23 November 1960

CONTACT REPORT

SUBJECT: Meeting with Marmel Bay and Ward Chiles in the latter's apartment (113 West 72nd Street, New York City) on 22 November, 1960.

PART ONE OF THREE

To Note: This meeting was held publicly so as to avoid suspicion of being a clandestine meeting of leaders暗暗地 of our future relationship with the KGB. (See Memorandum From the Record dated 21 November 1960, TIR 42502, OUT 4590, and C/W/M/L/2/28 memorandum to C/W/M/L, 9 November, 1960; also See TIR 1774, 16-408 & which states that Hunt obtained Verona's concurrence on 21 November to discuss him and the PADD's controller.)

1. The meeting was started by me telling Bay that I had received a somewhat garbled message concerning a certain general on the Isle of Pines. Now comes an undertaking, we think and will, probably, not involve? (Note: The question was posed publicly to everybody by C/W/M/L and in line with C/W/M/L's correspondence to us.) Bay informed me as follows:

(a) There are two garrisons stationed at the Isle of Pines with whom his organization has contact. One garrison is commanded by [redacted] who could squat no approximately 100 men to follow [redacted] if [redacted] decides to break away from Daeran. [redacted] also has approximately 50 temporarily officials under his command (whether these officers were military or civilian Bay did not know) which were ready to assist in anti-colonial activities—the second garrison was located at the Punta Del Este and was primarily a coast artillery installation. Bay did not give the name of its commanding officer.

(b) Quite separately from the above, Bay's people are in contact with a (now) [redacted] who is the [redacted] of the [redacted] where Huber Hayes is incarcerated. According to reliable information, [redacted] says, [redacted] may be of help in arranging the escape of Hayes. A small council who arranges [redacted] on 21 November said that Hayes seems to trust [redacted] and has given [redacted] his wife who can visit him at the prison—the okay to utilize [redacted] in efforts designed to liberate [redacted] from prison.

(c) In considering the situation outlined in (a) and (b) above, Marmel Bay's military planners felt that the single garrison would be large enough to dominate Daeran itself, but would have to be freed and if the two garrisons in the two islands (Punta Del Este and the Isle of Pines, known by the name [redacted], is situated in the [redacted] Sea no. 1000000, the two islands at the Isle of Pines and the

area location can probably not be off by more than 10 miles. The various service aspects of Castro's air force can be used better, prior or during the day. The planes are used much less at night. Castro's ground forces operating at night there are only three roads to pass thru leading into the hills of Pinar del Rio even less. These roads, the Río Poco River, can be easily patrolled by them. As always now seems, the general object of the patrols would be to [redacted] capture and destroy the airline. The [redacted] route from Havana to approximately 100 miles a drive to the coast which would be relatively reached with ease. As 1000 feet road may just a number of times in order to get across. [redacted] 00 [redacted] patrols. Men would be found with the bags [redacted] 24 hours and start simultaneously all the [redacted] patrols. [redacted] 100 miles has five garrisons which have had enough information on [redacted] route, also strategic locations.

(d) The service that St. Norbert's was set as the target date
was that held [initials] at [redacted] for rotation in the very
short notice. Therefore, the 1st January Mass, a Sunday is the
best day it would have to be done.

3. After the stem is broken try and find the following water-
soluble:

(a) Our support to end/or advice on how to neutralize Castro's air force.

(3) Interventions for preventing central lung and air floods.

(c) Delivery of anti-air craft artillery and bombing equipment for anti-aircraft schools after the operation has begun, and

(d) Maps prepared by the Aerial Service Company of Philadelphia, Pennsylvania. (1)

b. Without naming "X" committee in the above report I fixed
other on 5/26/64 and 5/27/64 at his disposal six

b. Without rating "X" commitments in the above report I asked whether or not the Major General could furnish facilities at his disposal and whether or not his people which were able to manufacture, handle, and use any supplies which might come their way. I also asked what specific types of weapons the MAF pictures were thinking of and what kind of ammunition re-supply would be needed for arms now already in the hands of anti-Castro Cubans in the area. It being agreed that the Major General has the answers to these questions will be forwarded to you for further discussion to the "Technical Board," i.e., Colants, Barrels and the rest.

5. At this point of the conversation I began w.r.t. the implementation of the Headquarters decisions reached in regard to the Pendo group's support of the NCP. I said that I wanted to repeat concerns I had made previously to Chibas, Estevao, Barreto, and Soys namely, that the Pendo group could not afford any marginalization of existing ethnic affinities that an administrative and supply unitary liaison established for this purpose, and that this mechanism, i.e., the Inter-ethnic Liaison Commission, would have to be utilized to the fullest in operating at this level. My

undoubtedly know that Smith was also the military advisor to the FID; any migrants would undoubtedly carry the FID label and in all likelihood if required, anti-Castro literature would accompany such shipments; planes and pilots utilized in such an undertaking were FID assets and identified as such.

6. Per's reply to this was somewhat as follows: while the FID thinks it controls these pilots I, Bender, should at least realize that the pilots who were working formerly for Cuban Air Lines really belonged to the MCP. In my case he, Ray, and the MCP would accept the proposed arrangement because it would not imply that the MCP is politically beholden to the FID; it would simply indicate to the people inside Cuba that the MCP were utilizing all resources to obtain the equipment necessary to overthrow the regime. Naturally he was not enthusiastic about this formula but he could live and cope with it.

7. I told Ray that I would have to get in touch with our military people in order to find out whether or not we now had sufficient data on hand on which to base a decision. (Comment: C/HB/4 was briefed telephonically by me on the foregoing and on additional aspects of this meeting which are reported in part two of this Contact Report. C/HB/4 and I felt that we did not have as yet sufficient data to make any commitment; C/HB/4 instructed me to advise Ray that:

(a) Whether the MCP should submit a detailed plan which we would consider on the basis of which we would then decide whether to be of assistance or not; or;

(b) The MCP could go it alone, and ask us for some assistance after the operation has been launched and we would make our decision then on the basis of existing circumstances.

Above was transmitted to Ray who indicated that the MCP did not desire to go it alone and that he would instruct Bergman to immediately contact Smith in Miami to work out a coordinated operational plan.)

8. At this point at the meeting I felt too, the time was ripe to make the \$7500 proposal (by Bender check) and so advised Ray that another \$7500 would be made available to him via Juan Banks, an FBI controller. Requested what I had said previously about duplication and followed the approved lines contained in my 19 November 1960 memorandum to C/HB/4. Ray's and Chibas' reactions were not unexpected; they rejected this particular funding proposal. (Comment: for additional details and other items covering this meeting see parts two and three, "Contact Report, 2 November, Meeting with Ray and Chibas.")
