1. OPERATIONAL ACTIVITY		
<p>A. During the period, the ANTRUNK complex underwent a personnel revamping based for the most part upon the need for economy in combined operations. AMAGREE-1 was transferred to another JMWAVE element. ANTRUNK-13 and -22 were transferred to the (VI) THRUSH Program. The above transfers were all effective 31 Dec 65. Two new MHAPRON recruiter trainees, AMLUNT-2 and ANTRUNK-24, were brought on board in Dec 65. As now constituted, the ANTRUNK complex is composed of the following: AMICE-14, P/A; ANAKA-1, Team Leader; AMAROMA-2, Radop; ANTRUNK-7, Guide; and AMLUNT-2 and ANTRUNK-24 and -21, MHAPRON recruiters.</p> <p>B. The "Bobby" affair (see Paras 7 ee, thru 7 ee, of Ref A) which was originally surfaced during Operation STEAMER VII/VIII, 1-15 Oct 65, is still being investigated. This unknown individual, identified only as "Bobby", is the person who was supposedly responsible for delivering the AMLASH cache (see Refs B and C) "back to the United States". This investigation has been facilitated by the arrival in the United States of IDEN A, an internal ANTRUNK contact since mid 1962. IDEN A stated that he had never met "Bobby" personally but received his orders through ANTRUNK-18, another internal asset (with whom JMWAVE has no communication). According to IDEN A, "Bobby" and ANTRUNK-18 have been in contact since some</p>

time in mid-1964 when he introduced himself to ANTRUNK-18 to pass the AMLASH cache recovery instructions (Ref C). IDEN A; his son, IDEN B; and ANTRUNK-18 retrieved the cache some time in the fall of 1964 and, from IDEN A's description of the incident, the AMLASH cache was passed over to a boat "from outside" in a rather precise and professional manner. In addition to this "cache recovery", IDEN A claims to have participated in five other similar "operations" with IDEN B and ANTRUNK-18 during an approximate one-year period from mid-1964 to mid-1965. Although IDEN A has been unable to identify "Bobby" directly, he has provided several leads which the Case Officer is following up. There is also an excellent possibility that IDEN B will also soon be leaving through the Camarioca exodus. Since per Ref C, the cache recovery instructions were sent to ANTRUNK-10 via S/W and he in turn passed them to ANTRUNK-11 who, in turn, delivered them to ANTRUNK-15, there appears to be some relationship between "Bobby" and ANTRUNK-15. Other than ANTRUNK-18, this is the only possible link thus far established between the internal ANTRUNK network and "Bobby". ANTRUNK-15 was imprisoned in mid-October 64 for reasons unknown to JMWAVE and, according to IDEN A, he is now in a rehabilitation camp the location of which is unknown to IDEN A. As stated above, the investigation is continuing and Headquarters will be apprized of the results when some definitive conclusion has been established.

C. Two meetings between ANTRUNK-19 and his [redacted] Case Officer, Leslie M. HENDRIQUE, were held in Madrid during the period. ANTRUNK-19 appears to have decided to cooperate fully with EUBARK and the results of these two meetings seem to have been fruitful. ANTRUNK-19 has used his S/W channel to JMWAVE and hopefully his ORVL link will soon be established.

None

4. PROJECTED PLANS

A. Commencing in early January 1966, ANTRUNK-7 and ANTRUNK-24, the two new KHAFAM recruits, will begin a two to half month training cycle designed to prepare them for their mission. At the same time, the other ANTRUNK team members will participate in this training for refresher purposes.

B. For the present, operations into the former
AMTRONK infil/exfiltration area will have to be postponed until
the full significance of the "Lobby" affair is established. Mean-
while, attempts will be directed toward establishing another
infiltration area.
