Presentación

El autor de este estudio, el Profesor Maurice Halperin, es uno de los investigadores y catedráticos más prominentes de los Estados Unidos de Norteamérica. Nació en Boston en 1906. Obtuvo su bachillerato en la Universidad de Harvard en 1926 y la Licenciatura en Letras en la Universidad de Oklahoma en 1929. Dos años más tarde se doctoró en Letras y Ciencias Sociales en la Universidad de París y fue conferenciante en la Sorbona sobre la civilización de la América del Norte.

En los Estados Unidos fue catedrático de la Universidad de Oklahoma y Jefe del Departamento de Estudios Económicos y Geopolíticos Latinoamericanos en la Secretaría de Guerra y en la Secretaría de Estado en Washington, durante los años de la Segunda Guerra Mundial. Como consejero técnico del Consejo Económico y Social de las Naciones Unidas trabajó durante tres años, de 1946 a 1949. Volvió a su Universidad de origen, la de Boston, como catedrático y Jefe del Departamento de Estudios Latinoamericanos en donde prestó sus servicios hasta 1953.

Interesado siempre en el estudio de los problemas de las naciones de la América Latina, fue a Brasil en 1952 y trabajó como conferenciante en la Universidad de San Pablo. Por su labor docente el gobierno del Brasil le otorgó la condecoración de "Oficial de la Orden do Cruzeiro do Sul". Posteriormente estuvo en México, siendo Profesor Extraordinario de la Escuela Nacional de Ciencias Políticas y Sociales de la Universidad Nacional de México, de 1954 a 1957. Cooperó también como Asesor Económico del Departamento de Promoción de la Nacional Financiera y en otras instituciones gubernamentales y privadas de nuestro país.

Ha publicado numerosos estudios, entre otros el titulado "La América Latina en Transición", que editó la Universidad Nacional de México en 1956, así como ensayos acerca de la economía y el desarrollo social en los Estados Unidos, Francia, Alemania, Chile, Brasil y México durante el último cuarto de siglo.

El Profesor Maurice Halperin actualmente es un Profesor Visitante en la Academia de Ciencias de la URSS en donde está dedicado a investigaciones de carácter económico.

El estudio que tiene este pequeño libro, no obstante su brevedad es uno de los más completos sobre el actual panorama económico de la América Latina. Tanto las cifras como las observaciones y las inferencias lógicas que contiene, son de un inapreciable valor para los estudios de los problemas de nuestro Continente. Por eso pienso que prestará un gran servicio a quienes se dedican al examen de los grandes problemas de nuestro tiempo en el vasto territorio de los países semicoloniales del Hemisferio Americano.

México, D. F., agosto de 1961

VICENTE LOMBARDO TOLEDANO

Introducción

La América Latina está atravesando actualmente su tercera gran crisis económica del siglo XX. En general, las dificultades actuales pueden ser atribuidas a la excesiva vulnerabilidad hacia factores externos de una economía que depende de la exportación de materias primas y de la importación de productos manufacturados. En este sentido es la clásica crisis del subdesarrollo neocolonial, como sucedió con el colapso del comercio internacional durante la guerra mundial de 1914 a 1918 —primera crisis— y con la depresión mundial al comienzo de la década del 30 —segunda crisis.

La disminución actual de la actividad económica asumió, sin lugar a dudas, proporciones de crisis a principios de 1958. Aunque en algunos aspectos aún no ha alcanzado la intensidad de la segunda crisis, persiste con tendencia a profundizarse al entrar en su cuarto año. Al mismo tiempo, algunos aspectos de la crisis actual la distinguen de las anteriores, imprimiéndole un sello especial.

En primer lugar, si bien como las crisis anteriores fue motivada por factores externos, esta crisis ha sido más sensible a los descensos y menos a las alzas de los movimientos cíclicos de las economías de los países capitalistas industrializados. El descenso de los precios de las exportaciones de Latinoamérica precedió a la recesión de 1957-58 en los Estados Unidos, y ésta condujo, a su vez, a nuevas mermas en las ganancias por concepto de exportaciones de América Latina. Sin embargo, la tendencia al descenso continuó después de la recuperación de los Estados Unidos (antes de la nueva recesión comenzada a finales de 1960).

y a pesar del alto nivel constante de la actividad económica en los principales países industrializados de Europa Occidental.

En segundo lugar, hay muy pocas perspectivas de que los mercados normales de Latinoamérica puedan proporcionar en un futuro próximo suficientes ganancias por concepto de exportaciones como para restablecer la economía al nivel anterior. Como después de un exhaustivo análisis a largo alcance, declara la CEPAL (excluyendo el factor de una depresión mayor en los Estados Unidos o en Europa Occidental): "La perspectiva de aumento de las exportaciones... es tan pequeña que apenas excede el crecimiento demográfico probable". Este estudio prevé un ritmo de desarrollo que en el mejor de los casos sería un poco más de la mitad del registrado antes de la presente crisis y produciría extraordinarias presiones sobre la posibilidad de estructurar la economía y sus mecanismos de desarrollo.

En tercer lugar, el debilitamiento general de los sistemas mundiales coloniales y neocoloniales, combinado con la expansión económica del sistema mundial socialista, presenta nuevas oportunidades para contrarrestar las presiones externas, políticas y económicas, que se ejercen sobre Latinoamérica para impedirle tomar medidas en defensa de sus economías nacionales. De particular importancia es la disponibilidad de mercados y recursos económicos en los países socialistas, los cuales pueden ser utilizados para lograr una efectiva solución de la crisis económica presente.

De aquí que mientras la primera y la segunda crisis económicas latinoamericanas crearon la necesidad y las condiciones para cambios económicos y político-sociales limitados dentro del sistema existente de dependencia neocolonial, la crisis presente parece estar desarrollándose bajo condiciones que requerirán y, al mismo tiempo, permitirán la eliminación de la propia dependencia en un período de tiempo relativamente corto. Los acontecimientos recientes en Cuba apoyan estas perspectivas y nosotros estimamos que los factores que causaron el rompimiento de Cuba con el sistema de dependencia neocolonial no constituyen una excepción. Esto puede demostrarse examinando los antecedentes de la presente crisis, por ejemplo, la actuación global de la economía latinoamericana en el pasado reciente.

1.— El "florecimiento óptimo" de la economía latinoamericana

Por más de una década después del fin de la segunda guerra mundial (en términos generales, de 1945 a 1957), la actividad económica de Latinoamérica en su conjunto mantuvo el mayor ritmo de expansión registrado en la región.

Para situar este período en su marco propio, deben formularse dos observaciones preliminares. La primera es que el nivel de partida del movimiento ascendente de la economía era relativamente elevado en la región y sustancialmente más alto que el nivel de desarrollo existente en las áreas dependientes de Asia y África. No solamente había tenido lugar una recuperación sustancial, después de la catástrofe de comienzos de la década del 30, sino que también en las repúblicas de Latinoamérica más desarrolladas y pobladas y con mayor capacidad productiva, se produjo un proceso considerable de sustitución de importaciones. Así, la industria de elaboración que antes de 1930 representaba una pequeña proporción en la producción global de Latinoamérica, alcanzó a fines de 1945 una equivalente al 65% de la contribución de la agricultura al producto bruto y fue, a su vez, considerablemente mayor que la contribución de la industria minera.

El segundo punto, que debe ser señalado, es que durante el período que consideramos prevalecieron condiciones externas excepcionalmente favorables. El impulso inicial para la expansión económica fue la acumulación de divisas registrada en Latinoamérica durante la segunda guerra mundial. Sin embargo, el auge económico fue estimulado principalmente por los gastos de reconstrucción, resarime y satisfacción de demandas postpuestas en los principales países capitalistas al final de la guerra. Los medios externos mediante los cuales Latinoamérica hubiera podido mantener su ritmo de expansión, se restringieron fuertemente

al terminar los reajustes de postguerra y, a partir de ese momento, comenzó a manifestarse la crisis actual.

Desde este punto de vista, es particularmente interesante la evaluación de la experiencia económica de este período. Dado el nivel relativamente elevado existente al inicio del mismo y las oportunidades excepcionales de que se dispusieron, el desarrollo alcanzado puede representar algo así como el "floreamiento óptimo" de la economía latinoamericana, funcionando de manera tradicional. Por tanto, la cuantía en que ese "floreamiento" de la economía dejó de satisfacer las necesidades de desarrollo de la región, nos permitirá estimar las dimensiones reales de la crisis actual.

De acuerdo con los datos recopilados por la CEPAL (ver el cuadro que sigue), el promedio acumulativo anual real de aumento del producto bruto de la región, fué de un 5% para el período de 12 años. Si excluimos los años de 1956 y 1957, durante los cuales la expansión de postguerra comenzó a ser menor, el índice fue de 5.2%. Para nuestros propósitos la diferencia no es importante: incluso el índice menor alcanza o excede los de un cierto número de países industrializados en Europa Occidental y ciertamente excede el de los Estados Unidos para el mismo período.

LATINOAMERICA: El producto bruto y otros datos, 1945-57

(miles de millones de dólares de 1950)
Cifras redondas.

Año	Producto Bruto	Consumo	Inversión	Exportación bienes brutos y servicios	Importación bienes brutos y servicios	Población (millones)
1945	30.2	23.2	4.0	6.7	3.6	133.5
1946	32.8	25.1	5.0	7.4	4.3	141.6

1948	36.4	28.7	6.8	7.5	6.6	148.2
1949	37.6	30.1	6.4	6.9	5.9	151.8
1950	39.3	32.1	6.6	7.2	6.1	155.4
1951	42.1	35.1	7.4	7.1	7.5	159.2
1952	43.0	35.5	7.6	6.7	7.0	163.0
1953	44.7	36.1	7.6	7.8	6.9	166.9
1954	47.3	39.1	8.2	7.7	7.3	170.9
1955	50.0	41.0	8.6	8.4	8.0	175.1
1956	51.4	41.4	9.1	9.2	8.2	179.4
1957	53.8	43.8	10.3	9.3	9.6	183.8

Es cierto que por haber aumentado la población de Latinoamérica a un promedio anual de 2.5%, el índice del aumento anual del producto bruto per capita fue de solamente 2.7% para la "década dorada" y de 2.5% para el período de doce años. Sin embargo, aún esta última cifra es mayor que el histórico 2% de aumento anual del producto bruto per capita en los Estados Unidos, aunque es a su vez varias veces menor que el de los países socialistas.

Es más importante el hecho de que el 2.5% represente probablemente más del doble del promedio anual "histórico" de desarrollo en Latinoamérica. Aunque no existen datos suficientes para establecer esta última afirmación en cuanto al conjunto de la región, puede suponerse que de 1900 a 1929 ningún país de América Latina superó el ritmo de desarrollo de Argentina, pues se estimó, como promedio, en un 1.2% per capita anual. En el caso de México, por ejemplo, se cree que entre 1803 y 1934 no se registró prácticamente ningún incremento en los ingresos per capita.

De lo antes expuesto puede inferirse la conclusión de que para el conjunto de la región el período que estamos examinando fue un período de incremento poco corriente de la actividad económica, o, más precisamente, de un aumento poco habitual del PBN, concepto que, de acuerdo con los usos oficiales en Latinoamérica y en las Naciones Unidas, incluye la producción de bienes y la de servicios, cuyo ritmo de aumento es comúnmente definido como desarrollo. Más adelante examinaremos hasta qué punto se puede confiar en este concepto para medir el desarrollo económico en Latinoamérica. Por el momento consideraremos los factores externos que estimularon durante este período la elevada producción de bienes y de servicios en esta región.

2.— Los estímulos externos en la expansión económica de Latinoamérica

El comercio exterior ha ejercido siempre una influencia predominante sobre las fluctuaciones cíclicas de la economía latinoamericana. Así en 1932, en el clímax de la gran depresión, las exportaciones de la región disminuyeron en un 65% en relación con 1929, mientras las importaciones disminuyeron en un 75%.⁹ No obstante, una comparación entre el nivel del comercio exterior en este año de crisis y el período que estamos analizando, mostraría un cuadro deformado de su importancia en la expansión económica de 1945-57. De ahí que los datos de 1934-38, cuando se había producido un grado de recuperación aceptable, nos darán una base mejor para establecer comparaciones. Durante este último período el promedio anual de exportaciones e importaciones en conjunto llegaron a 3,500 millones de dólares, cifras redondas, o 5,250 millones en dólares de 1950.⁹

Si consideramos nuestra tabla estadística, podemos ver que hacia 1947, cuando la tendencia a la expansión del comercio exterior en el período de la postguerra ya se había desarrollado completamente, el total de las exportaciones y de las importaciones llegó a poco más de 14,000 millones de dólares de 1950, o sea, un aumento de más del 170% sobre el promedio anual de 1934-38. Además, de 1945 a 1955, el poder adquisitivo de las exportaciones latinoamericanas aumentó en un promedio anual de 5.4%, o sea ligeramente más que el ritmo de crecimiento del producto bruto de la región.¹⁰ Es evidente que habían llegado mejores tiempos para Latinoamérica.

Es necesario un análisis posterior sin embargo, para determinar el papel desempeñado por el comercio exterior en la experiencia económica de la región después de la segunda guerra mundial. Si retornamos al período relativamente preindustrial anterior a la gran depresión de 1925-29, nos encontramos con que el coeficiente de importaciones, es decir,

el valor de las importaciones en tantos por ciento del producto bruto nacional, se mantuvo en un 30.2%. En el período correspondiente de 4 años en la década siguiente, cuando el comercio exterior de Latinoamérica había vencido los efectos de la depresión, el coeficiente de importaciones no alcanzó su nivel anterior y se mantuvo en un 16.6%. Esta nueva relación, mejor incluso desde el punto de vista del desarrollo económico, entre el PBN y el comercio exterior, reflejaba el progreso alcanzado en la producción local de bienes de consumo, especialmente en los países más avanzados como Argentina, Brasil, México y Chile.

Cuando durante la segunda guerra mundial las importaciones fueron de nuevo drásticamente reducidas, se registró un ímpetu adicional para la expansión de la industria ligera. Como consecuencia, al comenzar el período de la postguerra la estructura de la economía era tal, que a pesar de la extraordinaria mejoría del comercio exterior, en comparación con el período de recuperación posterior a la depresión de 1930, la relación entre el PBN y las importaciones no volvió al nivel de 1925-29. En su lugar, como indican las cifras de nuestra tabla estadística, las importaciones fluctuaron alrededor del 16% del PBN, manteniéndose, por tanto, al mismo nivel relativo de 1934-39.

A primera vista esto pudiera indicar una disminución de la importancia del comercio exterior en la provisión de los medios para la reciente expansión de la actividad económica en la América Latina. No obstante, un examen más detenido nos demuestra que lo cierto es justamente lo opuesto. La evidencia más palpable se advierte en la adquisición de maquinaria y equipos capaces de producir una expansión en las exportaciones de materias primas, así como de aumentar la producción de la industria de elaboración. En este sector de inversiones, obviamente estratégico, que representa aproximadamente el 25% de las inversiones totales, la producción local suministró menos del 10% de los productos obtenidos. El resto fue comprado en el extranjero y representó cerca del 33% del valor total de las importaciones.

Así es claro que el cambio en la estructura de las importaciones de Latinoamérica devino un factor nuevo y crucial tendiente a perpetuar su dependencia del comercio exterior. Antes de 1914, por ejemplo, los textiles solamente constituían más de la mitad de las importaciones.¹¹ Durante los años 30, aunque se produjo un aumento notable en la pro-

porción de bienes duraderos y de capital, la mayoría de los bienes importados eran todavía bienes de consumo y materiales de construcción. Sin embargo, después de 1945 el balance cambió definitivamente. Si a la maquinaria y a los equipos añadimos productos semielaborados y materias primas industriales, como varios tipos de acero, productos químicos, caucho, etc., y combustibles, nos encontramos con que para 1955, cerca de las dos terceras partes de las importaciones totales de la región, consistieron en medios de producción y suministros para los mismos.¹¹ En resumen, las exportaciones de Latinoamérica, que básicamente determinan su capacidad para importar, fueran indudablemente el elemento decisivo para mover la expansión económica de 1945 a 1957.¹²

El carácter único de la situación externa favorable que influyó en la actividad económica de este período, requiere algunos comentarios adicionales para ser bien comprendido. El gran aumento de la capacidad de importación de Latinoamérica no se debió solamente a la demanda excepcional de postguerra de que disfrutaron sus exportaciones, sino también a otro factor relacionado con ello, aunque menos corriente.

En común con todas las otras regiones dependientes, el comercio internacional de Latinoamérica ha sido adversamente afectado por la tendencia histórica hacia una creciente diferencia entre el pequeño aumento de precio de sus exportaciones de materias primas y el aumento mayor de los precios de los productos elaborados que importa. Como resultado, con fluctuaciones considerables de año en año y de un país a otro, dependiendo de los productos de exportación y de la fluctuación de la estructura de las importaciones, para la región en conjunto, a largo plazo, las condiciones del comercio exterior se han ido deteriorando.¹³

Sin embargo, un extraordinario cambio de esta tendencia tuvo lugar para el conjunto de la región y en todas las repúblicas consideradas por separado: menos Cuba y Argentina, en la década siguiente a la segunda guerra mundial. En ocho de las repúblicas, incluyendo Brasil, Colombia y Chile, los términos del comercio exterior durante los períodos de 1947-1949 y 1954-56, mejoraron de un 45% a un 100%.¹⁴ Como resultado, más de la mitad del aumento del poder adquisitivo de las exportaciones de Latinoamérica se debió a los efectos de las mejores condiciones del comercio exterior y el resto

correspondió a un aumento en el volumen de las exportaciones.¹⁵

Saldría de los límites de esta discusión examinar en detalle las fluctuaciones y la complejidad de los factores que afectaron la evolución de los precios de las exportaciones y de las importaciones principales de la región. En el caso del café, por ejemplo, que para más de la tercera parte de las repúblicas es uno de los principales productos de exportación, una aguda, aunque pasajera disminución en la producción brasileña causada por condiciones atmosféricas adversas, elevó los precios y estimuló una serie de compras especulativas. Con respecto a las importaciones, la tendencia hacia la sustitución de bienes de consumo por bienes de capital jugó un papel importante, ya que los precios de estos últimos tendieron a aumentar más lentamente que los precios de los bienes de consumo.¹⁷ Además, los precios de los productos elaborados de Europa Occidental tendieron a declinar durante cierto período debido a la devaluación de la libra esterlina y otras divisas y en algunos países tuvo lugar cierto cambio hacia fuentes de abastecimiento europeas.

No obstante, el factor principal en la mejoría de los términos del intercambio fue el aumento de precio de las exportaciones de Latinoamérica, motivado por la demanda extraordinaria causada por la situación de la postguerra a la cual nos hemos referido. De manera que fueron circunstancias especiales, en lugar de fuerzas económicas básicas, las que produjeron la variación en los términos del comercio y el mantenimiento de la tendencia durante un período tan largo. Cuando estas circunstancias desaparecieron, la tendencia histórica a la decadencia volvió a manifestarse¹⁸ y llegó a su fin este período de "florecimiento óptimo" de la economía. En 1958 el aumento per cápita del PBN fue solamente de 0.5%, descendiendo a 0.3% y en 1959 y a un nivel probablemente aún más bajo en 1960.¹⁹

3.— Otras consideraciones acerca del tema principal

Examinando ahora la actividad económica propiamente dicha, recordemos que para Latinoamérica, en conjunto, el promedio anual de aumento del PBN per cápita, fue de 2.7% para la década posterior a la guerra y de 2.5% para los 12 años. Considerando las repúblicas por separado, la gran mayoría compartió esta expansión en un grado mayor o menor y relativamente se registraron pocas variaciones en los niveles comparativos de sus respectivos PBN per cápita, sin embargo debe examinarse la tendencia en algunos de los países más importantes.

