Notes from meeting w/ ARRB staff Sept. 11, 1995

Issue: Presentation to Board at Sept. 20/21 meeting

It was agreed that "STATIONS" would be the focus of the presentation -- 10:00 am, 20 Sept., one hour.

Marwell recommended providing evidence of bilateral agreements as well as identifying current harm. Said that the Board was leaning strongly toward releasing stations, particularly those in Europe.

Mary pointed out that there were still issues on the Mexico City station window. There are documents from the 50s, references in summaries to the founding of the station and, most important, the visit by the HSCA to Mexico City.

Ellie said there was the possibility of opening windows of stations when Oswald was present, however, this was a key issue for the Agency and a senior Directorate/Agency decision. She indicated that the DO would oppose expanding the Mexico City window into the 70s.

As for the older documents, we pointed out that we had already agreed to the release of those documents.

Marwell suggest that the 20 Sept. presentation would be a good opportunity to address the Private Line and other Tel Taps issue rather than requesting a separate meeting.

After the meeting Marwell elaborated on the presentation. He said to try to avoid going over old ground (US-Mexico relationship); when possible provide specific/hard evidence (bilateral agreements carry weight); war-stories do not go over well. He emphasized the importance of using the language of the law especially when citing harm. He specifically mentioned Sec. 6. (B){copy attached} which sets a standard of "interfere with the conduct of intelligence activities".

[Note: In a previous meeting with Gunn, he stressed similar themes including avoiding what he called "chicken little" arguments. He also raised the question on sensitivity of acknowledging we had a station in Moscow during the 60s. "It would have been logical to have one during the Cold War." ]
