the effectiveness of the executive branch ethics program and ethical culture, and field office ethics programs.

1. Single-issue review records:

A. Final report records: Files include final reports that summarize the result of OGE single-issue reviews and subsequent recommendations. Meeting the data entry notification processed on 9/8/90.

PERMANENT. Cut off upon completion of review. Retire to WNRC 10 years after cutoff. Transfer to NARA 20 years after cutoff.

B. Questionnaires and surveys: OGE questionnaires and surveys sent to selected Executive branch agencies for the purpose of collecting information relating to single-issue reviews.

TEMPORARY. Destroy 1 year after completion of review or upon entry and verification of data in electronic data base, whichever is later.

C. Electronic data. Data collected from single issue review questionnaires.

PERMANENT. Transfer electronic data and related systems documentation to NARA 2 years after completion of review.

TEMPORARY. Delete 7 years after completion of review.

D. Work papers. Summaries of interviews, data analysis documents, hard copy print outs of electronic data, and all other records associated with single-issue review not covered under items A through C of this schedule.

TEMPORARY. Cut off upon completion of review. Retire to WNRC 4 years after cutoff. Destroy 7 years after cutoff.

E. Electronic versions created by e-mail and word processing applications of single issue review records covered by items A, B, and D.

TEMPORARY. Delete when file copy is generated or when no longer needed for reference or updating, whichever is later.