El ritmo de desarrollo de México, aunque aminoró después de 1950, fue aproximadamente el mismo que el del conjunto de la región durante el periodo de 12 años. En 1957 el PBN per cápita de México alcanzó 230 dólares, siendo todavía menor que el nivel de 335 dólares registrado en ese año para el conjunto de la región.¹⁰

La marcha de la economía brasileña fue notablemente mejor que el promedio, con un incremento anual per cápita de cerca de 3.5%. Como resultado, durante los 12 años, el PBN per cápita relativamente bajo del Brasil mejoró suficientemente llegando a ser en 1957 aproximadamente igual al de México. El fenómeno brasileño refleja en parte la situación especialmente favorable de los países exportadores de café. Así, el aumento del per cápita de los países productores de café de Centroamérica y de Colombia fue mayor que el promedio de Latinoamérica. Esta última República, por ejemplo, registró un incremento anual per cápita de cerca del 3% entre 1945 y 1957.

En el caso de Argentina, se notó una desviación considerable del ritmo medio de desarrollo regional. Aunque de 1945 a 1948 se registró un extraordinario incremento anual per cápita de 6.4%, para el periodo de 12 años, el aumento

promedio per cápita fue solamente de 1% anual. Un factor significativo de la decadencia posterior a 1948 fue la situación desfavorable de las exportaciones argentinas de carnes y granos. Como resultado se produjo un continuo empeoramiento en los términos del comercio exterior, tendencia excepcional en la América Latina, compartida solamente por Cuba como indicamos anteriormente. Sin embargo con un PBN per cápita de 525 dólares en 1957, el nivel argentino se mantuvo muy superior al promedio latinoamericano y solamente detrás de Venezuela, país del que trataremos posteriormente.¹¹

La desviación chilena de la norma regional fue aún mayor que la argentina. De 1945 a 1955 el PBN prácticamente se mantuvo, mientras que en los años siguientes disminuyó alrededor de un 8%. En realidad, a partir de 1933 el ritmo de desarrollo no logró mantenerse al nivel del aumento de población. Así el PBN per cápita chileno que en 1945 era bastante más elevado que el promedio latinoamericano, disminuyó a menos de 300 dólares en 1957.

La experiencia chilena también es excepcional desde otro punto de vista. La economía del país se mantuvo estancada, aunque disfrutó de una mejoría sustancial en las condiciones del comercio exterior. Este fenómeno refleja en parte el fracaso de las ganancias posteriores a la segunda guerra al no lograr recuperar lo perdido después de la debacle del cobre en la depresión del 30, pero más aún refleja la disipación improductiva de los recursos adquiridos durante el periodo de bonanza posterior a la guerra.¹²

Finalmente, Cuba, duramente afectada por la caída del precio del azúcar después de la guerra de Corea y a pesar del alza de 1956-57, tampoco logró elevar su PBN per cápita durante el periodo de doce años. El PBN per cápita de Cuba, que era de 485 dólares en 1957, se mantuvo considerablemente más elevado que el promedio de Latinoamérica.

De aquí que el desarrollo extremadamente lento de la Argentina y el estancamiento de Chile y Cuba (que juntas constituyen aproximadamente el 17% de la población de América Latina) representan tendencias no comunes y, por consiguiente, su situación excepcional debe ser tenida en cuenta.¹³ Sin embargo, desde el punto de vista global, el caso de estos países no invalida el significado, cualquiera que este sea, que pueda ser atribuido a los cálculos oficiales del desarrollo de Latinoamérica en conjunto.

4.— Perspectivas de aumento aparente del PBN

Ha llegado el momento de preguntarnos, ¿cuál es el significado de los cálculos oficiales mencionados anteriormente? ¿Qué desarrollo y que tipo de desarrollo fue el alcanzado durante este histórico "florecimiento óptimo" de la economía de Latinoamérica? Comenzaremos aceptando en su valor nominal la cifra de 2.5% como promedio anual de incremento per cápita del PBN de la región. Como ya vimos, el PBN alcanzó en 1957 su cifra más alta de todos los tiempos: \$35 dólares. Si Latinoamérica pudiera recuperarse y mantener ininterrumpidamente su ritmo de desarrollo de 1945 a 1957, a partir del momento en que se produjera esta recuperación, tardaría alrededor de 55 años para alcanzar el PBN per cápita de Francia o Inglaterra en 1957 que fue de 1300 dólares. Alcanzar el PBN per cápita de los Estados Unidos en 1957, que era de 2600 dólares, demandaría cerca de 85 años.

Si consideramos las posibilidades hipotéticas de algunas de las repúblicas latinoamericanas por separado, el pronóstico no sería más alentador. Aunque Brasil, con su ritmo de desarrollo de 3.5% per cápita, estaría en condiciones más ventajosas que la mayoría de las otras repúblicas, desde el momento en que su economía se recuperara, le exigiría 45 y 65 años para alcanzar los niveles de 1957 antes mencionados. Argentina, con su ritmo de desarrollo menor que el promedio y a pesar de su base más alta, tardaría 90 años en alcanzar los niveles de 1957 de Francia o Inglaterra y 160 el de los Estados Unidos. Para alrededor de la mitad de las repúblicas, con un PBN per cápita inferior a 200 dólares y con un ritmo de desarrollo de 2.5% anual, el promedio sería de 80 y 110 años respectivamente.

Pero en este "alcanzar" a los países desarrollados debe considerarse otro aspecto. Mientras en 1940 el PBN per

cápita de Latinoamérica era un sexto del norteamericano, en 1957 la proporción había descendido a un octavo. En el caso de Argentina, de la mitad descendió aproximadamente a un quinto del nivel de los Estados Unidos.

Así, desde el punto de vista de la satisfacción de las necesidades de desarrollo de Latinoamérica, al parecer la aceleración de la actividad económica del conjunto de la región alcanzada durante el período de 1945-57, deja algo que desear. Aun si el ritmo de desarrollo de este período pudiera ser revivido —lo que es el objetivo máximo propuesto por los economistas de la CEPAL—, para unos pueblos donde las vastas mayorías no pueden satisfacer las necesidades mínimas de alimentación, vestido y alojamiento, sin hablar ya de las necesidades fundamentales de la vida civilizada, las perspectivas hipotéticas, sumamente difíciles de aceptar con ecuanimidad, aún en el más favorable de los casos, son de aplazar por medio siglo el logro del nivel de vida correspondiente a un PBN que represente solamente la mitad del actual de los Estados Unidos.

Todo esto se refiere al valor nominal del desarrollo alcanzado durante ese período de doce años. No obstante, las conclusiones reales que deben hacerse de este "florecimiento óptimo" son aún más desalentadoras. La razón es que el dispositivo convencional utilizado para medir el funcionamiento de la economía de Latinoamérica, es extraordinariamente engañoso. Exagera grandemente el nivel comparativo de desarrollo frente a los países altamente industrializados y el desarrollo real alcanzado en términos puramente regionales. Consideraremos ahora los dos aspectos engañosos en ese mismo orden.

5.— Comparación del Producto Bruto Nacional

Muchos economistas dedicados al problema del subdesarrollo, admiten que una comparación de la magnitud de los PBN de un país atrasado y de un país industrializado, es un cómputo sumamente inexacto de los niveles relativos de sus respectivas economías. No obstante, raramente se toman el trabajo de examinar cuán inexacto es este sistema. Consecuentemente, dejan de apreciar la diferencia real que los separa, que es significativamente mayor de lo que las estadísticas sobre el PBN indican.

En 1955, por ejemplo, el PBN per cápita de los Estados Unidos era ocho veces mayor que el de Latinoamérica, pero el consumo de acero per cápita, un índice básico del nivel de desarrollo económico, era dieciséis veces mayor en los Estados Unidos²¹. Una diferencia similar se observa comparando a Latinoamérica con otros países desarrollados: El PBN per cápita de Inglaterra era cuatro veces mayor, mientras el consumo per cápita de acero era nueve veces mayor. En Francia las proporciones eran de cuatro y siete, en Austria de dos y cinco²². Otros índices significativos del desarrollo económico —el consumo per cápita de energía y de cobre— coinciden más o menos con el consumo de acero²³.

Ciertos economistas que pasan por alto este aspecto prefieren otro modo de tratar la cuestión. Afirman que la conversión de las unidades monetarias de los países subdesarrollados en dólares, exagera la diferencia real entre los niveles de las economías atrasadas y las economías desarrolladas. "Las cifras de los ingresos per cápita [el producto], de los países pobres, cuando son expresadas en dólares resultan demasiado bajas; esto ayuda a explicar cómo algunas personas subsisten con un ingreso per cápita de 50 dólares al año..."²⁴. Es indudablemente cierto que los individuos con ingresos de 50 dólares al año pagan menos alquiler y la ropa y la comida les cuestan menos, pero la razón es que probable-

mente estas personas viven en una choza hecha por ellos mismos, en terreno ajeno, sin agua y servicios sanitarios, estén subalimentadas, anden descalzas y sus únicas ropas sean los harapos que cubren sus espaldas. Por lo tanto, es un hecho que "subsiste" durante un período relativamente corto, ya que su cálculo de vida sería menos de la mitad del promedio para el habitante de los Estados Unidos.

La comparación del PBN de Latinoamérica y de los países desarrollados, también es afectada materialmente por el factor de las inversiones extranjeras. Las estadísticas de Venezuela ilustran muy bien este punto. Como lo expresa W. W. Rostow, sin darle gran importancia: "Venezuela ha sido por algún tiempo una 'economía enquistada', con un índice alto de inversiones concentrado en un sector de exportación moderno, cuyo crecimiento no ha generado ningún impulso en la economía venezolana"²⁵. Examinemos esta situación más detenidamente.

De acuerdo con las estadísticas publicadas, en 1957 el sector de la minería, que en la práctica quiere decir extracción extranjera del petróleo, representaba el 34% del PBN venezolano. La proporción real probablemente es aún mayor, pero es difícil determinar cuánto de lo que figura en los capítulos de construcción, transporte, comunicaciones y "otros", es una parte de las operaciones petroleras. Una prueba adicional de la importancia del petróleo la ofrece el hecho de que la agricultura y la industria de elaboración representen el 7% y el 11% respectivamente, en el PBN venezolano²⁶. Simultáneamente, las compañías petroleras emplean menos del 2% de la mano de obra activa del país²⁷.

Las estadísticas sobre el desarrollo económico de Venezuela son de lo más impresionantes. En 1945-57 el aumento promedio del PBN per cápita fue de 4.5%, que con mucho fue el más alto de Latinoamérica. En 1957, el PBN per cápita en Venezuela era de aproximadamente 1,000 dólares, tres veces el de Latinoamérica en conjunto, incluyendo a Venezuela; dos veces el de la Argentina, que es el país más desarrollado de la región y considerablemente mayor que el de Italia. El consumo per cápita de acero de Venezuela era seis veces mayor que el promedio de Latinoamérica y aproximadamente igual al de Suiza. En 1958 el consumo per cápita de energía en Venezuela fue algo mayor que el de Francia²⁸.

Estas cifras reflejan, desde luego, las actividades de las compañías de petróleo estadounidenses y anglo-holandesas

que operan en Venezuela, pero no nos dicen casi nada acerca de la economía nacional propiamente dicha. Harvey O'Connor describe algunas de las realidades de esa economía:

"Antes del petróleo, Venezuela se alimentaba a sí misma de algún modo. Hoy produce solamente la mitad del maíz, la mitad de la carne, una tercera parte de los vegetales y los granos y la mitad de la leche que consume. Hay menos ganado que en tiempos de la Revolución de 1812... La fantástica prosperidad que ha descendido sobre Caracas es tan irreal como algo salido de Hollywood... Todo eso es solamente motivo de curiosidad para las 9/10 partes del pueblo, que vive fuera del mundo encantado del petróleo. Ahuyentados por la enfermedad y disgregados por el hambre... por lo menos 200.000 venezolanos han abandonado los campos para dirigirse a la dorada Caracas, en donde viven bajo los puentes, a lo largo de las cañadas, o en las laderas de los cerros en los irónicamente llamados 'ranchos', construidos con los desperdicios de la ciudad".

De hecho, "la economía enquistada" en Venezuela falsea seriamente las estadísticas del desarrollo de toda Latinoamérica. Por ejemplo, durante el período de cinco años de 1953-57, a las compañías extranjeras que operan en Venezuela correspondió el 23% aproximadamente de todas las exportaciones de Latinoamérica. En el año 1957 la cifra llegó casi al 23%. Con respecto a los cálculos del PBN, si quitamos a Venezuela, que representa un poco más del 3% de la población de Latinoamérica, el promedio de aumento del PBN per cápita de la región durante el período de 1950-57, se reduce aproximadamente en una cuarta parte".

Si bien es la más sobresaliente, Venezuela no es la única "economía enquistada" en Latinoamérica. Honduras, dominada por dos compañías bananeras extranjeras que, como Robert Alexander describe, "equivalen a estados dentro de otro estado", es otro ejemplo típico. Cuba, antes de la Revolución, también lo era en un grado apreciable, como declaró públicamente un reciente Embajador de los Estados Unidos en Cuba, "... hasta la llegada de Castro al poder... el embajador americano era la segunda figura de importancia en el país; algunas veces más importante aún que el Presidente". En realidad no hay prácticamente ninguna república latinoamericana en donde falte un "sector moderno de exportación" de propiedad extranjera; algunas constituyen "enquistamientos económicos" más o menos grandes pero en todos los casos sus contribuciones a los ingresos y al desarrollo económico "pertenecen más propiamente a los

países en donde las compañías están domiciliadas", que a los países en donde operan".

Unas cuantas cifras y hechos indicarán, de manera parcial, con qué estos "enquistamientos económicos" inflan el funcionamiento real de las economías nacionales de Latinoamérica. En 1957, por ejemplo, las empresas de inversión directa de Estados Unidos, que representan aproximadamente al 85% del total de las inversiones directas extranjeras, tuvieron una producción que ascendió a 8.000 millones de dólares dentro de la producción bruta de Latinoamérica, o sea más del 13% del PBN de 1957 y, sin duda, una proporción aún mayor en la producción de bienes materiales. Estas empresas exportaron fuera de Latinoamérica mercancías valoradas en casi 3.000 millones de dólares, o sea casi la mitad de todas las exportaciones de mercancías de Latinoamérica, sin incluir el comercio dentro de la región, y el 80% de las exportaciones de la región de los Estados Unidos".

Estas cifras, a su vez, indican un serio falseamiento de las ganancias reales de las economías nacionales, como resultado de los diversos tipos de utilidades extraídas por medio de las operaciones de las inversiones extranjeras. Muchas de estas remisiones de utilidades son difíciles de descubrir, pero podemos tener alguna idea de su importancia incluso si consideramos las remisiones de utilidades e intereses que se publican, por ejemplo, la salida de divisas, excluyendo amortizaciones, ascendió a 3.625 millones de dólares durante el período de 1955 a 1957, aparentemente una porción insignificante del PBN. Sin embargo, como constituyó un drenaje de divisas extranjeras, absorbió el 14% de las ganancias por concepto de exportaciones durante este período de tres años. Más aún, el promedio de absorción de divisas aumentó de manera continuada después de los años inmediatos a la guerra, cuando dicho promedio era del 10%. En términos absolutos, el drenaje se duplicó durante el período comprendido entre los años 1947 y 1957".

En vista de la decisiva importancia que la capacidad de importar tiene en la economía de América Latina, especialmente para adquirir los medios de producción, esta pérdida de medios económicos no es tan pequeña como parece. En 1957 equivalió aproximadamente al 70% del costo de toda la maquinaria industrial importada durante el año, solamente un poco menos del 70% de las inversiones de ese año en ese sector clave".

6.— Las realidades del desarrollo económico en Latinoamérica

Retornando al segundo aspecto de la disparidad entre las realizaciones aparentes y reales del desarrollo alcanzado por lo que hemos definido como el "florecimiento óptimo" de la economía latinoamericana, recordemos que el concepto oficialmente empleado para el PBN en la apreciación del desarrollo, incluye bienes y servicios. Sin discutir si es un concepto válido en el caso de un país altamente industrializado como los Estados Unidos, es sin lugar a dudas sumamente equívoco cuando se aplica a una economía subdesarrollada.

Por su misma definición, una economía tal es primaria y básicamente deficiente en producción, es decir, tanto en capacidad productiva como en la producción real de productos agrícolas e industriales, que combinados determinan la capacidad física de un país para mantener un determinado nivel de vida. Para una economía subdesarrollada, sólo la producción de bienes materiales puede tener alguna significación en cuanto al desarrollo. Ciertamente, para una región como Latinoamérica, un aumento en el número de salones de belleza o cabarets o en la cuantía de la policía u otras actividades que se enmarcan como servicios —sin importar su contribución a las alegrías o las penas que proporcionen a uno u otro sector de la población— no puede representar desarrollo económico. En realidad, como Paul Baran sugiere con respecto a la mayoría de los países —y nosotros incluimos a Latinoamérica dentro de esos países— lo opuesto es lo indudablemente cierto. Los servicios absorben capital y otros recursos desesperadamente necesarios para la producción y de esa forma retardan el desarrollo económico.

El grado en que los servicios inflan el PBN de Latinoamérica se revela en un examen de sus componentes. En 1956-57, sus proporciones respectivas (en porcentajes redondeados) dentro del total fueron las siguientes:

Agricultura	23.5	
Industria	20.0	
Construcción	3.5	
Minería	5.0	
(Sub-total de la producción)		52.0
Comercio y Finanzas	17.0	
Otros servicios	15.0	
Gobierno	7.5	
(Sub-total de servicios)		39.5
Transportes y Comunicaciones	8.5	8.5
	100.0	100.0

De manera que en números redondos, ligeramente más del 50% del PBN latinoamericano está claramente constituido por la producción de bienes materiales y alrededor del 40% por servicios. El resto —comunicaciones y transportes— está constituido por ambos y no puede ser clasificado sin un análisis más detallado. No obstante, para nuestro propósito no se requiere una apreciación más detallada. Es suficiente con hacer notar que los servicios probablemente constituyen casi la mitad del PBN de la región. Aún más, para toda la región y para la mayoría de las repúblicas por separado, durante 1945-57 hubo poca variación en la relación entre los servicios y la producción en el PBN. Los servicios per cápita aumentaron en un promedio anual prácticamente idéntico al del PBN. Consecuentemente, cerca de la mitad de la expansión económica de 1945-57 no contribuyó ni al desarrollo de Latinoamérica ni a su capacidad de desarrollo.

Volviendo a la producción de bienes materiales, se deduce que, en conjunto, también aumentó aproximadamente en el mismo nivel que el PBN. De aquí que pueda argumentarse que aunque el PBN exagera grandemente las dimensiones del desarrollo real en términos absolutos, en este sentido, indica de manera precisa los adelantos relativos en la producción material y, por tanto, es una apreciación razonable del índice real de desarrollo. Sin embargo, no solo el índice sigue siendo insatisfactorio, como ya hemos visto, sino que resulta mucho más inadecuado de lo que parece a primera vista.

