SECRET, KAPOK

Chief, JMWAVE

Chief, WHD

Chief of Station, (Buenos Aires)

16-29

AMICE-14

Action required: FYI

Reference: UFGA-17,794, 23 September 64

1. The Station has studied carefully the AMICE-14 file. AMICE-14 appears to be intelligent, capable, well trained, and productive. However, the Station believes that unilateral and liaison MHS PARN operations in the field of university student activities would not be significantly supplemented by the use of AMICE-14. In particular AMICE-14 would be of little value as a university student in the academic field in which he is prepared and interested. This is already crowded with (BIOGENESIS) MHS PARN operations and MHS PARN operations of other local services. The Station has given careful consideration to the question of whether AMICE-14 could be used by (BIOGENESIS) as have other JMWAVE assets in the past. We have concluded that such use would not be advisable because productivity would not be commensurate with the limitations that such an arrangement would impose.

2. Finally, we reluctantly conclude that AMICE-14 would not be a productive intelligence asset in the operational situation that prevails in the student field because he could not hide the fact that he was an anti-Communist Cuban.
