

Office Memorandum • UNITED STATES GOVERNMENT

TO : Mr. [redacted] CI/TC DATE: 30 October 1968

FROM : Executive Secretary, TSCC

SUBJECT: International Dynamics and Gordon Novel

1. I am unable to find any reference in our assorted files to International Dynamics Corporation. I wonder if this could be an outgrowth of International Security Services which made the local papers about two years ago trying to peddle equipment and services to various members of Congress. At that time, ISS was listed at 1026 17th Street, N.W., which should be just around the corner from International Dynamics address. ISS was headed up by one Albert P. Senteio who seemed to be one of those fly-by-night operators having a somewhat derogatory background file.

2. I am attaching copies of two Bureau memorandums touching on Gordon Novel's activities in the bugging and anti-bugging field. These were reported in substance to the Committee via Information Notices 68-1 and 68-6.

3. Sorry I don't have anything more. I wouldn't be at all surprised at a connection between Novel and Senteio, since I have a feeling they are both somewhat addicted to operating in shady areas. Senteio has used several different company names and addresses locally in the past several years.