Ello estriba en que la valoración del PBN en Latinoamérica, y en las regiones subdesarrolladas en general, es aún más complicada por el comportamiento desigual de los principales sectores de la producción y por consideraciones

cuantitativas especiales. Es fundamental saber no solamente cuánto producción, sino también qué clase de producción, para comprender el proceso de crecimiento de una economía débil y falseada. Por ejemplo, un aumento en la producción que refleje la expansión del monocultivo o la explotación extranjera de los recursos naturales o la elaboración de artículos de lujo para el consumo doméstico, figurarían siempre como contribuciones al desarrollo económico en cualquier cómputo estadístico. Sin embargo, desde el punto de vista de la única clase de desarrollo que tiene sentido para un país subdesarrollado, las resultantes principales de tal aumento pudieran muy bien ser desfavorables. Por esta razón debemos examinar algunos aspectos salientes del desarrollo en los principales sectores de la producción del PBN.

a. El sector agrícola.

El aumento promedio anual per cápita de la producción agrícola en Latinoamérica en 1945-57, fue solamente de 1.5%. El índice fundamental de desarrollo en este sector sería la producción de alimentos para el consumo, pero éste aumentó a un ritmo aún menor que los cultivos para la exportación. En todo caso, el promedio general de 1.5% no bastó para mantener el nivel per cápita de producción anterior a la guerra, tanto de la agricultura en su conjunto, como de la producción de alimentos considerada separadamente. La disminución per cápita de la producción fue sustancial durante la mayor parte del período. Solamente en 1956/57, el mejor año del período, el nivel se acercó al de 1933/34 — 1937/38**.

Para una región en la que, como Preston James dice sin rodeos, "podemos afirmar que una gran parte de la población está sufriendo hambre"¹⁷, este record no representa desarrollo en ningún sentido. Es más bien una afirmación de la agravación de la crisis permanente basada en el sistema conocido y profundamente asentado del monopolio feudal y neo-feudal sobre la tierra. Todas las estadísticas disponibles apuntan hacia una concentración continuada y probablemente ascendente de la propiedad sobre la tierra en los años recientes. Un estudio de Moacyr Paixao demuestra que en el Brasil, poco más del 3% de los propietarios están en posesión de más del 62% de la tierra arable, mientras que el 85% de los campesinos posee menos del 17% de la tierra. La situación en Cuba, antes de 1959, era parecida: menos del 1.5% de las empresas agrícolas poseían el 47% de las

tierras, mientras el 70% de las propiedades ocupaban poco más del 11% de la tierra**.

Aún en México, en donde una reforma agraria extensa; pero solamente efectiva en parte, había tenido lugar antes de 1940, un nuevo proceso de concentración de la tierra comenzó después de aquel año. De acuerdo con Luis Yáñez Pérez, hacia 1950 alrededor del 50% de las tierras cultivadas estaban en posesión del 13% de los cultivadores, mientras 708 grandes empresarios obtenían el 35% del total de los ingresos agrícolas de la república¹⁸.

Hacia 1955, de acuerdo con un cálculo semioficial mexicano, el sector privado agrícola, en contraste con el sector comunal creado por la reforma agraria, se había expandido de tal manera que "podía ser aún mayor que las propiedades privadas en 1930"¹⁹, es decir, antes de que se distribuyeran la mayoría de las tierras como consecuencia de la reforma agraria. El hecho de que muchas de las nuevas grandes propiedades sean empresas capitalistas relativamente eficientes, no altera el significado de la "contra-reforma" ya que éstas se han dedicado casi exclusivamente a producir productos de exportación, emplean mucho menos obreros de los que de otra forma pudieran subsistir de la tierra y de ahí resulta que retardan la producción desesperadamente necesaria de comestibles para el mercado interno y agravan la seria situación de desempleo agrícola.

Para el conjunto de Latinoamérica, Otto Feinstein resume de manera conservadora la situación actual de la posesión de la tierra y su utilización como sigue: "la distribución de la tierra está hecha de tal manera que una proporción infinitesimal de los clasificados como propietarios legales de la tierra posee una vasta mayoría de la misma. Menos del 5% de los terratenientes posee usualmente más del 50% de la tierra. Esto no sólo significa concentración de la tierra en grandes propiedades, usualmente incapaces de financiar su modernización, sino también que casi todos los otros propietarios poseen usualmente parcelas demasiado pequeñas para una producción racional"²⁰.

A esto hay que añadir solamente que sin una revolución agraria —no una mera reforma— que haga posible la asimilación de la técnica del siglo XX en la producción agrícola, cualquier florecimiento óptimo o de otro género de la economía latinoamericana, es incapaz, por su índole, de satisfacer las necesidades de desarrollo de la región.

b. El sector industrial.

Aunque el estancamiento de la agricultura y, en particular, de los productos alimenticios, reduce considerablemente la significación del aumento total en la producción de bienes materiales, el hecho de que la producción de la industria de elaboración aumentó a un promedio anual de 3.2% per cápita —más del doble del aumento de la agricultura— el hecho aportó algo sustancial, tanto cualitativa como cuantitativamente al desarrollo material alcanzado durante este período.¹¹ Un resultado es el cambio que se operó en la distribución por sectores del PBN de Latinoamérica. En 1945 la industria de elaboración y la construcción representaban el 17% del PBN y la agricultura el 26%, mientras que en 1957, como ya hemos indicado, la participación de la industria de elaboración y de la construcción juntas igualaron la de la agricultura, representando cada una el 23.5%.¹²

Si consideramos los países separadamente, encontramos que los incrementos relativos en el sector de la industria de elaboración, fueron relativamente más pronunciados en las repúblicas menos industrializadas, aunque al mismo tiempo, al fin del período, la agricultura aún mantenía su posición predominante. Así, en Colombia, por ejemplo, el sector agrícola descendió del 45 al 31% del PBN, y aún esta proporción superaba la aportación de la industria de elaboración. El modelo en Brasil, —que en este aspecto representó una excepción entre los cuatro países de mayor producción industrial— fue el mismo que en Colombia: en 1957 el sector agrícola aún era el predominante. En cuanto a Argentina, Chile y México, donde la industria había sobrepasado ligeramente a la agricultura en 1945, el cambio registrado en la importancia relativa de dichos sectores fue insignificante.¹³

Mientras que para las economías subdesarrolladas del conjunto de Latinoamérica la relativa industrialización indicada por los cambios operados en esos dos sectores del PBN, tiene algunas implicaciones de desarrollo positivo, el grado de desarrollo industrial alcanzado es exagerado por muchos de los resúmenes estadísticos. Por ejemplo, nos encontramos que una proporción sustancial de lo que es clasificado como actividad industrial —aún en las repúblicas más desarrolladas— continúa técnicamente al nivel de las operaciones de una herrería rural.

La situación en Perú, sobre la cual pueden hallarse estadísticas recientes y bastante numerosas, puede ser conside-

rada típica para la mayor parte de Latinoamérica. Desde el punto de vista del desarrollo industrial en general, Perú tiene una situación ligeramente mejor que la media entre las 20 repúblicas y su PBN y su desarrollo industrial en los últimos años se acerca al promedio de la región. Además, Perú posee una moderna fundición de hierro y acero.

En 1955, ligeramente más del 80% de la mano de obra industrial, incluyendo artesanos, trabajaba en talleres que, con un promedio de menos de 14 obreros, y probablemente la mitad de ese número, producían el 40% de los productos elaborados del país. En el caso del Perú es difícil hablar de progresos serios industriales por otra razón: de 1945-55 hubo una disminución en la participación relativa de la industria local en los suministros totales de productos elaborados.¹⁴

Si consideramos ahora el aumento de la producción de bienes de capital en Latinoamérica¹⁵, aparece que ha sido más sustancial de lo que realmente fue, debido en parte, a la base tan baja de que se partió. En vista de la complejidad de la producción industrial y de las diferencias en terminología y otros criterios estadísticos usados por las distintas repúblicas, es difícil determinar la relación entre la producción de bienes de capital y bienes de consumo, elemento de bastante importancia para apreciar el nivel de madurez industrial. No obstante, podemos obtener un cálculo aproximado en el realizado por las Naciones Unidas de 1954. De acuerdo con este cálculo, basado en estadísticas de 6 países —Argentina, Brasil, Colombia, Chile, México y Venezuela— que representan el grueso de la producción industrial de Latinoamérica, "las industrias de bienes de capital... representan no más del 15% de la producción industrial total de Latinoamérica".¹⁶ Probablemente este porcentaje fue mayor en 1957, aunque quizá no mucho.

Al mismo tiempo, una considerable disipación improductiva de la producción de bienes de capital limita su importancia como índice del desarrollo económico básico. En 1945-57 —para toda la región y prácticamente todos los países por separado—, más de la mitad de las inversiones fijas de capital se orientaron hacia "edificaciones y construcciones", el mayor porcentaje del cual se concentró en "residencias" que en Latinoamérica son en abrumadora mayoría casas muy lujosas, una importante mercancía de la lucrativa especulación urbana.¹⁷

Entre las repúblicas más activas industrialmente, se ha prestado una justificada atención al Brasil. En Brasil la producción de lingotes de acero se quintuplicó en 10 años y el valor de la producción de bienes de capital aumentó con una rapidez que casi triplica a la de bienes de consumo. No obstante, considerando la producción industrial en conjunto, los cambios estructurales resultantes no han sido tan espectaculares como los acontecimientos parecen indicar.

Aunque el valor de la producción de bienes de capital se elevó de alrededor de un cuarto a un tercio del total de la producción de la industria de elaboración, en menos de una década, este éxito está seriamente afectado por el hecho de que la producción de maquinaria, en 1959, representó menos del 3% del valor total de la producción industrial.¹² Operando en una economía plagada de persistentes y agudas deficiencias de energía y transporte —característica prácticamente común a toda América Latina— sin capacidad reproductiva, produciendo exclusivamente para el mercado interior y dependiendo de las ganancias por concepto de exportaciones de café y de inversiones directas de capital extranjero, para obtener bienes de capital y varias materias primas, la industria brasileña ha aumentado la vulnerabilidad de la economía ante factores externos, sin lograr los medios para una industrialización básica.

La industria argentina, tradicionalmente la más fuerte de Latinoamérica en términos de producción per cápita, presenta características estructurales similares a las del Brasil. La producción de maquinarias y equipos aumentó en más del 300% entre 1937-38 y 1955, mientras su participación relativa en la producción industrial se elevó del 3.7 al 6.1%. Sin embargo, reparaciones y reposiciones de piezas representaron el 40% de este total, como resultado de lo cual sólo el 60% de la producción en este sector representó un incremento de las existencias de maquinaria y equipos, de lo cual, a su vez, el 60% se concentró en facilidades de transporte.¹³

La deficiencia fundamental del desarrollo industrial en Argentina y Brasil, prevalece sobre toda la región. Es resumida por el hecho, previamente señalado, de que al fin de un período de 12 años de intensificación de la actividad industrial —que culmina la fase moderna de un proceso que comenzó con la primera guerra mundial— Latinoamérica todavía dependía de las importaciones para más de 90% de sus necesidades en maquinarias y equipos.

Debe mencionarse también un factor adicional en relación con el problema de los "enquistamientos" que hemos abordado, pero que también complica la valoración del desarrollo de Latinoamérica. La gran mayoría de las empresas modernas de elaboración de la región son de propiedad extranjera. Las inversiones privadas directas de los Estados Unidos en este sector, más que se duplicaron durante el período 1945-57 y, en 1959, tenían un valor en contabilidad de aproximadamente 1.400 millones de dólares, mayor que la inversión en cualquier otro sector con excepción del petróleo, y representaban cerca de la sexta parte del total de las inversiones privadas directas de los Estados Unidos en Latinoamérica.

La mayor parte de estas inversiones se ha dirigido hacia la industria pesada y hacia la industria alimenticia, y el 70% se ha concentrado en Brasil, México y Argentina. Solamente Brasil ha recibido más del 30% del total.¹⁴ Se estima que dentro de una persistente tendencia a la expansión, en 1957 la participación privada extranjera (Estados Unidos y Europa) en las inversiones en las industrias del Brasil, representó el 37% de total.¹⁵

El impacto de esta situación en el desarrollo industrial y económico de América Latina en términos generales es, por lo menos, contradictorio. De una parte, existe una producción nueva con sus correspondientes efectos multiplicadores. Al mismo tiempo, esto no se puede considerar completamente beneficioso ya que mucha de esta producción consiste meramente en el montaje de piezas importadas y también depende de materias primas del exterior.

De otra parte, la capacidad de expansión de las empresas extranjeras a través de la reinversión de los beneficios está limitada a largo plazo por las posibilidades de su remisión. De aquí que mientras mayor sea la expansión, mayor será la exportación eventual de capital e ipso facto la decapitalización creciente de las seriamente subcapitalizadas economías latinoamericanas. Como muy bien dice el economista brasileño Caio Prado (hijo), cualquiera que sea el estímulo inicial para el desarrollo provisto por las fábricas propiedad de extranjeros, "con el tiempo se transforma en una obstrucción".¹⁶

Una observación final puede ser hecha para confirmar las limitaciones del desarrollo industrial de Latinoamérica. Es bien conocido que en cualquier región subdesarrollada la capacidad de la industria para absorber mano de obra es de

una importancia decisiva, tanto para la aceleración del desarrollo industrial como para el desarrollo económico en general. En este sentido anotemos que entre 1945 y 1955, la proporción de la mano de obra dedicada a la agricultura, decayó del 57.4 al 51.6%.⁴⁵ Esto representa una disminución apreciable en términos absolutos y un fenómeno asociado teóricamente con el desarrollo económico.

Para América Latina lo contrario es lo cierto. Como lo describió recientemente un funcionario de la Organización de Estados Americanos, es un círculo vicioso: la intensificación de la pobreza en los campos ha estimulado un éxodo creciente de la población rural hacia las ciudades; el nivel de la técnica agrícola ha sido demasiado bajo para compensar la pérdida de mano de obra, y el desarrollo industrial muy lento para ofrecer empleo a los campesinos desplazados.⁴⁶ De este modo, la producción del total de trabajadores dedicados a la industria y a las construcciones, aumentó solamente del 17 al 18.5% del total. Al mismo tiempo, la parte correspondiente al sector de los servicios aumentó del 23 al 27.4% o sea a más del doble del índice de la industria y la construcción.⁴⁷

En otras palabras, el grueso de la mano de obra en éxodo de la agricultura, incrementó las filas de burocratas, limpiabotas, vendedores de periódicos, sirvientes domésticos y similares, para no mencionar los desempleados. Este fenómeno explica al mismo tiempo la disparidad entre el aumento sin precedente de la población en la América Latina y la industrialización de la región que avanza mucho más lentamente.

7.— Los ingresos personales durante el periodo de "floreamiento óptimo"

Para una apreciación general de la evolución de la economía de Latinoamérica, una última pregunta debe ser formulada: ¿Cómo fueron afectados los niveles de vida de las grandes masas de población? El primer punto en el que se debe hacer hincapié es el de que de 1945 a 1957 el consumo per cápita de la región en conjunto aumentó en un 40%, en comparación con un 31% para el PBN per cápita. Este fenómeno ha sido descrito como "alentador" por los economistas de la CEPAL.⁴⁸

Sin embargo, un examen de la distribución de los ingresos creados por el PBN revela que el incremento del consumo privado —alrededor del 80% del consumo total— fue limitado estrictamente a una opulenta minoría y de ahí que, aparte de sus implicaciones sociales pueda ser caracterizado mejor como una deplorable disipación de la plus-valía. Aún aceptando que en el caso de Latinoamérica pueda ser justificado el debate entre teorizantes respecto de cuánto puede o debe ser "exprimida la población... a través de un aplazamiento de la elevación de los niveles de consumo... y utilizado para inversiones básicas, con el fin de... lograr un rápido aumento de la producción", como dice Gunnar Myrdal en otro texto,⁴⁹ existe muy poca justificación para este "exprimir el jugo" que tiene como consecuencia un superconsumo y una subinversión por parte de los que perciben las utilidades y que, consecuentemente, no ofrece ninguna perspectiva para un rápido aumento de la producción.

A pesar de que las estadísticas sobre ingresos personales están muy diseminadas y son relativamente poco exactas, todo evidencia que la significativa disparidad entre los ingresos de las clases poseedoras y la clase trabajadora en América Latina, se ha incrementado durante este periodo y, como resultado, los problemas materiales y sociales de la

pobreza durante el período de bonanza han sido iguales, si no mayores, que antes.²⁰

Esta situación la confirma la continua migración de campesinos desposeídos y la situación de hambre a la cual ya nos hemos referido. Otros síntomas han sido las vastas luchas sociales y las salvajes represiones políticas que alcanzaron un grado de intensidad y una extensión geográfica probablemente inigualada en América Latina durante cualquier otro período de alto índice de actividad económica.

Un síntoma general es el agudo encarecimiento de la vida en la mayoría de los países, que aún de acuerdo con las cifras oficiales, alcanzó proporciones fenomenales en algunas repúblicas, a pesar de la subestimación habitual y notoria de los organismos que confeccionan las estadísticas en casi todos los gobiernos.²¹ Los salarios normalmente se rezagaron y, aún en los casos en que las huelgas forzaron ajustes temporales más o menos correctos, el alza de los precios fue tan rápida, que siembre hubo un lapso de tiempo en el cual los ingresos reales de los asalariados disminuyeron.

Las tendencias fluctuaron en dependencia de los países y de los años. Las estadísticas de Argentina indican que un alza real en los salarios y los sueldos industriales durante los primeros años de la postguerra, fue seguida por una tendencia a la disminución después de 1949.²² El record no es tan claro en Brasil y en Colombia, en donde en cualquier caso "los salarios reales per cápita en la industria disminuyeron algo en los últimos años, a pesar de un aumento en la producción per cápita".²³ En general y a largo plazo, la clásica "redistribución de la riqueza" característica de la inflación prolongada y rápida, impuso su tributo a los asalariados de América Latina.

Son dignas de consideración las estadísticas chilenas sobre este punto, porque son más completas y merecedoras de confianza que la mayoría de las otras. De 1945 a 1957, la proporción relativa de los gastos totales nacionales de los consumidores, representados por los salarios y los sueldos de oficina, disminuyó en un 10%, mientras que el consumo derivado de utilidades, intereses y rentas, aumentó en cerca de un 15%. Al mismo tiempo, el hecho de que el consumo per cápita de artículos tales como carne, patatas y especialmente trigo, disminuyera sustancialmente durante el perio-

do, sugiere que la mayoría de los chilenos se empobreció, tanto en términos relativos como absolutos.²⁴

Aparentemente, en Perú, en donde una buena parte de los ingresos no se computan como salarios, las "características generales de la distribución de los ingresos no experimentó ninguna variación sustancial entre 1945 y 1955". Durante esta década, alrededor del 45% de la población total del Perú pudo satisfacer solamente las "necesidades mínimas para la subsistencia", lo cual convertido en términos monetarios, significa un consumo anual per cápita equivalente a no más de 50 dólares, meos de la tercera parte del per cápita promedio nacional.²⁵

En Venezuela, la mayor parte de los datos conocidos señalan una mayor diferenciación entre los ingresos de las altas capas y los de la mayoría. De acuerdo con un análisis, alrededor de tres cuartas partes de la población venezolana percibe menos de un tercio del enorme exceso per cápita de ingresos nacionales.²⁶ En Cuba, una sola estadística nos dice lo suficiente acerca de la distribución de los ingresos; con anterioridad a la Revolución de 1959, el promedio anual de desocupados era de un 25%.²⁷

Se puede argumentar que las estadísticas concernientes a Cuba, Chile e incluso a Argentina, carecen en cierto modo de relieve, ya que esas repúblicas experimentaron poco o ningún desarrollo en 1945-57. No se puede decir lo mismo sobre México, país sobre el cual recientemente se han publicado notables estadísticas acerca de la distribución de los ingresos.

