

Pulse Camera

HMMMA-26414 22 June 1965 Details of the L Pulse Camera Operation

Lew H. meets on average of 2 times week to get negatives. ..since the installation, Glenn W, ~~MM~~ at the NOC site, has had to repair. PC operates 6 hrs/day. 5 days/week....production sent to Miami for A-1.

Simple fact: The 27S63 installation report said that all testing of the system would be forwarded to Hq when available.

It was sent as attachemtn to 7N63. LHO is not in it.

The TM252572 refers to negatives from the pulse camera. These would have been from the Dec. 64 installation...since that system yielded only negatives..per the June 65 report.

MEXI 7098 27N63 Alvarado interview

"Station photo coverage of Cuban Embassy did not include Conculate Gate until Octáber."

Disposition of Photo P_roduction

HMMMA-37684 12 Aug. 69

Forwarded for Hq retention are 70 volumes of photo take from L-i from late 61 thru D. 68.requests they be sent to [redacted]..."The station suggests that a retention period of 10 years from the date of the information may be desirable"

Box #1 : 1961-Dec. 1963
