SUBJECT: Utilization by Covert Training of  
# 112569

1. Subject is a contract agent of WH and has been employed in this capacity by the Agency since 1949. He is currently in this country and will be here for a two year period primarily to achieve naturalization of his wife. WH has offered this man to us for utilization in training exercises.

2. Subject will remain the administrative responsibility of WH/Mexico, who will continue to provide as much work as they possibly can. Covert Training in turn will make use of the man in connection with practical exercises arising out of our training activities on a "as needed" basis. Subject will not have access to Agency buildings and it is not contemplated that he be given access to (ISLIP). He will have access to such safehouse facilities as is required by the respective training exercises. He will be introduced to the trainees by training alias and he will know the trainees by their respective training aliases only. He is currently under non-official cover which is, as we understand it, backstopped although notional. No additional cover requirements exist. We have been requested not to use him with liaison personnel nor should he be used with foreign nationals who will serve in the South American area.

3. No funding for the use of this man is required except that which is already provided in connection with training exercises and for reimbursement of mileage for the use of his personal car on official business at current approved rates.

4. We request that we be given Security approval to proceed with the utilization of subject as indicated above.