De acuerdo con un análisis detallado y en general de orientación conservadora, de la economista mexicana Ifigenia de Navarrete, aparecen los siguientes datos reveladores:²⁸

1º De 1940 a 1950, los ingresos personales de los empresarios se elevaron del 60% al 66% de los ingresos personales en la república, mientras los de los asalariados disminuyeron de la misma forma del 40 al 34% del total.

2º De 1950 a 1957 en términos de ingresos familiares, (a) el promedio de ingresos mensuales en las familias de las capas más humildes, que comprenden el 20% de la población mexicana, fue de 22.3 dólares en 1950 y de 19.3 en 1957 —computados en pesos de 1957 y convertidos en dólares de ese mismo año— representando una declinación relativa del 6% al 4.5% de los ingresos totales y una decli-

nación absoluta del 11% (b) para la mitad de la población, incluyendo el 29% de las capas más humildes; el promedio de ingresos familiares reales fue aproximadamente el mismo en 1950 y en 1957, o sea alrededor de 28 dólares al mes —en dólares de 1957— lo cual representa, no obstante, una disminución relativa del 19 al 15.5% de los ingresos familiares totales; (c) mientras en 1950, el 70% de las familias recibieron el 31.5% de los ingresos familiares totales, en 1957 recibieron solamente el 28.5%.

Si existe alguna exageración en este estudio de la tendencia del ingreso de la mayoría de los mexicanos a permanecer estacionario o aún a disminuir, es en el sentido de subestimarla. Por ejemplo, de acuerdo con la profesora soviética M. V. Danilyevitch, los ingresos reales de los obreros industriales en México entre 1939 y 1952, mostraron una tendencia a la disminución después de 1940, de donde se deduce la sospecha de que el empobrecimiento absoluto está más difundido de lo que demuestra el análisis de la economista mexicana. Esta sospecha es apoyada por las tendencias en el consumo de alimentos per cápita. De 1934-36 a 1952-56; de acuerdo con una encuesta de las Naciones Unidas, un análisis de la información obtenible "revela la existencia de varias tendencias importantes que se han reflejado en un descenso de los niveles de nutrición".¹⁰

En todo caso no hay probablemente ninguna exageración en la conclusión general propuesta por la señora Navarrete como resultado de su estudio, afirmando que del 65 al 70% de la población mexicana no tuvo ninguna participación en los "beneficios del desarrollo económico". No se pecaría de exageración si se afirmara que las privaciones sufridas durante este período de "floreamiento óptimo de la economía" por el grueso de la población mexicana, bajo las condiciones relativamente favorables de la economía de ese país, fueron más intensas en la gran mayoría de las otras repúblicas latinoamericanas.

8.— Conclusiones:

El camino hacia el desarrollo

Ciertamente muchos círculos se han percatado de la gravedad de la presente crisis en Latinoamérica, como un desastre económico y la agudización de los conflictos políticos y sociales. Tampoco han faltado los factores, reales o imaginarios, aducidos para explicar esta situación. Sin embargo, es muy frecuente la tendencia —aún entre especialistas de alguna competencia— a conceder verosimilitud a la noción de que el desarrollo económico ha sido "rápido" en Latinoamérica, o de que "el desarrollo de América Latina ha sido impresionante", o de que Latinoamérica "ha llegado a la edad de un desarrollo económico vigoroso".¹¹ Esto, como hemos tratado de demostrar, está lejos de ser cierto, de acuerdo con toda la evidencia obtenible. Lo que hemos llamado el "floreamiento óptimo" de la economía latinoamericana se ha confundido con un funcionamiento satisfactorio.

¿Cómo resumir la evidencia? Si existe una fórmula matemática para medir y apreciar el contenido del nodesarrollo y del antidesarrollo de las actividades económicas que hemos examinado y definir con precisión el FBN real de Latinoamérica, su magnitud relativa en una escala mundial y su índice temporal de variabilidad, el autor de este trabajo no la conoce ni tiene capacidad para inventar una. Pero quizás, pidiendo prestada una frase a Joan Robinson, "no tiene objeto encerrar algo en definiciones más precisas que el sujeto al cual se aplican".¹² Nosotros podemos añadir: más precisa que los datos estadísticos escasos e imperfectos con los cuales tenemos que trabajar.

De aquí que no intentemos formular más que una conclusión general: la de que el desarrollo, tal y como ha tenido

lugar, ha sido sumamente exagerado y ha dejado de satisfacer en todos sentidos, sociales o económicos, las necesidades de desarrollo de la región. Para concretar, la característica decisiva de este desarrollo es que dejó de proporcionar o establecer las bases para un incremento suficiente y rápido en la capacidad productiva y reproductiva de las ramas de la economía cuyas deficiencias fundamentales son la causa principal de la perpetuación del subdesarrollo. Consecuentemente, la crisis actual de Latinoamérica no marca el fin de una era de progreso, sino la culminación de un proceso que agravó, en aspectos esenciales, los males crónicos inter-nos y la vulnerabilidad externa de la economía subdesarrollada y dependiente de la región.

Los factores que deforman la economía de Latinoamérica e impiden su desarrollo, están entrelazados tan estrechamente que no se pueden remediar por separado. Los problemas de la tenencia de la tierra y su utilización, de las industrias básicas y de la vulnerabilidad hacia factores externos, son facetas de un problema mayor: Las ramificaciones políticas y económicas de la función dominante en toda la región, que es la exportación de materias primas bajo términos y condiciones dictados desde el exterior.

El "florecimiento óptimo" que hemos estudiado y la crisis que engendró, indican con suficiente claridad que la economía latinoamericana ha llegado a la coyuntura donde la eliminación de la dependencia neocolonial debe ser situada en la agenda y con ello el abandono del tratamiento espontáneo del subdesarrollo. Sólo sobre esta base será posible adoptar los objetivos sociales y los métodos económicos racionales que requiere un ataque victorioso contra el subdesarrollo.²²

1.—El Mercado Común Latinoamericano. Naciones Unidas, 1959, pág. 51. Aparte del fin de la prosperidad de post-guerra, otros factores son los cambios en la producción y en la técnica, que afectan el consumo de materias primas naturales, las distintas clases de discriminaciones y competencias en los países importadores de productos latinoamericanos, el Mercado Común Europeo, competencia africana, etc.

2.—Entre 1939 y 1945, la posesión de oro y valores extranjeros aumentó en cinco veces de acuerdo con *Post War Price Relations in Trade between Under-Developed and Industrialized Countries*. Naciones Unidas, 23 de febrero 1949, pág. 114.

3.—De El Mercado Común Latinoamericano pág. 46.

4.—A partir del 1955, en los Estados Unidos el ritmo de aumento medio anual del producto per cápita ha sido de alrededor del 1%. Para una mayor comprensión del ritmo de Latinoamérica, es interesante hacer notar que en el período que estamos considerando ha sido más elevado que en el conjunto de los países subdesarrollados del Sudeste de Asia, pero mucho menor que en los países socialistas del Este de Europa, en donde, según las apreciaciones más conservadoras, el aumento per cápita de los bienes materiales, con toda seguridad ha promediado más del 7% anual en todos los países y en algunos hasta el 10%. *Economic Survey of Europe*, 1956. Naciones Unidas, 1957, Capítulo II, pág. 2). De 1957 a 1959, cuando el desarrollo de Latinoamérica se paralizó, "el promedio anual del ritmo de desarrollo llegó al 17%" [15% per cápita] para todos los países socialistas y el 10% en la Unión Soviética [9% per cápita]" de acuerdo con un informe de N. S. Jruschov, *Kommunist*, No. 1. Enero de 1961, pág. 10.

5.—Análisis y Proyecciones del Desarrollo Económico V. El Desarrollo Económico de la Argentina Naciones Unidas, 1959, vol. 1, pág. 15. El ritmo de expansión global fue de 4.5% por año, pero la inmigración elevó el aumento de la población a 3.2% anual. Ritmos de desarrollo elevados, por supuesto, se registraron en algunos países de tiempo en tiempo, pero solamente por breves períodos.

6.—Ifigenia M. Navarrete, *La Distribución del Ingreso y el Desarrollo Económico de México*, México, D. F., 1960, pág. 11.

7.—El PBN a precios de mercado, es uno de los dos sistemas más comprensibles para apreciar la actividad económica; el otro es la renta nacional, que estima la producción expresada en términos de ganancias derivadas del PBN. La CEPAL

de la cual hemos obtenido la mayor parte de nuestras estadísticas, considera que para Latinoamérica "los cambios en el producto bruto per cápita, expresado por los precios constantes de un año específico, es el método más satisfactorio y práctico para apreciar el ritmo del desarrollo económico". La CEPAL define el "ingreso bruto" para la región como "equivalente al producto bruto... más o menos las ganancias o las pérdidas netas resultantes de cambios en los términos del intercambio" y, por tanto, menos revelador del "éxito de los esfuerzos constructivos". *Economic Bulletin for Latin America*, United Nations, Vol. 1, No. 2, Septiembre 1956, pág. 30. De 1945 a 1955, el aumento promedio anual per cápita de los ingresos fue cerca del 22% mayor que el del PBN; de 1955-58 fue un 50% menor.

8.—*Economic Survey of Latin America 1948*, Naciones Unidas, 1949, pág. 190.

9.—*Study of Inter-American Trade*, Naciones Unidas, 1957 págs. 19-22; los ajustes en dólares, de acuerdo con *Statistical Abstracts of the United States*, Washington, 1959, pág. 529.

10.—*El Mercado Común Latinoamericano*, pág. 47.

11.—*Economic Survey of Latin America 1948*, pág. 45.

12.—*Ibid.*, pág. 58.

13.—Las importaciones son también financiadas con inversiones y préstamos extranjeros, pero aún durante el período en que el flujo de capital extranjero pueda temporalmente exceder el reflujo, bajo la forma de utilidades, intereses y amortizaciones, las existencias de divisas resultantes representan solamente una fracción de las divisas acumuladas mediante las ganancias de las exportaciones. Así, en el período de tres años, de 1954 a 1956, cuando el flujo de capitales extranjeros posterior a la guerra alcanzó su nivel máximo en Latinoamérica —flujo neto de aproximadamente 2,000 millones de dólares— constituyó el 8% del valor total de las exportaciones, 24,000 millones de dólares en cifras redondas.

14.—...de fines del siglo XIX a las vísperas de la segunda guerra mundial... como promedio, una determinada cantidad de bienes primarios exportados pagarían, al final del período, solamente el 60% de la cantidad de bienes elaborados que ellos hubieran podido pagar al comienzo del período". (*Post War Price Relations*, etc., pág. 6).

15.—*Economic Survey of Latin America 1957*, Naciones Unidas 1959, pág. 72 (cuadro 69).

16.—*El Mercado Común Latinoamericano*, pág. 47. En los principales países exportadores del Sudeste de Asia, en

conjunto, las condiciones del intercambio por término medio mejoraron sólo ligeramente de 1948-54, después de lo cual se produjo una tendencia al empeoramiento (*Economic Survey of Asia and the Far East 1959*, Naciones Unidas, 1960, pág. 63).

17.—El nivel de precios de los bienes de capital refleja muy probablemente el hecho de que un número considerable de las importaciones correspondió a las empresas extranjeras que operan en Latinoamérica. "Los precios en las transacciones internas de las compañías no reflejan genuinamente los precios del mercado; el embarcador y el destinatario no tienen intereses opuestos. El único efecto de los débitos cargados a las subsidiarias que operan en el extranjero por concepto de equipos... embarcados a los mismos, es un débito en los libros de contabilidad; las utilidades se cambian entre la compañía matriz y sus subsidiarias en el extranjero... El lugar donde se percibe un balance ventajoso depende de... los índices relativos del impuesto de utilidades", derechos de importación, etc. (*Post-War Price Relations*, etc., pág. 126). Ya que las operaciones de las subsidiarias o ramas de compañías extranjeras de Latinoamérica están estadísticamente integradas en el conjunto de la actuación económica de la región, en este sentido, sus manipulaciones con los precios de las importaciones no alteran el significado de los términos fluctuantes del intercambio. De otra parte, no se puede excluir el hecho de que en algunas de las repúblicas la mejoría de los términos del intercambio benefició más a los inversionistas extranjeros que a las empresas nacionales. Vea *Ibid.*, pág. 111.

18.—Los índices siguientes, aplicados al conjunto de la región, muestran la evolución de los precios de las exportaciones y de las importaciones y las condiciones del intercambio (obtenidos dividiendo los índices de los precios de las exportaciones entre los índices de los precios de las importaciones) de 1955-59:

	1955	1956	1957	1958	1959
exportaciones	101	102	101	95	90 (Oct.)
importaciones	100	104	107	106	107 (Sept.)
términos del intercambio	101	98	94	90	84

19.—Para 1958, *Economic Survey of Latin America 1958*, Naciones Unidas, 1959, pág. 71; para 1959, los cálculos de la CEPAL publicados en *Excelsior*, México D. F., Julio 5, 1960; para 1960, cálculos preliminares de "South America Economic Review" y "Caribbean Economic Review", *New York Times*, Enero de 1961.

20.—De no indicarse lo contrario, las estadísticas concernientes a los países en particular, han sido tomadas o computadas de las ediciones anuales del *Economic Survey of Latin America* de las Naciones Unidas. Las cifras del PBN, convertidas por esta publicación en dólares de 1950, han sido reconvertidas en dólares de 1957, con un incremento del 14%. Todos los aumentos o disminuciones en los porcentajes del PBN han sido calculados sobre la base de dólares de valor constante.

21.—En 1957, en adición a la Argentina y Venezuela, PBN per cápita superiores al promedio de la región, se atribuyen a Uruguay, Cuba, Costa Rica y Panamá.

22.—Ver también la nota 17.

23.—Para los países más atrasados, como Haití, Bolivia y Paraguay, cuya población en conjunto es menos del 5% del total de Latinoamérica, irregularidades y deficiencias estadísticas hacen extremadamente difícil aún adivinar a cuanto asciende el PBN per cápita. En Bolivia, p. e., no se efectuó ningún censo entre 1900 y 1950. De acuerdo con el último, el PBN per cápita de Bolivia se estimó ligeramente superior a 80 dólares. Probablemente disminuyó algo durante los últimos siete años. Vea *Análisis y Proyecciones del Desarrollo Económico. IV. El Desarrollo Económico de Bolivia*, Naciones Unidas, 1958, pág. 17.

24.—Al proponer el Mercado Común Latinoamericano como una solución urgente a los problemas de desarrollo posteriores a 1957, el desarrollo para 1975 se proyecta sobre las bases de dos ritmos de aumento anual-alternativos del PBN per cápita: 2% y 2.75%. Estos ritmos, así como el papel asignado al Mercado Común, cuando se constituya, para promover el desarrollo, parecen muy poco reales. Véase *El Mercado Común Latinoamericano*, *Passim*.

25.—La diferencia sería considerablemente mayor si las cifras de producción per cápita fueran comparadas. En 1955-56, la producción de acero en Latinoamérica fue un 40% menor que el consumo. Desde 1950, el consumo ha aumentado con mayor rapidez que la producción. (*Economic Survey of Latin America 1958*), Naciones Unidas 1959, pág. 81).

26.—El Mercado Común Latinoamericano, pág. 62. El PBN per cápita de todos los países ha sido convertido en dólares de 1955 cuando fue necesario.

27.—Durante 1955-57, el promedio anual per cápita del consumo de cobre en Latinoamérica fue de 0.4 kilogramos; la cifra comparable para los Estados Unidos fue de 7.0 kilogramos; para Inglaterra 9.0, para Francia 4.3 y para Austria 3.5 (*ibid*). El consumo per cápita de energía, en el equivalente de millones de toneladas métricas de hulla (redondeadas) fue como sigue: América Latina 600; Austria 1,900; Francia 2,400; Inglaterra 4,700; y los Estados Unidos, 7,600. (*United Nations Statistical Year-book 1959*, pág. 366 y siguientes).

28.—*Worldwide and Domestic Economic Problems and Their Impact on the Foreign Policy of the United States*, Comité de Relaciones Exteriores del Senado de los Estados Unidos, Agosto de 1959, pág. 24.

29.—*The Stages of Economic Growth. Un Manifiesto Comunista*, Cambridge, Inglaterra, 1960, pág. 24.

30.—*United Nations Statistical Yearbook 1959*, pág. 450 y siguientes.

31.—Cifras tomadas de las ediciones anuales de *Economic Survey of Latin America*, y las fuentes en las notas 26 y 27.

32.—*The Empire of Oil*, New York, 1955, pp. 266-67.

33.—*Economic Survey of Latin America 1957*, pág. 48.

34.—*Ibid*, pág. 3.

35.—Citado por Preston James, *Latin America*, New York, 1959, pág. 690.

36.—Earl E. T. Smith, citado en "Monthly Review" *New York*, Diciembre 1960, pág. 432.

37.—Citado de una publicación de 1951 de la CEPAL sobre Venezuela, por Paul Baran en su libro *The Political Economy of Growth*, New York 1957, pág. 193.

38.—*Survey of Current Business*, Departamento de Comercio de los Estados Unidos, Septiembre de 1960, pág. 22.

39.—*Ibid*.

40.—En 1957, las exportaciones totales de mercancías fueron de 7,918 millones de dólares, (*Economic Survey of Latin America 1958*, pág. 37); las exportaciones totales a los Estados Unidos fueron de 3,765 millones, (*ibid*, pág. 15).

41.—*Economic Survey of Latin America 1957*, pág. 66. Para un país dado y en un año determinado, la pérdida pudiera ser proporcionalmente mucho mayor, como en el caso del Ecuador, p. e., donde en el año 1957, el drenaje representó más del 20% de las ganancias por concepto de exportaciones. (*ibid*, pág. 76).

42.—Las remisiones brutas de intereses y utilidades fueron de 1,345 millones de dólares (Ibid. p. 66); las importaciones de maquinaria industrial se estimaron en 1940 millones de dólares (Economic Survey of Latin America 1958, pág. 52); el porcentaje de las inversiones se calcula aproximadamente igual al de 1954-56, según cálculos del Mercado Común Latinoamericano, pág. 60.

43.—The Political Economy of Growth — op. cit. pág. 19. Baran también cita la siguiente observación provechosa de Economic Survey of Europe since the War, 1953, pág. 25, publicación de las Naciones Unidas: "En los países del Este de Europa, los servicios no conectados directamente con la producción y el transporte de mercancías no se consideran como productivos y su valor se excluye de los ingresos nacionales [el producto]. Para un país pobre que está tratando de desarrollar su industria y de reducir el subempleo común en las ocupaciones de servicio, la definición marxista de renta nacional [producto] tiene naturalmente algunas ventajas sobre el concepto más amplio adaptado a las economías ricas, industrializadas, y que actualmente se aplica de manera común a los países subdesarrollados.

44.—Economic Survey of Latin America 1957, pág. 85.

45.—Ibid. y Economic Survey of Latin America 1955, Naciones Unidas, 1956, pág. 9.

46.—Economic Survey of Latin America, 1957, op. cit. pág. 85. Desde 1957 la producción per cápita ha disminuido de nuevo.

47.—Latin America, New York 1959, pág. 370.

52.—"A Changing Latin America and U. S. Foreign Policy". New University Thought, Chicago, Primavera de 1960, pág. 56.

53.—El sector minero, que es manejado casi exclusivamente por extranjeros, registró un incremento aún mayor que la elaboración, pero ello se debió casi exclusivamente a la extracción de petróleo crudo de Venezuela. Excluyendo el petróleo, el promedio de aumento per cápita sería menor que el incremento del PBN en conjunto (Economic Bulletin

for Latin America, CEPAL, Santiago de Chile, vol. 4, No. 1, Marzo de 1959, pág. 49). Incluyendo el petróleo, la participación de la minería en el PBN de Latinoamérica se elevó aproximadamente del 3.5% en 1945 al 5% en 1957.

