| | | | |

The proposed disposition instructions for the following record series apply to records in all media and format.

STATA Automated System

1) ~~**Input.** Statistical data is entered pertaining to macroeconomic and microeconomic conditions in MCC partner countries' financial status including household survey responses, spreadsheets, databases, and other U.S government and private sources. Paper based documents are converted to electronic formatted media. Records may contain non public exempted, proprietary, or sensitive Foreign Government Information (FGI). The source of STATA inputs are from Monitoring and Evaluation (M&E) files and Economic Analysis (EA) datasets and records. Inputs and economic information are also downloaded from Non-governmental Organizations (NGOs), and private, public, and international institutions as data manually entered into STATA.~~

~~**Disposition:** See comprehensive schedule covering paper records for disposition of records constituting inputs.~~

2) **Master File.** One or multiple datasets may be used for a statistical analysis project. These datasets are stored as STATA data files.

Disposition: Temporary. Cut off files at the end of statistical analysis project. Destroy/delete 3 years after cutoff.

3) ~~**Output.** STATA generates a wide variety of statistical reports and regression analyses. The detail of these reports can range from summary results of an analysis to a full list of all variables and individual commands that go into producing the analysis. The output reports are used in MCC documents related to constraints analyses, compact development, and impact evaluation.~~

~~**Disposition:** See comprehensive schedule covering paper records for disposition of records constituting outputs.~~

4) ~~**Documentation.** System documentation, codebooks, record layouts, and user guides.~~

~~**Disposition: Temporary:** Destroy when updated or when no longer needed, whichever is later.~~

GRS-20, Item 11
