      Re the correspondence commencing with the memo dated 15 September 1961 to Career Agent Panel concerning assignment of Subject to JMWAVE. For the past 2-3 months I have made numerous inquiries to WH/4 Security regarding this matter in an attempt to get the appropriate WH officials to clarify the situation as to whether or not the use of the Subject at JMWAVE had been approved by some appropriate "Panel" without getting OS approval, and also to have a request initiated in this regard to OS.
      On this date, [   ] CPD, called me and wanted to know the status of any security approval action. I advised her that we never received a request for approval of Subject as indicated and I asked her if she knew whether or not the use had been approved elsewhere. She said her records indicated the use had been approved back in September by the Agent's Panel and she would send me a memo concerning this right away. I restated to her the fact that the use of Subject as indicated appears to be in violation of former OS restrictions as set out on 2 March 1960. She
