Interview with Walter P. Haltigan 3111157

Date: June 13, 1978

interviewed by: Mickey Goldsmith and Betty Noff

A copy of the interview notes was given to Mr. Haltigan who read it and indicated that he understood the contents.

**REPRODUCTION PROHIBITED**

Mr. Haltigan was given a copy of LIA #435-173-A which consists of a cover letter dated 11/12/63 from [redacted] to the Chiefs of SE and WE and to the Chief of Station in [redacted] forwarding a memo dated 11/25/63 which was written by [redacted] to Walter P. Haltigan concerning [redacted] prior interest in Lee Harvey Oswald. This document served as the basis for our questioning.

Haltigan stated that in 1963 he served as chief of the Soviet Section of the [redacted] station under diplomatic cover. He explained that [redacted] was also an officer in the [redacted] station but he served under [redacted] and worked [redacted] using alt-outs to make contact with others in the [redacted] station.

Due to the nature of the arrangement, basing frequently wrote informal memos such as the one in #435-173-A which were then passed along to the station. These memos would then be forwarded to Headquarters, generally by Haltigan. In this particular instance [redacted] who served under Haltigan, forwarded the letter to Headquarters because Haltigan was in the hospital at the time. **REPRODUCTION PROHIBITED**.

Haltigan explained the following portions of [redacted] memo:

- "REDWOOD" represents the Soviet Division.

- The "6 Branch" was the Operational Support and Recruited Branch for the Soviet Division. Its main function was the collection of

3111158

information. [ ] was brief of the b Bureau until his transfer

to [ ]

## REPRODUCTION

- KULTUM was the cryptonym for the Office of Operations which is currently known as the AED. If the CIA wished to contact a

[ ], it would have made contact through this office.

However, Heltigan stated that it probably was not standard operating procedure to interview [ ] due to a variety of factors such as a lack of proper follow-up measures or the fact that these cases would have fallen into the jurisdiction of the FBI.

- ODAED was the cryptonym for the State Department. Heltigan explained that it was not unusual that [ ] would have seen a State Department diplomat in Oswald as it would have been routine to receive most of State Department memos.

- [ ] recollection of having discussed the Oswald case "in summer 1960" as stated in the memo, must have been a mistake. Instead, it probably <sup>meant the summer</sup> should have been of 1962.

- BI refers to biographic information.

- KDOVER was a cryptonym for a cover which was probably a business firm. KDOVE was the cryptonym for the DDP.

Heltigan explained in paragraph 3 [ ] did not mean that he was placing out of the DDP altogether. Instead, his reference to placing [ ] out of the DDP referred only to the Headquarters assignment within DDP.

# **REPRODUCTION**

The AECLEAN/3 case was picked up in Europe for the Soviet Travelers program went to the USSR where he fell in love with an American guide whom he married. He came out of the USSR in the summer of 1962 and his wife was permitted to join him some months later. Haltigin did not believe this to be a case where the couple were eventually divorced as this memo infers. Haltigin stated that it was unusual for Maria Oswald to be allowed to leave the Soviet Union as not many Soviet wives were permitted to leave during that time period.

Haltigin was perplexed as to the reference to the "Harvey story" in the last line of the memo. He first stated that it must have been a typographical error which should have been the "Oswald story" instead. When it was pointed out that the sentence contained two other references to Oswald which makes it unlikely that this was merely a typographical error, he expressed confusion with respect to the reference. He could think of no explanation for this, nor did he remember after speaking to Lassila about this point.

# **PROHIBITED**

Haltigin recalled that he arrived in [ ] for his assignment in June, 1962 and that [ ] probably arrived here in September of the same year. Haltigin stated that he had never heard any rumors to the effect that Oswald had been used by the CIA at any time. He felt that because of his assignments within the Agency, he would have been in a position to know if Oswald had been used in any capacity. He mentioned that he had been in Japan from 1951-1955 and that [ ] FIDELIA came there from.

1955 to 1958 & 1959.

SECRET

REPRODUCTION

Haltigan advised that SR/9 was responsible for maintaining its own records while they kept in the same manner as DDO files. If someone needed to know if a particular person was being used, they would be able to check it through the files. However, Agency association would not be directly reflected in a 201 file. Instead, there would be a paper in the file <sup>referring</sup> ~~relative~~ to another file in which operational information would be stored. Haltigan explained that a 201 file documents the person but not what the person is doing. A 201 file <sup>might</sup> contain a PRQ, Part I which is entirely biographical information, a security check and newspaper clipping concerning the individual. A case file, on the other hand, reflects the operational information. A case file would have a two part number such as 74-6, where the first ~~number~~ reflects the country or area of interest and the second number refers to the specific operator. In regard to the accessibility of case files, Haltigan stated that the area of primary interest is reflected on a 201 file opening sheet and that ~~the operator~~ go to that office to seek operational information.

When asked about the significance of CI/SIC opening Oswald's 201

*SECRET*  
file. Heltigan ~~said~~ that he ~~was~~ not really say as the date  
not know what CI/SEC was doing at the time.

Heltigan was asked whether it was possible to purge an individual's  
file of any operational information by removing any <sup>such</sup> reference cards in  
the 201 file and then removing the pertinent information from the  
case file. Heltigan stated that he does not know of the type of thing  
occurring in his experience. He stated that file maintenance was  
essential for the protection of the operator and stressed that SR/9 in  
particular was meticulous in its file maintenance.