54.—Con propósitos de comparación, es interesante hacer notar que durante el mismo período aproximadamente, en los países menos desarrollados del campo socialista, la proporción del PBN (bienes materiales) representada por la producción industrial, aumentó más rápidamente y alcanzó en general más altos niveles. Hacia 1958-59, se elevó de 40.5 a 66.6% en Rumania; 24.8 a 70.6% en Bulgaria; 9.8 a 55.7% en Albania; 28 a 71% en la República Democrática Popular de Corea; 10 al 37.1% en la República Democrática de Vietnam (New Times, Moscú, Edición Inglesa, No. 51, 1960, pág. 6).

66.—Armando Samper, según informó *Pólitica*, México, D. F., Septiembre 1 de 1960, pág. 45.

67.—"A primera vista puede parecer que este incremento en los servicios personales es el mismo fenómeno que ocurre en los países más desarrollados, donde según aumentan los ingresos per cápita la demanda por servicios especializados altamente remunerados es muy elástica. Sin embargo, este no parece ser el caso de... [América Latina] donde los servicios personales pobremente remunerados prevalecen y el exceso de trabajadores que no puede ser absorbido por otras ocupaciones... se oculta de esta manera... En segundo lugar... la clase media, que no puede encontrar una ocupación productiva en actividades económicas privadas, ejerce una presión constante sobre el sector público, el cual evidentemente... debe cumplir una función de absorción de no poca significación social". (*Economic Survey of Latin America 1954*. Naciones Unidas 1955, págs. 26-27).

68.—El mercado Común Latinoamericano, pág. 45.

69.—*An International Economy*, New York, 1956, pág. 62. Como se indica en nuestro cuadro, de 1945 a 1957 el coeficiente de inversiones fijas brutas para el conjunto de Latinoamérica fluctuó alrededor de un promedio de un 17% del PBN. En algunos círculos se considera ésta una cifra respetable, especialmente cuando se compara con la gran mayoría de los países subdesarrollados del Sudeste de Asia, donde el coeficiente usualmente es menor del 10%. Esta comparación, sin embargo, lo que hace es señalar lo extremadamente bajo del promedio de formación de capitales en el Sudeste de Asia, en lugar de indicar que en América Latina es adecuado. En 1955, p. e., el coeficiente para ambos, los Estados Unidos y Latinoamérica, fue aproximadamente 17%. Esto significó un promedio de inversiones per cápita de 370 dólares en los Estados Unidos en comparación con 55 dólares en Latinoamérica, es decir, en proporción inversa a las necesidades relativas de desarrollo de las dos regiones. Debe notarse también que el coeficiente neto de inversiones en Latinoamérica ha sido de alrededor del 12%. Como sugiere Simon Kuznets (*Economic Growth: Brasil, India, Japan, Durham, N. C., E. U. A. 1955*, pág. 23), en los países desarrollados la obsolescencia ejerce una gran función en el consumo de capitales, mientras el emporamiento físico es el factor principal en los países subdesarrollados. De aquí... "que la comparación propia desde el punto de vista del desarrollo económico, puede establecerse entre la formación bruta de capitales en un país industrial desarrollado y la

formación neta en un país subdesarrollado". Si consideramos también la dudosa contribución al desarrollo de Latinoamérica de las inversiones en actividades puramente extractivas y construcción de residencias de lujo, aparece claramente que el problema de formación de capitales en esta región es indudablemente formidable.

70.—Para una narración científica y al mismo tiempo vivida, de los aspectos materiales y humanos de estos problemas, consultar el tratado de Oscar Lewis, *Five Families, Mexican Case Studies in the Culture of Poverty*, New York, 1959.

71.—Índices (1950-100) de 1948-57; Argentina—61 a 326; Brasil—90 a 329; Colombia—78 a 152; Chile—73 a 1173; Bolivia—66 a 6,937. Del Cuadro 35, "Cost of Living in Selected Countries", *Economic Bulletin for Latin America*, vol. 3, N° 2, Octubre de 1958, pág. 81. En la mayoría de los países, los índices han continuado en aumento. En Brasil, en Diciembre de 1960 el nivel fue más del doble del de 1957 (*Monde*, Febrero 2 de 1961).

72.—*Economic Survey of Latin America 1957*. Cuadro 115, pág. 115.

73.—*Report on the World Social Situation (1957)*, pág. 182. De acuerdo con Cleantho da Paiva Leite, en el Estado de Piauí, típico exponente de la depresión crónica del Noreste del Brasil los ingresos anuales per cápita se han promediado en alrededor de 45 dólares, o menos del 13% del promedio del estado de Sao Paulo, el más importante productor de café de Brasil y su centro industrial. Alrededor de una tercera parte de la población brasileña vive en el Noreste ("Brazilian Development: One Problem and Two Banks", *Inter-American Economic Affairs*, vol. 14, N° 1, Verano de 1960, pág. 4).

74.—*Economic Survey Latin America 1957*, págs. 199, 206.

75.—*The Industrial Development of Peru*, págs. 10, 11.

76.—Carl S. Shoup, Director (citado por Otto Feinstein, *The Fiscal System of Venezuela*, Baltimore, 1959, págs. 29-34).

77.—Leo Huberman y Paul M. Sweezy, *Cuba Anatomy of a Revolution*, New York, 1960, págs. 6-7. Los autores observan que este promedio era el mismo que "en el peor año de la peor depresión en la historia de los Estados Unidos", y refleja el hecho de que la economía cubana "se encontraba en un estado de crisis permanente".

80.—*Economic Survey of Latin America 1957*, pág. 292.

81.—Op. cit., pág. 90.

82.—En el orden citado: James (Op. cit., pág. 880); Feinstein (op. cit., pág. 32) Navarrete (op. cit., pág. 11).

83.—*The Accumulation of Capital*, Londres, 1956, pág. 8.

84.—Otto Feinstein (op. cit., pág. 76) mantiene que América Latina "es la región subdesarrollada que ofrece mejores posibilidades al capitalismo". Aparte de perspectivas mundiales a largo plazo, las posibilidades no son brillantes en ninguna parte del mundo y son particularmente reducidas en América Latina. En las regiones que emergen de una dominación colonial directa, los poderes coloniales frecuentemente se ajustan al cambio manteniendo sus posiciones económicas principales bajo la forma de arreglos neocoloniales; este factor desalienta los experimentos no capitalistas. Además, dada la base económica extremadamente baja, puede operarse algún desarrollo inicial, aunque lento, a través de una combinación de capitalismo privado y capitalismo de Estado. En el conjunto de Latinoamérica el colonialismo directo pasó hace mucho y un desarrollo apreciable del capitalismo nativo, incluyendo el de Estado, se ha operado bajo condiciones neocoloniales. Sectores capitalistas decisivos en manos de inversionistas nacionales, como la banca y la gran industria, el comercio y el transporte, dependen en un grado significativo de las importaciones y del financiamiento extranjero. También dependen del aparato neocolonial de gobierno para defender sus intereses de clase frente a los asalariados. Sus prerrogativas económicas, políticas y sociales, aunque limitadas por el neo-colonialismo, se basan en el mismo. La crisis del neocolonialismo en Latinoamérica es también la crisis del capitalismo nacional y consecuentemente la eliminación del primero, especialmente si resiste tozudamente, como el caso de la experiencia cubana predice, produciría la eliminación del segundo, por lo menos en los sectores básicos de la producción. Tales perspectivas son, desde luego, alentadas por el hecho de que en la sexta década del siglo XX demasiadas personas en América Latina conocen que existe una alternativa mucho más expeditiva y rápida que el desarrollo capitalista.

HALPERIN, Maurice Elyman
Traveled to the USSR in
October 1958

The following is SECRET:

On 15 July 1960 Maurice Elyman HALPERIN and his wife, Edith Frisch HALPERIN applied at the United States Embassy in Moscow, USSR for a renewal of their passports. HALPERIN is reported to have stated that he had been in the USSR since December 1958 as a visiting professor of the Social Sciences Division of the USSR Academy of Sciences on a contract which expires in 1961. In 1948 Elisabeth BENTLEY, an admitted former Soviet espionage agent, stated that she had become acquainted with HALPERIN in the latter part of 1952 through arrangements made by Jacob GOLOS, a known Soviet espionage agent. She further stated that during the time HALPERIN was employed by the Office of Strategic Services in Washington, D. C., he supplied GOLOS with information to which he had access in his office. In late 1953 HALPERIN left

the United States for Mexico after refusing on constitutional grounds to tell the U. S. Senate Internal Sub-Committee whether he was ever a member of the Communist Party. In 1958, following the efforts made by the Government of Mexico to deport a number of American Communists, HALPERIN and his wife went to the USSR where they now reside.

MEMORANDUM FOR THE RECORD

SUBJECT: Maurice Hyman HALPERIN
(201-128561)

1. On 5 September 1960 an article appeared in The Washington Post and Times Herald in which Maurice Hyman HALPERIN was quoted as saying that the statement issued by the United States Department of State concerning his employment by the Soviet Government was a "deliberate and malicious distortion". HALPERIN was also quoted as saying that he was associated with the Academy of Sciences of the USSR, working on a book on Latin American economics from 1945 to the "crisis" in 1958. HALPERIN added that he is "not working for the Soviet Government any more than Van Cliburn when he performed in a government owned concert hall".

2. According to Mr. Lloyd Frank JORDAN, Office of Scientific Intelligence (OSI), 2618 Barton Hall, extension 4201, the Academy of Sciences of the USSR is directly subordinate to the USSR Council of Ministers and it receives broad directive for work to be undertaken by the Academy from the Central Committee of the Communist Party of the USSR. Mr. JORDAN stated that anyone associated with the Academy of Sciences of the USSR would be in the employ of the Soviet Government. Mr. JORDAN said that there are two studies showing the relationship of the Academy of Sciences of the USSR to the Soviet Government; one is OCI-5613/59 which is classified, and the other a study issued by the U.S. Senate Committee on Government Operations on "National Policy Machinery in the USSR" which is unclassified.

Halperin Denies Giving Reds Advice on Latins

MOSCOW, Sept. 5 (AP)—Maurice H. Halperin, former United States Government official who now lives in Moscow, yesterday accused the State Department of issuing a "deliberate and malicious distortion" about his status here.

In a typewritten statement, Mr. Halperin said:

"There is nothing mysterious or dubious about my being in Moscow. . . I am a visiting professor at the USSR Academy of Sciences and not the first American to be associated with it."

Last week Senator Keating, Republican of New York, read into the Congressional Record a State Department document which said Mr. Halperin is now in Moscow and is "working for the Soviet government."

Headed OSS Unit

The document said there were indications Mr. Halperin is giving the Soviet government advice on Latin-American affairs. During World War II, Mr. Halperin was head of the Latin American division of the United States Office of Stra-

tegic Services, an intelligence organization.

After the war, Mr. Halperin got a job with Boston University as a professor. He lost this job in 1953 because he refused to tell congressional investigators whether he ever had been a member of the American Communist Party.

The bald, mustached 54-year-old Mr. Halperin was located Sunday in a Moscow apartment house by a newsman and was asked to comment on the State Department's document.

Declines to Elaborate

(Moscow reported there were "technical difficulties" in moving the story until Monday. The newsman apparently was cut off while trying to telephone the story.)

Mr. Halperin first declined to admit the newsman into his apartment, but agreed to meet him later in the lobby of a nearby hotel where he promised to give a written statement.

Mr. Halperin appeared punc-

tually at the agreed hour. He carried the following statement, on which he declined to elaborate:

"It seems to me that the State Department and Senator Keating are scraping the bottom of the barrel to come up with this stale red herring.

"There is nothing mysterious or dubious about my being in Moscow. Since my arrival I have filed two United States income tax returns, listing my salary and employer. I am not working for the Soviet government any more than Van Cliburn (an American pianist) when he performs in a government-owned concert hall.

"I am a visiting professor at the USSR Academy of Sciences and not the first American to be associated with it. . . some of our leading scientists can testify. My appointment and my Soviet visa expires in July, 1961, as the United States Embassy here very well knows.

"My teaching and resource activities involve theoretical problems related to the economic growth of underdeveloped areas. For the State Department to say that I am advising the Russians on Latin-American affairs is a deliberate and malicious distortion.

"Specifically, I am making a study of the Latin-American economy from 1945 to the crisis of 1953. When my book is pub-

lished it will be available to the State Department and anybody else willing to purchase a copy."

The United States Embassy declined to comment on the statement or on Mr. Halperin's status. It did say he appeared at the embassy in July and asked to have his American passport renewed. The request was granted, an embassy official said.

Washington Post

Halperin Says Reds Not Not Employ Him

MOSCOW, Sept. 4 (UPI) — Maurice H. Halperin today branded a reported State Department statement that he is working as an adviser to the Soviet government on Latin American affairs as a "deliberate and malicious distortion."

In a statement to reporters, Halperin said he is a professor associated with the Academy of Sciences of the USSR, working on a book on Latin American economics, and, he explained, the American authorities know all about it.

(A State Department document in Washington last week said Halperin, a former Boston University professor and World War II intelligence specialist on Latin American affairs, was working for the Soviet government.)

Sen. Kenneth B. Keating (R-N.Y.) had the document entered in the Congressional Record.)

"It seems to me that the State Department and Senator Keating are sweeping the bottom of the barrel to come up with this red herring," Halperin said.

"There is nothing mysterious or dubious about my being in Moscow. Since my arrival, I have filed two U. S. income tax returns, listing my salary and employer.

"I am not working for the Soviet government any more than Van Cliburn when he performed in a government-owned concert hall," he continued.

"I am a visiting professor in the USSR Academy of Sciences, and not the first American to be associated with it. For the State of Department to say that I am an adviser to the Russians on Latin-American affairs is a deliberate and malicious distortion.

"Specifically, I am making a study of the Latin American economy from 1945 to the crisis of 1958."

FORMER U. S. AIDE AT WORK IN SOVIET

Ex-Boston U. Professor Was
in O.S.S. in World War II

By JACK RAYMOND
Special to The New York Times

WASHINGTON, Aug. 31—
The State Department has
disclosed that a former United
States Intelligence official is
in Moscow working for the So-
viet Government.

He is Dr. Maurice Halperin,
a former Boston University
professor who was head of the
Latin American Division of the
Office of Strategic Services
during World War II.

Dr. Halperin was dismissed
from Boston University in 1954
after he refused to say whether
he was a Communist. He has
been linked in testimony before
Senate investigators to a So-
viet spy ring.

The State Department's dis-
closure was contained in a
memorandum in support of a
proposed law to deny passports
to persons supporting interna-
tional communism.

The Supreme Court ruled in
1953 that passports could not
be denied to Communists or
others because of their political
beliefs.

Dr. Halperin and his wife,
Edith, were then in Mexico
City, the State Department
noted. They had been linked
to the escape behind the Iron
Curtain of Alfred K. and
Martha Dodd Stern, who were
under Federal indictment for
espionage.

After the Supreme Court rul-
ing, the Halperins applied to
the United States Embassy in

Continued on Page 7, Column 1

FORMER U. S. AIDE AT WORK IN SOVIET

Continued From Page 1, Col. 1

Mexico City for passports and
left Mexico Oct. 13, 1953. At
the time, the State Department
noted, they were about to be
deported from Mexico for Com-
munist activities.

Reports that Dr. Halperin
was working for the Soviet
Government in Moscow were
confirmed last July 15, the
State Department memorandum
went on, when he and his wife
appeared at the embassy to re-
new their passports.

Embassy officials reported
that they had been told by Dr.
Halperin that he and his wife
had been in the Soviet Union
since December, 1953, and that
he was working for the Soviet
Academy of Sciences "doing
research in the foreign field,
especially relating to under-
developed countries."

The State Department, re-
calling that Dr. Halperin was
an authority on Latin-American
affairs, added that "our infor-
mation indicates that this prob-
ably is the field in which he is
working at the present time."

State Department officials
have repeatedly called attention
to the Soviet trade and cultural
offensive in Latin America.

Referring to Dr. Halperin's
employment by the Soviet
Academy, the State Depart-
ment observed that it was di-
rectly subordinate to the Soviet
Council of Ministers.

Requested by Keating

The memorandum was pre-
pared at the request of Senator
Kenneth E. Keating, Republican
of New York. He and Senator
Thomas J. Dodd, Democrat of
Connecticut, are sponsoring a
bill that seeks to restore some
of the State Department's
authority to deny passports.

Senator Keating, who entered
the memorandum in The Con-
gressional Record of Aug. 16,
expressed regret at the time
that his bill was not likely to
be passed in this session of
Congress. President Eisenhower
and State Department officials
have backed the purpose of
the measure.

Meanwhile, Representative
Francis E. Walter, Democrat
of Pennsylvania and chairman
of the Committee on Un-Ameri-
can Activity, said he had or-
dered a month-long preliminary
investigation into the case of
two missing employees of the
National Security Agency.

The two employees of the top-
secret coding agency, Bernon
F. Mitchell and William H.
Martin, are alleged to have
taken valuable secrets to the
Soviet Union.

Representative Walter said
that he understood that one of
the missing men had made
enquiries in their agency about
the U-2 reconnaissance plane
flight over the Soviet Union
before it took place on May 1.

Mr. Walter said that he was
convinced that the Soviet had
had advance knowledge of the
flight. Francis Gary Powers,
the U-2 pilot, was downed in
the Soviet Union and subse-
quently sentenced to ten years
detention.

Refused to Appear

BOSTON, Aug. 31—Dr. Hal-
perin was officially dismissed
from the faculty of Boston
University on Jan. 6, 1954. He
had refused a summons to ap-
pear before a university com-
mittee of review to discuss his
case.

Dr. Harold C. Case, president
of the university, telephoned
Dr. Halperin in Mexico City
offering to pay his expenses
to Boston and return. But the
professor declined. He had
been chairman of the univer-
sity's Latin-American regional
studies.

201-128561

Washington Post
1 Sept. 1960

Halperin, U. S. Ex-Aide, Is Now a Soviet Official

Associated Press

The State Department says that Maurice H. Halperin, a former United States Government official linked by Senate investigators to Soviet espionage activities, apparently is serving now as a Latin-American adviser to the Russians.

Halperin was head of the Latin-American Division of the Office of Strategic Services during the latter part of World War II and later an associate professor at Boston University. Before the war, he had been on the faculty of the University of Oklahoma.

In 1954 he was dismissed by Boston University after Senate investigators received testimony linking him to a Soviet spy ring and he refused to answer a question as to whether he was a Communist.

The latest information on Halperin's whereabouts is contained in a report compiled by the State Department about persons to whom it has been compelled to issue passports under a 1958 decision of the Supreme Court.

The Court held that the Department lacks authority to

Associated Press

MAURICE H. HALPERIN
... believed Soviet employe.

deny passports to Communists or to other persons because of their political beliefs.

After the ruling, Halperin applied for a passport at the

American Embassy in Mexico City, where he had gone after being dismissed by Boston University, and used it to leave Mexico on Oct. 13, 1958.

The State Department said that shortly after Halperin and his wife departed from Mexico it received information that he was employed in Moscow by the Soviet Union.

"This was confirmed on July 13, 1960, when the Halperins appeared at the American Embassy in Moscow and presented their U. S. passports for renewal," the Department's report said, adding:

"Halperin stated that he had been in the U.S.S.R. since December, 1958, and that he is employed by the U.S.S.R. Academy of Sciences where he is doing research in the foreign field, specially, relating to undeveloped countries."

