[Redacted] March 1, 1966 to July 31, 1966

During this period of treatment this patient has shown signs of real improvement. He has made a good adjustment to his present environment for the past few months. I, therefore, recommend that he be informed that as he finds himself in good physical and mental shape he is now capable of engaging in some activities which will ultimately enable him to be self supporting in the near future.

Miguel A. Nera, M. D.