The Department recalled that Halperin was something of an authority on Latin-American affairs and said, "Our information indicates that this probably is the field in which he is working at the present time."

Ex-OSS Official Works For Reds in Moscow

By VICTOR LASKY

North American Newspaper Alliance
A former Boston University professor, who once was a high official in the OSS, has turned up in Moscow working for the Soviet government.

The professor, Dr. Maurice H. Halperin, fled this country seven years ago after an inquiry into his Communist background.

According to the State Department, he probably is advising Soviet officials on Latin American affairs, an area in which he is expert.

Prof. Halperin was suspended by Boston University in 1953 after he refused, on constitutional grounds, to tell a Senate subcommittee whether he had ever been a Communist Party member.

According to the State Department, he had previously been involved in Soviet espionage in wartime Washington. He had been named by Elizabeth Terril Bentley, admitted former spy courier, as one of her sources of supply among Government officials.

Intrigue in Mexico

And since 1953, Dr. Halperin has been involved in still more intrigue as an "exile" in Mexico. It was he, for example, who assisted two suspected spies in their flight from Mexico to Czechoslovakia to avoid United States extradition proceedings.

On July 15, 1960, Dr. Halperin and his wife, Edith, appeared at the United States Embassy in Moscow to present their United States passports for renewal.

All this was disclosed in a State Department memorandum prepared for Senator Keating, Republican of New York, who has been urging the passage of Eisenhower-supported legislation empowering the department to deny passports to active participants in Soviet skulduggery.

The memorandum, citing "cases where passports have had to be issued to known Communists," devoted considerable attention to the case of

MAURICE H. HALPERIN

—AP Photo

Dr. Halperin. It was obvious on the basis of the information contained in his dossier that the State Department had been keeping an eye on the former professor's movements for some time.

Fired in Oklahoma

From 1931 to 1941, Dr. Halperin—a Harvard University graduate—had been a professor at the University of Oklahoma. According to the record, it was in this period that he directed Communist activities in Oklahoma and, on repeated visits to Mexico, conferred with Mexican Red leaders. On one visit to Cuba in 1935, he and other leftwingers had been arrested by Cuban authorities and expelled from the country.

In 1941, much of this was disclosed in an investigation conducted by an Oklahoma State legislative committee. The committee, investigating subversive activities in Oklahoma, produced information that in 1940 Dr. Halperin had cashed a check for \$436 drawn on the Bank of Foreign Trade in Moscow. As a result, Dr. Halperin was dismissed from the University of Oklahoma.

Despite this record, Dr. Halperin managed to enter Gov-

HALPERIN

Continued From First Page

ernment service. Employed as chief of the Latin American division of the Office of Strategic Services, the OSS was then the United States Civilian Intelligence-Gathering Agency, he later was transferred to the State Department. In both agencies, according to the Elizabeth Bentley testimony, he transmitted confidential documents to a Soviet spy ring.

Linked to Spy Ring

In 1949, he became head of the Latin American regional students section at Boston University's College of Liberal Arts.

A year later, he was first publicly identified as a member of a Soviet spy ring. This came about when Vice President Nixon, then a California Congressman, made known a top secret memorandum on espionage transmitted by FBI Director J. Edgar Hoover to the White House on November 8, 1945.

In March, 1953, in Boston's Federal Building, Dr. Halperin repeatedly invoked the Fifth Amendment when in a hearing conducted by the Senate Internal Security Subcommittee—he refused to reply to

various questions concerning his alleged Communist activities.

In November, 1953, Dr. Halperin and his wife, without notifying the university, left their home in the middle of the night never to return. Turning up in Mexico, they became members of the American Communist group in Mexico.

Like most ACGM members, the Halperins did well. They invested in an ice cream company, dabbled in real estate, and obtained jobs. Dr. Halperin was employed by the Mexican government as a financial consultant and his wife taught in the American School Foundation.

They also became friendly with Alfred K. Stern and his wife, the former Martha Dodd, daughter of a former United States Ambassador to Germany. The fact the Sterns had been implicated in Soviet espionage came out with the arrest in New York of Jack Soble, a Soviet agent. To avoid being extradited to the United States to testify before a special grand jury on their associations with Soble and "the double agent Boris Morros," the Sterns fled to Czechoslovakia in July, 1957.

Dr. Halperin, described as being "intimately involved in their plans for escape," had obtained airline reservations for the Sterns under other names. As a result, the Mexican government was considering his case for deportation. On October 17, 1958, the Halperins left Mexico, having obtained plane reservations in the names of other persons.

In Russia Since 1958

The State Department memorandum concludes:

"We received information shortly after Halperin's departure from Mexico that he was employed in Moscow by the USSR. This was confirmed on July 15, 1960, when Halperin appeared at the American Embassy in Moscow and presented their United States passports for renewal."

"Halperin stated that he had been in the USSR since December, 1958, and that he employed by the Soviet Academy of Sciences where he is doing research... relating to underdeveloped countries. It will be recalled that Halperin is something of an authority on Latin American affairs. Our information indicates that this probably is the field in which he is working at the present time. "The Soviet Academy of Sciences is directly subordinate to the Council of Ministers."

Dearest Margaret & family.
We missed all of you when
you left. Even now we often
look up at your window - hoping
you still may be there.

Thanks for thinking of David.
He bought a guitar - has been
playing folk tunes since.
Life is well, of the old and
dusty here now, but we manage
our apt. fine. Our trip of 1
day at Leningrad was most
delightful. It's a real interesting city
and the Hermitage comes real
close to the Louvre.

David got notice to day, he
passed the first half - 6 - all he took
of his National Medical Board exam.
He made 78 - 150 passing, we are
pleased.

What new with all of you. How's
the warts? How did you enjoy
Paris. We did get you book from
London & gave it to the Doctor. Saw
the clipping in Linda Zepf's. Congratula-
tions!!

Love from all of us -
Edith.

Espionage - R
Bureau File Number 65-14303

1. This office has learned through a sensitive source of known reliability that, for many years, Maurice Hymen HALPERIN has been acquainted with a Dr. Marc JADIA who had an office at 55 bis rue de la Convention, Paris 15, France.

2. On 12 February 1940 we learned through a delicate source who has provided reliable information in the past that Marc JADIA, M. D., a naturalized French citizen, born on 29 December 1906 in Elman, Romania, resides with his family at 55 bis rue de la Convention, Paris 15. His wife, Ernestine Mathilde JADIA, nee SITAL, was born in Paris on 30 January 1913. A son, Serge JADIA, was born on 7 October 1940 in Charente-le-Int, Saing, France. This source had no derogatory information on JADIA.

3. According to our records, a Dr. H. JADIA, living at 55 bis rue de la Convention, Paris 15, was a member of the "Comite d'Initiative" (organizing committee) of MRAP (Le Movement Centre le Diable, l'Anti-Socialisme et pour la Paix - Movement Against Social, Anti-Socialism and for Peace), a Communist front organization formed in 1949 to promote Communism among Jewish elements. However, our records fail to show any continued record of activity in this organization on the part of JADIA.

REFERENCES:

1. It has come to our attention through a sensitive source of known reliability that Maurice Hyman HALPERIN, a former member of our predecessor organization, apparently has known the following individual for a number of years:

Dr. Marc JAINA
 74 Avenue Gastob Boisserie
 Viroflay (Seine et Oise), France

Office address c 1945
 55 bis rue de la Convention
 Paris 15, France

2. HALPERIN, who is residing in the USSR at the present time, is of continuing interest to us because of his prior connection with our predecessor organization and the Department of State and because of his association with known Soviet agents including Martha Dodd STERN and her husband, Alfred K. STERN. In the summer of 1959 HALPERIN's son, Charles (Carlos) David HALPERIN, who is generally known as David HALPERIN (born 5 May 1937, Oklahoma City, Oklahoma), visited the JAINA family in Paris en route to and from the USSR to see his parents. It is believed that he was in Paris c 25-30 June 1959 and again in the latter part of August 1959.

3. We would appreciate having you attempt to obtain information on JAINA through your independent sources. We prefer not to disclose to your liaison services our knowledge of HALPERIN's connection with the JAINA family because of the sensitivity of our source. However, we would have no objection to your querying your liaison services for information on David HALPERIN based upon the attached newspaper clipping. David HALPERIN is now in Chicago, Illinois where he is studying medicine. Maurice HALPERIN attended the Universite de Paris c 1929-1931.

Red Asylum in Mexico . . . By Roscoe Drummond

Foreign Communists Find It a Safe Operating Base

MEXICO CITY—Foreign Communists continue to find Mexico an easy and valuable base from which to operate

—and they are operating on a large scale today.

Mexico provides not only a welcome haven when things get too hot at home—there are at least 100

Drummond

C. O. in ministerial families from the United States here right now—but also a strategic spot from which to mount subversive activities throughout the western hemisphere.

For years the Mexican government has given safe harbor for foreign Communists—as well as revolutionaries of the extreme right—on the theory that it was applying the respected and humane concept of asylum for those suffering political persecution.

Mexican leaders and intellectuals greatly pride themselves that their country offers asylum so freely and so unquestioningly and there is no evidence that the new government will change this policy in any important particular.

What Mexican leaders do not choose to recognize is that there is a vast difference between providing asylum for those who are persecuted and providing asylum for those who use this privilege to prepare persecution against others.

THIS IS the way the great Soviet tradition of political asylum is being abused here

today. The record is perfectly clear on that.

For five years Mexico harbored some 100 to 150 Venezuelan Communist leaders assembled under the direction of the Soviet Embassy. They carried on subversion against their country from within Mexico and the dangerous rise of communism in Venezuela came from services rendered while Mexico was making it safe for them to operate. They have now made their way back to Venezuela.

There is a group of at least 20 Guatemalan Communists who are doing the same thing and are waiting only the lucky moment to return.

Occasionally a foreign Communist violates his "asylum" so blatantly that he runs afoul of the law here or elsewhere. This is what happened to Jose Manuel Fortuny, the Secretary General of the Communist Party in Guatemala, who has been operating freely here for some time. He obtained a false Mexican passport to go to Moscow a few weeks ago, but this became known and had to be discarded. He started his return trip by way of Rio de Janeiro and was picked up by the alert Brazilian police for presenting another false passport.

THE ADULT United States Communist population here hovers around 200 most of the time. Once in a while a U. S. Communist, as in the recent case of Gus Hall, is given over to U. S. authorities. But this is a rarity. When Communist Albert S. Stern whose wife is Communist Martha Dodd Stern, was wanted to testify in the Soviet spy case, he was

sheltered safely here. They both made off for Prague, where they were later joined by Maurice Halpern, a former Boston University teacher who was also living here—and now all three are ready for future assignments.

Moscow maintains a busy and bulging embassy in Mexico City, one of its largest in the western hemisphere, to direct and energize subversive operations. There are 128 adults on the embassy list and 48 children. Wives do their embassy chores whether they are accredited or not.

The clandestine character of much of the Soviet embassy's role here is illustrated by its extremely tight operations. It does not permit itself to employ a single Mexican national to do even the most menial caretaking work. A Mexican is not allowed even to polish the knob on the outside of the front door. It uses only ten non-Soviet employees and these are Communists imported from Spain. All ten speak Russian fluently.

Even the education of the children of the embassy staff is carried on inside the embassy walls and no Mexican teachers are employed.

The Soviet embassy has ten officers on its military staff among whom are three naval captains—this in a country whose navy is virtually nonexistent. This staff is obviously more concerned with what military secrets it can procure from the United States than from Mexico, particularly since the border is so easy to cross by agents who serve the Soviet base in Mexico.

8 DEC 1959

TO: Director
Federal Bureau of Investigation
Attention: Mr. G. J. Papich

FROM: Deputy Director, Plans

SUBJECT: Albert MALTZ

REFERENCE: CCI-3/755,300, dated 26 June 1959

Listed below are the names of persons or companies with whom Subject and/or his wife have been in correspondence during the period 17 August to 23 October 1959. For your information only, a photocopy of each item is attached. Since the following correspondence was obtained from a highly sensitive source, information contained herein should not be disseminated outside of your Bureau.

1. Correspondence with MI MALTZ, 27 E. 72nd Street, New York 21.
(Attachment 1)

- a) In a short letter postmarked 14 September 1959 the writer asks Subject and his wife to send a note to "Aunt Marg", at Forest Hills Nursing Home, Yellowstone Blvd., Forest Hills, N.Y. Enclosed with the letter is a small newspaper clipping, apparently to point out that Paul HERSMAN will do Exodus.
- b) A personal letter from "MI", with no return address, is postmarked New York City. Enclosed with the letter is a copy of the first page of the Sports Section from the 27 September 1959 issue of the New York Times.
- c) An unsigned personal letter, bearing no return address, is postmarked New York City and addressed to Miss Kathy MALTZ. MI MALTZ is apparently planning to visit Mexico during December. He enclosed a newspaper clipping concerning actors who are taking part in the film production of Exodus, for delivery to Subject.

*Carl as correspondent of Albert Maltz
71-5239*

2. Correspondence with Maria MALTZ, Marzalkowska 10/16 n 72, Warsaw, Poland. (Attachment 2)

- d) Note from Subject to LINDER, dated 7 October 1959. Subject has mailed a check to LINDER's account in (cont) and will continue to transfer the interest, apparently as some investment, about every two months.
- e) Letter from LINDER, addressed to Subject and dated 7 October 1959. LINDER will have a statement notarized by a consular officer to indicate MAITZ is holding "birth in funds" for the LINDERS. LINDER mentions "the very reverential references to 'God' that Khrushchev has been making on his transcontinental tour. Rather incongruous for the kind of atheist K. insists he is. But it's sure that a good part of the American people are deeply impressed ... I personally feel convinced that Khrushchev's visit to the U.S.A. is going to compel a relaxation of tensions." In this letter LINDER says he was down on the Black Sea coast in Bulgaria for the first twenty days of September. In expressing sorrow over the death of Dr. Ernesto AMAN, LINDER writes, "I even have a sense of guilt and complicity in his tragic and untimely end (Ernesta AMAN's wife), by the way, indicated that this wasn't normal, but of course this remains between us because while he was still in Mexico Ernesto had written us to say how anxious he was to get to one of the people's democracies where he could make a contribution; and we piled a number of wires here and in Berlin to achieve this for him."
3. Correspondence with Maurice HALPERIN, Kutusovsky Prospect, 13, Apartment 127, Moscow 6-110. (Attachment 3)
Stamp of Albert Maitz 74-5739
- a) In a letter from HALPERIN, dated 26 September 1959, the writer emphasizes the importance of addressing his mail correctly, as captioned above. On 25 September HALPERIN received a letter dated 15 September from the MAITZES; however, pictures were not enclosed, and HALPERIN wonders whether this happened through error or pilferage. He is pleased with clippings Margaret has sent him and thanks Albert for the UN materials. HALPERIN is stunned by the death of Narciso FASOLIS, with whom he had had a "stimulating conversation" last February in Moscow. The HALPERINs expect to get a telephone soon; next week HALPERIN will have a full-time research assistant. In the postscript, he asks, "Any news about the little business matter of ours we asked you to handle?" He offers to see RUKANOVA about a Russian edition of Seven Stars ...

- b) Another letter from FAJFERN dated 14 October 1959 acknowledges receipt of the UN "Sc Survey of LA 1957" and a registered package containing clippings.

4. Correspondence concerning Seven Shares in a Gold Mine.
(Attachment 4)

- a) Subject's wife, in several letters dated 23 September 1959, wrote persons listed below that she was asking her English publishers, Victor Gollancz, Ltd., to send each a copy of her book entitled Seven Shares in a Gold Mine, obviously to promote its sales and to seek its publication in Soviet/Satellite countries. In two of the letters, addressed to the first two persons listed below, she enclosed copies of a review of the book, written by Viola Brothers FINE, which appeared in Mainstream, an American magazine.

Mr. Alexei KRASILNIKOV, Publishing House for Foreign Literature, 52 Novo Alexeyevskaya, Moscow, USSR

Mr. Miodrag STAMATOVIC, Jugoslovenska Autorska Agencija, Marsala Tita 16, Belgrade, Yugoslavia

Mr. Edmund SEMIL, Nowotki 25 m 363, Warsaw, Poland

Mr. Adam TARN, Gardonierska 21, Warsaw, Poland

Miss Raya RUBINA, Foreign Literature, Piatnitskaya 41, Moscow, USSR

Miss Olyga SHCHETINKAYA, Foreign Commission of Union of Soviet Writers, 52 Ulitsa Vorovskogo, Moscow, USSR [see 4 - 5, below]

Miss Daria BILIKY, Literaturnaya Gazeta, Ivetnoi bulvar 30, Moscow, USSR

- b) In another letter dated 23 September 1959, and addressed to Mr. Wilfrid FURMAN, Victor Gollancz, Ltd., 14 Henrietta St., Covent Garden, London, W.C. 2, Subject's wife requests that the names and addresses of SEMIL and TARN, two literary people in Poland, be added to the list she had sent the publishers a day or two ago.

- 5 -

- c) A letter from Victor Bellanca Ltd., signed by Hilary RUBENSTEIN and dated 29 September, is in answer to an order placed by Subject's wife.
 - d) A letter from Hilla, Czechoslovak Theatrical and Literary Agency, Prague, dated 26 September 1959, acknowledges receipt of reviews of Seven Stars in a Gold Mine, which have been sent on to a publishing house for consideration.
 - e) A letter from Asara KRUGERSPAYA dated 21 October 1959 acknowledges receipt of book and letter, noted in k - a, above. KRUGERSPAYA passes on greetings from Helen KOMLENVA.
 - f) On 20 October 1959, a check, drawn on the Security First National Bank of Los Angeles and signed by Margaret MALTZ, is sent to Blum and Schuster, Inc., 136 West 52nd Street, New York 19, N.Y. *dit Spain?*
5. Correspondence with Pilar de AMAN, Tomas Peraton 9, Madrid, Spain. (Attachment 2)
document of original letter 201-5237
- a) A handwritten letter in Spanish from "Pilar" to the MALTZs is dated 20 September 1959. Pilar has just received MALTZes' letter telling her of the death of (Dr) Ernesto AMAN, her former husband, and now requests details as to the circumstances. She writes that their son Dickie had not heard from his father since September 1958, nor has the last letter AMAN had written his son via the MALTZs been received.
 - b) An answer to the foregoing, written in Spanish by Subject's wife, on 1 October 1959, reveals that a letter which Dr. AMAN had written on 27 July had been forwarded to Pilar de AMAN for delivery to their son Dickie. Although Subject's wife, at Dr. AMAN's request, had read the letter and had forwarded it to Pilar at the above address, she cannot understand why it was not received. Subject's wife relates that was in the letter to Dickie. Suffering from encephalitis, Dr. AMAN died in a German hospital after his return there for the third time. The MALTZs visited Dr. AMAN during their recent European trip.
6. Correspondence with Ben SAUGHES, Attorney, 112 West 9th Street, Los Angeles 15, California. (Attachment 3)

- 6 -

- a) In a letter dated 16 September MARCOLIS asks MAITZ to give his preference for attorneys to consult with respect to the possibility of litigation against the Immigration Service.
 - b) Subject's answer to the foregoing is dated 29 September. Since Rabinowitz and Roudin had represented him previously, Subject writes, he would be reluctant to hire any other law firm unless there were a "solid reason" to do so.
7. Correspondence with Bernard SKARON, Public Accountant, Justice Department, P.O. Box 1833, Studio City, California. (Attachment 7)
- a) Four pieces of correspondence, dated early October 1959, concern Subject's finances.
 - b) A letter from SKARON, dated 22 September 1959, deals with real estate investment opportunities as well as with Subject's finances.
 - c) With a letter dated 13 October 1959 SKARON sends Subject a copy of Maldo FRANK's petition for a writ of certiorari to review an earlier judgment preventing his travel to China.
 - d) In an envelope postmarked 22 October 1959 SKARON mailed Subject his check book analysis for September. *cit - U.S.*
8. Correspondence with Philip and Janet STEVENSON, 2101 Stanley Hills Drive, Los Angeles 44, California. (Attachment 8) *copy of letter dated 20-8-59*
- a) In an envelope postmarked 16 September 1959 Philip STEVENSON sends Subject a copy of a memorandum dated 14 September 1959 which STEVENSON had sent to HY AZEL. STEVENSON is sending AZEL "the finished screen treatment of Albert MAITZ's novel, The Cross and the Arrow, under the working title of The Billie Taylor Story." The memorandum concerns financial agreement for this under contract.
 - b) A letter dated 13 September 1959 sets forth STEVENSON's ideas for writing a screenplay, presumably based on La Rosa Blanca. STEVENSON may go to Mexico for a few days on 26 September to discuss the book.
 - c) Personal thank-you note, dated 3 October 1959, from Janet STEVENSON to Margaret MAITZ, following Philip STEVENSON's return from a visit with the MAITZes.

- 7 -

- d) A paper, presumably prepared by Subject, presents the factual errors in The Cross and the Arrow and is addressed to Philip STEVENSON.
 - e) A personal letter from STEVENSON to the MAILERs is dated 7 October 1959. With thanks, STEVENSON acknowledges receipt on 6 October of the material on The Cross and the Arrow. The writer is apparently working on a story, probably La Reina Blanca, an outline of which he will send the MAILERs.
 - f) In a letter dated 29 October 1959 Subject writes his comments and criticisms of STEVENSON's screenplay outline of La Reina Blanca.
9. Correspondence with Mrs. Laurie BLANKFORT, 501 North Redford Drive, Beverly Hills, California. (Attachment 9)
- a) In a letter dated 22 September 1959 and addressed to Margaret MAILER, Laurie BLANKFORT discusses plans for placing one Laura, a Mexican girl, in the home of a certain PATTEN family in California.
 - b) Margaret MAILER, in a personal letter dated 9 October 1959, acknowledges receipt of the foregoing letter by thanking Laurie for visiting Mrs. PATTEN. Subject's wife tells her correspondent that she (Margaret) is going to be interviewed on television in Spanish in a couple of weeks. As indicated in this letter, Mrs. BLANKFORT has visited Mexico.
10. Correspondence with 530 E. Fuller Avenue, Los Angeles 36, California. (Attachment 10)
- a) A personal letter dated 24 September 1959 and signed "Miriam" is addressed to Subject's wife. The envelope bears the above return address.
 - b) In an unsigned letter bearing the above return address, dated 2 October 1959, the writer asks whether Subject has received the Merry Go Round renewal Assignment. (see paragraph 15 - 1)
11. Correspondence with Mr. Adia FENWELL, Government Press Office, Tel Aviv, Israel. (Attachment 11)

- 8 -

- a) In a letter dated 22 September 1959 FRENKEL acknowledges receipt of two letters, dated 11 August and 3 September, from Subject. The writer gives background information on the formation of the State of Israel, obviously at the request of MALTZ.
- b) Presently in answer to a request by letter dated 11 September from Subject, FRENKEL, in a letter dated 22 September, describes radical practices among the Druse. In a handwritten postscript the writer notes he will devote his time, as Subject requested, to FRENKEL while he is in Israel, only however if the writer is given notice of FRENKEL's arrival date well in advance.
- c) A letter dated 9 October from FRENKEL acknowledges receipt of two cables from Subject and encloses a summary of security measures in Famagusta, Cyprus, during the Aliyah-fethiers, presumably as background information for Subject's writings.
- d) Three letters, dated 13, 15, and 19 October 1959, from Dr. Adia FRENKEL provide Subject with additional background information and research analyses. The letter dated 13 October includes photostats of identity cards issued in 1946, 1947, and 1948.
- e) In a letter dated 20 October 1959 Subject poses to FRENKEL a series of questions concerning the Hagannah leaders and Irgun members. Subject indicates that "Otto" [probably FRENKEL] was in Mexico the previous week, working with Subject on the story. "Otto" will be arriving at the Hotel Dan between November 15 and 18 for a five-week stay in Israel.

In view of information contained in these letters, as well as in other pieces of correspondence noted herein, it would appear that Subject is working on a screenplay for the movie to be based on Leon UFF's best seller, Exodus. Otto FRENKEL, well-known Hollywood movie director, is scheduled to direct the film version of Exodus.

12. Correspondence with Larry Edmunds Bookshop, 6558 Hollywood Boulevard, Hollywood 28, California. (Attachment 12)

- a) A letter from the bookshop dated 23 September 1959 is signed "Milton." Milton sent Dr. AMUN "the Casserole Cooking" the day he received MALTZ's letter but neglected to bill Subject. Books for Subject have been ordered from England.

- b) Subject's check payable to Larry Edwards Bookshop is enclosed in an envelope addressed to the bookshop and postmarked 3 October 1959. Also enclosed is the letter listed above, on which WALTZ has added his comments, noting that AMANN has died and that Subject will await delivery of the books ordered.
- c) Letter dated 28 October 1959, addressed to Subject's wife, is signed "Milton." Apparently in answer to a request made by Subject's wife, the letter lists works by CZEKHOV which the book shop has in stock.
13. Correspondence with Seven Seas Books, Olinkastrasse 13 - 15, Berlin, Germany. (Attachment 13)
- a) A letter dated 22 September 1959 and signed by Kay PANKY tells Subject that Seven Seas Publishers is sending him thirty copies of The Cross and the Arrow in care of Larry Edwards Bookshop in Hollywood.
- b) Letter from Seven Seas Books, dated 5 October 1959, is signed "Gertrude" (Gertrude GEMELN, chief editor). Gertrude has been and continues to be in poor health. She writes about what appears to be sales figures for a particular publication, perhaps one of Subject's books.
14. Correspondence with Dilla, Czechoslovak Theatrical and Literary Agency, Prague, Czechoslovakia. (Attachment 14)
- a) Letter from Dilla, dated 24 September 1959, is signed by Dr. Vojtech STANED. Subject is requested to send another copy of his play Black Pit for the Slovak translation.
- b) Letter from Dilla, dated 29 September 1959, is signed by "Barman." The writer acknowledges receipt of signed copies of an agreement for the Czech edition of The Cross and the Arrow. The last paragraph of the letter concerns stories by one Mr. FORTITS, Penitenciaría 469-8, Cuadalaajera, Jalisco, which Dilla has forwarded to publishers for consideration.
- c) A letter from Dilla dated 9 October 1959 informs Subject that an advance on the Czech edition of The Journey of Simon Kefever, to be published by the State Publishing House of Political Literature of Prague, has been transferred to Subject's account with the Banco Nacional de Mexico.

15. Correspondence addressed to Subject at Yarto 1h, San Angel, Mexico 25, D.F. (Attachment 15)
- a) Letter from Kindler Verlag, Lucile-Grain-Strasse 37, Munich 8, Germany, dated 15 September 1959 and signed by Dr. F. J. RAHMAT. RAHMAT acknowledges receipt of a letter dated 22 August from Subject. The writer has obtained a copy of The Cross and the Arrow and will inform MAJIZ should he desire to publish a next German edition.
 - b) In a letter dated 17 September 1959 from Ingo FREUNDLICH, of Freindlich/Stuart Agency, Inc., 8162 Boulevard, Hollywood 36, California, the writer discusses financing arrangements for a film production.
 - c) Letter from Adria SCOTT, 13341 Wyandotte St., Van Nuys, California, dated 22 September 1959, in which the writer encloses a check, signed by Robert A. Scott for 350 dollars, for payment on a loan MAJIZ made to the writer, apparently several years ago.
 - d) Letter from Jewish Currents, 22 East 17th Street, New York 3, N.Y., dated 27 September 1959 and signed by Morris U. CHAPPEL, editor. The writer acknowledges receipt of a contribution Subject had made while abroad. The editor suggests Subject might write for publication in Jewish Currents an article or travel letter about any one of the countries he visited recently.
 - e) Letter from Science & Society, 30 East 20th Street, New York 3, N.Y., dated 28 September 1959 and signed by T. E. HARTON, secretary. Polish press cuttings will be held until the return of Henry MINS, who will be abroad until the middle of November.
 - f) Letter from Dr. Harold LEVINE, Room 1324, Karl Meyer Hall, Cook County Hospital, Chicago 12, Illinois, dated 1 October 1959. The writer makes reference to A Long Lay in a Short Life and the Slavery of Simon McKeever and suggests Subject may, on any visit Cook County Hospital in Chicago, a place filled with "Communist literature."
 - g) Circular from the Committee to Secure Justice for Morton SOBELL, 91st Broadway, New York 10, N.Y., postmarked 7 October 1959 and entitled Toward Freedom for Morton Sobell, Next Steps in our Struggle.

- 11 -

- N) Letter from Avraham JIKI, Ben-Hanan Youth-Fillars, Beer
Lod, Israel, dated 7 October 1959. The writer thanks
Subject for his books and offers help in supplying material
Subject may wish for his "book about Israel." JIKI
describes his work among the children, adding that he will
leave Ben-Hanan during the summer of 1960 to complete his
studies in the field of education for a year or two in
either England or the United States.
- 1) Letter from the local department of Universal Pictures
Company, Inc., Universal City, California, dated 12 October
1959 and signed by Joseph C. DUBIN, chief studio counsel.
Enclosed with the letter is an Assignment, giving exclusive
motion picture rights for Harry Go Round, a play written
by Subject (under pseudonym of Eric Brent) and George
SHEW, to Universal Pictures. Since Subject is in Mexico,
the writer requests that the enclosed Assignment be executed
by Subject before a consular officer or notary of the
American Embassy. *File of Albert Matz 21-539*
- J) Another letter from Universal Pictures, dated 23 October
1959, encloses a second copy of the foregoing Assignment,
to be executed in New York.
- K) Although Caville (Mrs. Jean) PARIS, of 4 Francis Avenue,
Cambridge, Massachusetts, writes on 11 October 1959 she
would be happy to translate one of Subject's novels, she
must first be certain a publisher wants it. She does not
want to repeat the unfortunate experience of Pleck Hit,
which she had translated into French only to find no one
would produce it. The writer suggests that Subject send
his "three books" to Miss Monique KATHUN, les Editions
du Seuil, 27 rue Jacob, Paris 6, a house "open to
progressive ideas." Mrs. PARIS is planning a trip to
Mexico "either in spring or later on."
- 1) Personal letter dated 16 October 1959 from Alvah BENSIE,
6437 A Goary Boulevard, San Francisco 21, California.
- M) Letter dated 13 October 1959 from Lawrence LYTKO, 3470
Cannon Place, New York 63, N.Y. The writer, an admirer
of Subject's books, was recently graduated from the
Kathattan School of Music. He asks Subject to consider
writing the libretto for an opera LYTKO plans to compose
on Uncle Tom's Cabin.

- a) Note dated 16 October 1959 from Eberhard HUSING (HUSING), Wilhelm-Flieger-Str. 34, Leipzig W 22, deals with a contract and a letter dated 26 September which had been "erroneously sent through ordinary mail." [see 18 - d, below]
16. Correspondence addressed to Subject's wife, Margaret Larkin
MALIZ, et al. (Attachment 1b)
- a) Letter dated 11 September 1959 from Morris GOODMAN, 1119 Los Oxford Ave, Los Angeles 35, California. The writer thanks Subject's wife for a contribution she had made to a committee of which GOODMAN is chairman. GOODMAN has given a check on behalf of Mrs. MALIZ to Frank WILKINSON.
- b) Letter with no return address, dated 28 September 1959 and signed "Charles." The writer mentions a book which he hopes will be placed "east of West Berlin" and notes his regret over the death of Dr. AMANN. After expressing dissatisfaction over his present job, apparently with some magazine in New York City which also employs one Phil BROWN, the writer adds, "Nevertheless, the KIRSCHENYI visit means up for almost everything, and so on this bright note, I'll sign off." The writer, in a postscript, asks that his name not be put on the envelope, "just Mini's, she knows it's for me."
- c) Personal letter from Clarice CHAPMAN, 7728 Kraft Ave., North Hollywood, California, dated 28 September 1959.
- d) Letter dated 4 October 1959 from Ray SPRECH, 6217 Pacific View Drive, Hollywood 20, California. The writer thanks Subject's wife for seven shares ... which he and Helen enjoyed reading while in "Vail" [possibly Vail del Fravo, Mexico]. He is saddened by the death of Ernesto [NAME] and adds the postscript: "Mr. K. was absolutely sensational... There is a definite change of atmosphere for the better, we believe."
- e) Letter from Barthold Ples, Literary Agent, 507 Fifth Avenue, New York 17, New York, dated 6 October 1959 and signed "Bar." The writer is flying to Germany on 6 October and will ask Gollancz [Victor Gollancz Ltd., London] "for your statement when I come to England." Before returning to the United States in three weeks, the writer also intends to see Gertrude CUBIE and Stefan HEIN in Berlin.

17. Correspondence addressed to Mr. and Mrs. Albert MAITZ.
(Attachment 17)

- a) Letter dated 13 September 1959 from Ethel ELLIS, 36 W. 41st Street, New York 24, New York. The writer thanks the MAITZs for a gift, apparently money, to help "Fred" with medical and nursing expenses. "Fred" is recovering from polio.
- b) Personal letter-and-butter letter, postmarked 16 September 1959, San Jose, California, is signed "Frances." In the letter Frances writes that "Fernie" will take Kenneth MacNEIL's job at Metro after the first of the year, under a three-year contract.
- c) Letter from Jane Firth ROW, 11120 Laurel Crest Drive, Studio City, California, dated 27 September 1959. The writer discusses plans to visit Mexico, where she expects to arrive between mid-November and Christmas.
- d) Envelope bearing return address of Jane ROYCE, 56 Seventh Ave., New York 11, New York, postmarked 6 October 1959, forwards an invitation and request for contribution to a birthday purse honoring the 85th birthday of A. A. HALLER of New York.
- e) In a note postmarked 21 October 1959 Jane ROYCE and A. A. HALLER thank the MAITZs for their "donation," undoubtedly to the birthday purse listed above.
- f) Personal letter dated 24 October 1959 from Max and Helan SHAFROCK, 118-09 Buxley Street, Rosedale 22, New York.

18. Letters from Albert MAITZ. (Attachment 18)

- a) In a letter dated 23 September 1959 to Mr. John M. Calder, Messrs. John Calder, Ltd., 17 Sackville Street, Piccadilly, London W. 1, England, Subject orders twenty-five copies of the cheap edition of A Long Day in a Short Life.
- b) Bill and check sent to Copley's, Pipe Purveyors and Smokers' Supplies, 5109 Wilshire Blvd., Los Angeles 36, California.
- c) Letter dated 9 October 1959 is addressed to Mr. Harry Elmer BARNES, 31509 West Pacific Coast Highway, LTD 2, Malibu, California. Subject thanks Mr. BARNES for a letter he had written on 10 April, in which BARNES praised Subject's book and suggested he send a copy of it to Mr. Howard GILL. Subject, in addition, describes an investigation he had made of the Czech...

Boston 1-14

Sept. 12, 1957

Dear Margaret and Albert,

First let me point out that your letter of Sept. 11 (delivered yesterday) was some piece. The envelope did carry double postage. So what happened - error or pilferage? Sure would like to know and, of course, get the original or duplicate sets of piece for the Heritage. Also, ENTOPIAM - the envelope was not entirely correctly addressed. Apt. 13 instead of 127, an understandable slip. Please note simplified correct address above (house not yet required).

And now to tell you Edith and I were very happy to get your letter. We can see Jimmy-son Margaret and Jimmy-son Albert hitting away at the sweaters and bottles. We shall want to hear when the big events take place. Again, our best wishes to Peter and esposa.

I can't get too many slips, Margaret, as full speed ahead. And see tiny reminder - the date on each slip, please. Your score with respect to choice of slips is very high - I'd say about 95% of what you send is of top interest. An afterthought that troubles me - I've reckoned up the postage spent and it's running eighty high.

Albert, many thanks re the NY materials. The 1957 Survey has not yet arrived, but I'll let you know. And I shall be on the look-out for 1958.

We much appreciate the Novedades supplement re Mexico. Still feel stunned by his death. I had such a stimulating conversation with him here last February, and we were to continue on his next visit.....

Little by little, we're getting better organized. So are due a telephone shortly, which will improve living efficiency enormously. Also, next week I shall have a full time research assistant, at last! No need to tell you what that will mean. So, while we don't dash more ahead at the pace of the noon rocket, we're not standing still either.

The radio session is on - went to our first concert day-before yesterday. Music is one department that is on the level of female rocketry so far as quality is concerned. We've never had it so good before....

Watch you'll give our very best regards to all our good friends.

These embraces from Edith and

P.S. Any news about the little business matter of mine we asked you to handle? Any news about a Russian edition of "Arvo Part" I could see Romanova - she still has my copy of the book.

including, of course, the income - what it has been & pay is about as interesting to what it is. Also, who's (Romanova) had a copy of the PP on the...

Memo No. 112/P

17 June 1959

MEMORANDUM FOR THE RECORD

SUBJECT: Moscow Addresses Found in Pocket Notebook of
Anna Sparer SEBORER (201-66549#)

REF : ONHA-15692, 10 April 1959

1. The following Moscow addresses were found in the pocket notebook of Anna Sparer SEBORER; photocopies of Subject's effects were made on 8 April 1959 and were transmitted to headquarters under reference.

a. Prof. Maurice HALPERIN
Kutuzovskiy Prospekt 13
House #4, Apt 127
Moscow G-248

b. R. KATZIN
Furmannyy Pereulok
House 24, Apt. 21
Moscow, Tel. No. K 7-2663

c. Ana TELPNEVA
Maslovka Verkh. ulitsa 7
Apt. 53
Moscow
(Enrique de los RIOS)

A flagging request on the above individuals has been placed with SR/6/POS for Ball coverage, with the understanding the undersigned will be notified of any letter intercepts.

2. The last known residence of Maurice HALPERIN (201-125053#) and his wife was Czechoslovakia. MEXI 3532 (IN 34979), 21 March 1959, Source: LIFEAT, reports that "on 18 March Anna told Mrs. Albert MALTZ that she had written Mrs. Maurice HALPERIN telling her not to bother answering but 'just to leave the information for me.' MALTZ had heard from HALPERIN and had 'the address' for Anna." This would indicate that Anna SEBORER planned to get in touch with the HALPERINs on her recent visit to Moscow, 24 March - 8 April 1959.

3. There is no identifiable trace on R. KATZIN.

4. Enrique de los RIOS may be identical with Enrique de los RIOS Lavin (201--109936*) of the ALTO Case. E864-12013, 28 January 1959, Source: LIFEAT, reports that de los RIOS "was apparently recently in the USSR."

5. For a possible trace on Ana TELEPHEVA see OSMA-6782, 21 May 1957 which refers to a Miss A. TELEPHEVA, resident of Moscow who had written to a Spanish repatriate, one Juan DIEZ. According to WE/5 a copy of this letter intercept was forwarded to SR/6. An attempt is currently being made to find this letter.

NOV 1958

TO: Director
Federal Bureau of Investigation
Attention: Mr. S. J. Fajish

FROM: Deputy Director, Plans

SUBJECT: Mauricio Hyman HALPERIN

1. Reference is made to our teletyped message of 24 November 1958 and to previous correspondence concerning Subject's travel with his wife from Mexico, through western Europe, to Prague, Czechoslovakia.

2. Enclosed for your information is a copy of a report, from an [redacted] of Subject's activities in Switzerland from 15 October 1958 to 10 November. Also enclosed are photocopies of letters from Subject and his wife to members of the family in the United States.

3. The David EFRON mentioned in both the [redacted] and Subject's letters was described by a usually reliable source on 18 August 1947 as an Argentine citizen who was a Communist Party member of long standing; under cover of his International Labor Organization (ILO) assignments EFRON was touring Latin America to assess the Communist position and strength within the labor framework of each country visited. Another usually reliable source reported in February 1951 that EFRON had been a specialist in Latin American affairs for the ILO until the fall of 1947, and that he had been repeatedly reported as a Communist and closely associated with Vicente LOPEZARDO Toledo, president of the Confederacion de los Trabajadores de America Latina (CTAL) and secretary-general of the Partido Popular (PP - Marxist Party of Mexico). A David EFRON, mentioned in your reports of 23 June 1952 and 21 January 1952, appears to be identical with EFRON.

4. This information is from a usually reliable and highly sensitive source and should not be disseminated further.

Attachment to SSCI-3/753,048

As a supplement to bits of information hitherto orally transmitted here is a summarized account on the movements and activities of

HALPERIN Maurice, alias PASTOR Daniel, born 3.3.1906, US citizen, economist, married to Edith; domiciled Ledellin 36-9, Mexico 7, D.F.

during his sojourn in Switzerland from 9 October to 10 November 1958:

On 15 October subject and his wife arrived by air from LISBON at the Hotel "Schweizerhof" in ZURICH. On 18 October he and his wife took the 1320 H. train to GENEVA, where they stayed at the Hotel "Bernina". On 19 October, 1700 - 1900 H., he visited

REYON David, born 1.9.1904, citizen of ARGENTINE, Councillor with the ILO in GENEVA, domiciled Avenue Andre Gide 2, CHENE-SOUSTRIES/GENEVA.

On 20 October at GENEVA he inquired at a local travel agency for the possibilities of a flight from ZURICH to PRAGUE. On that day the HALPERIN's traveled by train (leaving GENEVA at 1245 H) to ZURICH, where they occupied a room at the "Schweizerhof" again. At 1830 H. subject visited the information office of the Zurich train station to learn about train connections for PRAGUE and for LUGANO. On 21 October, in answer to a telephone call, he visited the Czech Consulate General in ZURICH, where he stayed from 0940 - 1115 H. At 1630 H. he went to consult the "Swissair" information desk at the main station. He stated that he possessed a flight-ticket Mexico-Lisbon-Zurich-Tel-Aviv, but had no definite booking so far and wanted his luggage to be stored at Kloten airport for the time being. He then mailed letters to

- 1) Mr. David C. HALPERIN, 5211 South University Ave., CHICAGO/ Ill.;
- 2) Mr. Theodore HALPERIN & family, 22, Kahler Ave., MILTON/ Mass.;
- 3) Rabbi & Mrs. Hillel CANKRAN, 4 de Kald Place, MORRISTOWN/ New Jersey;
- 4) Mrs. Annie FRISCH, 17 Beach Road, LYNN/ Massachusetts;

Letters 1 - 3 are of similar contents. Photostat copies of Nr. 1 & 4 are attached.

At 1930 H. he inquired at the "Swissair" office for any communication that may have come in for him.

On 22 October Subject negotiated with the KLM airtravel office for cancelling of his 2 flight tickets to Tel-Aviv and refunding.

On 23 October at 0925 H. he inquired at the information office of the Federal Railways about train connections to PARIS and fares. At 1025 H. he entered the Czech Consulate General, but reappeared in the street 3 minutes later.

SECRET

CONTINUED CONTROL

SECRET

NOFORN CONTINUED CONTROL

As of 23 October HALPERIN had made three telephone calls: one to GERNER, Trlesheim/Basel, Lurzenstr. 14, one to Carlo IRELLI A.G., Zurich, home in Fuesnacht; and one to SCHNEP, Zurich. All of the above are either timber and lumber importers or dealers.

On 24 October the couple visited the Czech Consulate General at 1025 H. where they remained for 25 minutes. At 1110 H. they went to the snack bar of the Zurich University. HALPERIN then visited for 30 minutes the Seminary for social economics, commercial sciences and statistics. At 1515 H. HALPERIN went to a travel agency to cash a cheque of 50 \$.

On 25 October HALPERIN inquired for trains departing for LUGANO and obtained various prospectus of this town. From 1025 - 1055 H. the couple called at the Czech Consulate General. On the way back they changed 200 \$; at 1311 H. they left by train for LUGANO.

Up to this date the couple had not received any visitors and as far as could be ascertained had no suspicious telephone calls while staying in ZURICH. They ostensibly endeavored to cut down expenses to a minimum, taking meals in cheap restaurants or buying food to be eaten in their room at the hotel. The luggage deposited at Kloten airport was discreetly searched. The personal belongings were of rather poor quality. A list showed that they had sold furniture and household goods prior to their departure from Mexico. Amongst various articles there were also two pocket editions of dictionaries in Chinese and Russian. All this and their demeanour seemed to indicate that the couple plan to settle definitely in the East.

At 1625 H. of 25 October the couple arrived at LUGANO, where they rented a room at the hotel garni "LUX" for 3 or 4 days.

On 26 October they went on an excursion to the Monte Bre. At 1730 H. of that day HALPERIN inquired at the main post office for the telephone number of a certain ALFRED STERN in PRAGUE. No such extension was found in the directory, however.

On 27 October they made an outing to Cassarate and Campione and back to LUGANO.

On 28 October HALPERIN again went to the telephone exchange at 0915 H. where he asked to be connected with LEZARO JENA in PRAGUE, Nr. 67856. The partner in PRAGUE being absent, the call was postponed to the afternoon; it went through at 1640 H. and a certain Dr. STEIN answered the call on the number indicated. HALPERIN talked in Spanish, announcing himself as Professor Maurizio HALPERIN from Mexico. He explained that he was a friend of LOMBARDO, with whom they (the partners on the phone) had accidentally met last year at the shop of Dr. Berla ARENARES. At present he (HALPERIN) was staying in LUGANO and waiting for the visa to go to PRAGUE. There he would like to find his American friends, the STERN family, whom his partner should also know. He then wanted to know when LOMBARDO would arrive in PRAGUE from MEXICO.

(probable identities:

LEMA, Lazaro: Trade Union Secretary of CUBA; vice-president of Cuban C.P. & member Executive Council of WFC.

LOMBARDO, Vincente, b. 16.7.1924, Mexican citizen, com. Mexico-City, Artesias, Villa Oregon 51;

Trade Union leader; member of WFC; member of presidium

Dr. ASSEARAS, Berta: no record.)

On 29 October the HALPERIN's left LUGANO at 0704 H. by train for ZURICH. During their sojourn at LUGANO no contacts of the couple with strangers were made; they went for walks at random in town or in the vicinity, bought papers and periodicals by the dozen, but did not receive any mail or telephone calls.

At 1253 H. of 29 October they arrived in ZURICH, went to the Hotel "Schweizerhof" and later to the Czech Consulate General. At 1550 H. subject inquired at the ELN airline agency about refunding for the tickets to Tel-Aviv, but the agency had not received directions from Amsterdam yet.

On 30 October the couple again went to the Czech Consulate General at 1035 H. and remained there for 75 minutes. At 1215 H. HALPERIN inquired at the Kuoni Travel Agency about tourist visas to Prague and was given the necessary forms to fill in. These he returned to the agency at 1410 H. together with the passports. At 1715 H. he mailed two letters to

Mr. David C. HALPERIN, 5411 South University Ave., CHICAGO/ Ill.
Rabbi & Mrs. Hillel CAMORAN, 4 de Falb Place, NEWBRISTOWE/ N. J.

Photostat copies (numbered 5 & 6) of the contents are attached.

On 31 October the HALPERIN's moved from Hotel "Schweizerhof" to the cheaper hotel "Lindathof". On this day they finally received the requested refund by the KLM airline's office.

Monday, 10 November the requested tourist visas were issued to the HALPERIN's, valid for 6 days and including Hotel reservations for 5 days at Sw.Frs. 23. - per person. They immediately departed by train and left Switzerland via Buchs/rail at 1824 H. for Austria, traveling on 2nd. class tickets ZURICH-PRAQUE return.

In the period of 31 October to 10 November the couple did not make or receive any telephone calls and had no visitors, nor did they call on anybody.

19 November 1958.

SUBJECT: Maurice Hyman HALPERIN

1. Reference is made to our CIGI-1/752,585, dated 16 December 1958, and to other correspondence concerning Subject, an American Communist who was living in Mexico, but who is, with his wife, now in Prague, Czechoslovakia.

2. Enclosed for your information are photocopies of the following correspondence sent to him at his home: Modallin #36, Apartment 9, Mexico, D.F.:

- a. Letter, dated 5 August 1958, from Maurice H. SAVAL, of the Maurice H. SAVAL Insurance Company, 22 Batterymarch Street, Boston 9, Massachusetts, in which SAVAL renews what was evidently an old friendship.
- b. Letter, postmarked 18 August 1958, from Subject's mother, in Boston, which contains family news.
- c. Letter, postmarked 24 August 1958, from Ted HALPERIN, at 22 Kohler Avenue, Fulton 87, Massachusetts, in which he mentions family matters, his father's illness, and that Subject's son, David, will be visiting them soon.
- d. Letter, postmarked 25 August 1958, from RABINOWITZ & BRUDEN, Attorneys at Law, 25 Broad Street, New York 4, New York, reducing Subject's fee due for professional

SUBJECT: Jane Constance ROGERS

*Correspondence From Jane Constance Rogers
to Maurice Halperin*

1. Reference is made to our CSCI-3/751,016, dated 12 August 1958, and to previous correspondence concerning Subject and her correspondence with American Communists living in Mexico.

2. Enclosed for your information are photocopies of an envelope from Subject, 56 Seventh Avenue, New York 11, New York, addressed to Maurice HALPERIN, Medellin 36-9, Mexico, D.F.; and a letter, contained in the envelope, bearing the salutation, "Dear Colia." ("Colia" is probably Colia OENHEIM, wife of Kurt Leopold OENHEIM, who, as was reported to your Bureau in our teletyped message of 12 September 1958, was hiding out in a hotel during the wave of arrests of American Communists living in Mexico.) The contents of the letter are summarized as follows:

Subject mentions that she is glad that Colia saw "Tess and Bruno," and discussed with them the hardships and worry suffered "by you and all our friends." She says that A.A.'s main interest has to do with Sr. PONTON, ("A.A." probably refers to Abraham Aaron HELLER, who visited Mexico with Subject for three months during the winter of 1957-58. "Sr. PONTON" possibly refers to Luis SANCHEZ Ponton, a Mexican lawyer concerned with the Morton SOBELL case.)

Subject also mentions that her planned trip to Mexico during the coming winter is not certain unless they (she would probably be traveling again with HELLER) could find an inexpensive apartment.

Los Altos, California,

August 27th, 1953

tardy in answering your letter of August
returning from Lake Tahoe where I took

ible. To be sure, outlines give usually only
comes out, but with that reservation, I think,
What would seem to me to be in order is
cal framework. In the first place, I would
number of groups: those countries that
mic advancement (Venezuela, Argentina, Mexico,
kedly stagnant (Central America, Peru and
bourgeois revolutions (Mexico); those that
per or another (Argentina, Venezuela); those
m or entirely feudal state (Peru?), etc.
seems "ideal types" treatment which would
achieved by individual countries. The role of
ism in all of them has to be clearly worked out: both economically, and
politically. Secondly, when it comes to strictly economic analysis, I don't believe
that much is gained by talking about "crisis-breeding printing press money" (V, p. 1).
This puts the critique of inflation on a wrong track, and relates to what I would
consider "old-fashioned" economics. The trouble with inflation is not that it is
intrinsically "crisis-breeding". After all, ~~the~~ Soviet industrialization was financed
to a considerable extent by inflation! The trouble with inflation is that it
puts the burden of capital accumulation upon lower income groups; in capitalist
countries, furthermore, it channels the accumulated capital into wrong, undesirable
investments, creates opportunities for vast speculative profits, promotes luxury
consumption, etc. etc. In other words, under capitalism, inflation tends to add
to the injustice. If inflation, then, at least it should promote useful capital
investment. Moderate inflation (a few % p.a.
inflation of the German 1920' variety. The
loss which need not occupy us in the
low inflation (accompanied by devaluation)
tax" of the underlying populations,
ults in lopsided development.

My impression that you should concentrate on assembling as much as possible
material on the volume and mode of utilization of accumulated capital, and show
how these accumulations are being misused. This would permit you to analyze both
the domestic structure of the economies under consideration as well as to show
the impact of capital outflows due to imperialism etc.

These are my first reactions. I will be glad to go into all of these things
as I have more stuff to look at. You are obviously most welcome to use
for what it's worth) as a reference. If the Committee chooses to comment on it,
I would suggest that the accent be placed on the empirical aspect of the study with
the analytical part made subject to further discussion and clarification.

14-00000
I will write to Bravo very soon; I was absolutely swamped by various and sundry commitments, and am struggling now to finish up before school starts and of September. And then I have a book to finish (with Swozy) and deadlines surround me on all sides.

With very best wishes,

Yours,

Gene Brown

28 Nov. 58
201-128561

At y/ memo's date of 18 Oct. 58

509/II/58

As a supplement to bits of information hitherto orally transmitted here is a summarized account on the movements and activities of:

E A L P E R I N Maurice, alias PASTOR Daniel,
born 3.3.1906, CS citizen, economist,
married to Edith; domiciled Rodellin 36-9,
Mexico 7, D.F.

during his sojourn in Switzerland from 15 October to 10 November 58;

On 15 October subject and his wife arrived by air from LISBON at the Hotel "Schweizerhof" in ZURICH. On 18 October he and his wife took the 1320 H. train to GENEVA, where they stayed at the Hotel "Bernina". On 19 October, 1700 - 1900 H., he visited

S P R O H David, born 1.9.1904, citizen of ARGENTINE,
Counselor with the ILO in GENEVA, domiciled
Avenue André Gide 2, CHATELAIN / GENEVA.

On 20 October at GENEVA he inquired at a local travel agency for the possibilities of a flight from ZURICH to PRAGUE. On that day the HALPERIN's traveled by train (leaving GENEVA at 1245 H) to ZURICH, where they occupied a room at the "Schweizerhof" again. At 1830 H. subject visited the information office of the Zurich main station to learn about train connections for PRAGUE and for LUGANO. On 21 October he visited the Czech Consulate General in ZURICH, where he stayed from 0940 - 1115 H. At 1630 H. he went to consult the "Swissair" information desk at the main station. He stated that he possessed a flight-ticket Mexico-Lisbon-Zurich-Tel-Aviv, but had no definite booking so far and wanted his luggage to be stored at Kloten airport for the time being. He then mailed letters to

- 1) Mr. David C. HALPERIN, 5411 South University Ave., CHICAGO /Ill.;
- 2) Mr. Theodore HALPERIN & family, 22, Kahler Ave., HILFEN /Basel;
- 3) Rabbi & Mrs. Hillel CANORAN, 4 De Kalb Place, HOBOKEN /New Jersey;
- 4) Mrs. Anale FRISCH, 17 Beach Road, LYNN /Massachusetts;

./.
Letters 1 - 3 are of similar contents. Fastest copy of Nr. 3 & 4
are attached.

At 1930 H. he inquired at the "Swissair" office for any communication that may have come in for him.

On 22 October subject negotiates with the KLM airtravel

./.

office for cancelling of his 2 flight tickets to Tel-Aviv and refunding.

On 23 October at 0925 H. he inquires at the information office of the Federal Railways about train connections to PARIS and fares. At 1025 H. he enters the Czech Consulate General, but reappears in the street 3 minutes later.

On 24 October the couple visit the Czech Consulate General at 1025 H. where they remain for 25 minutes. At 1110 H. they go to the snack bar of the Zurich University. HALPERIN then visits for 30 minutes the Seminary for social economics, commercial sciences and statistics. At 1515 H. HALPERIN goes to a travel agency to cash a cheque of 50 ₣.

On 25 October HALPERIN inquires for trains departing for LUGANO and obtains various prospectus of this town. From 1025 - 1055 H. the couple then calls at the Czech Consulate General. On the way back they changed 200 ₣; at 1311 H. they leave by train for LUGANO.

Up to this date the couple has not received any visitors and as far as could be ascertained had no suspicious telephone calls while staying in ZURICH. They ostensibly endeavored to cut down expenses to a minimum, taking meals in cheap restaurants or buying food to be eaten in their room at the hotel. The luggage deposited at Kloten airport was discreetly searched. The personal belongings were of rather poor quality. A list showed that they had sold furniture and household goods prior to their departure from Mexico. Amongst various articles there were also two pocket editions of dictionaries in Chinese and Russian. All this and their demeanour seem to indicate that the couple plan to settle definitively in the East.

At 1625 H. of 25 October the couple arrived at LUGANO, where they rented a room at the hotel garai "LUX" for 3 or 4 days.

On 26 October they went on an excursion to the Monte Bré. At 1730 H. of that day HALPERIN inquired at the train post office for the telephone number of a certain ALFRED SPINER in PRAGUE. No such extension was found in the directory, however.

On 27 October they made an outing to Casarate and Campione and back to LUGANO.

./.

On 28 October HALPERIN again went to the telephone exchange at 0915 H. where he asked to be connected with LEONARDO PERA in PRAGUE, Br. 67636. The partner in PRAGUE being absent, the call was postponed to the afternoon; it went through at 1640 H. and a certain Mr. STERN answered the call as the number indicated. HALPERIN talked in Spanish, announcing himself as Professor Mauricio HALPERIN from Mexico. He explained that he was a friend of LEONARDO, with whom they (the partners on the phone) had accidentally met last year at the shop of Dña. Boris ARENARES. At present he (HALPERIN) was staying in LUGANO and waiting for the visa to go to PRAGUE, where he would like to find his friends, the STERN family, whom his partner should also know. He then wanted to know when LEONARDO would arrive in PRAGUE from MEXICO?

(probable identities:

PERA Leonar: Trade Union Secretary of UTRA; vice-president of Cuban C.P. & member Executive Council of WFO.

LEONARDO Vicente, b. 16.7.1926, Mexican citizen, Gen.

Mexico-City, Artistas, Villa Obregon 51;

Trade Union leader; member of WFO; member of presidium of Executive Committee & General Council of WFTU.

Dña. ARENARES Berta: no record.)

On 29 October the HALPERIN's left LUGANO at 0904 H. by train for ZURICH. During their sojourn at LUGANO no contacts of the couple with strangers were made; they went for walks at random in town or in the vicinity, bought papers and periodicals by the dozen, but did not receive any mail or telephone calls.

At 1253 H. of 29 October they arrived in ZURICH, went to the Hotel "Schweizerhof" and later to the Czech Consulate General. At 1550 H. subject inquired at the KLM airline agency about refunding for the tickets to Tel-Aviv, but the agency had not received directions from Amsterdam yet.

On 30 October the couple again went to the Czech Consulate General at 1035 H. and remained there for 73 minutes. At 1215 H. HALPERIN inquired at the Krcal Travel Agency about tourist visas to Prague and was given the necessary forms to fill in. These he returned to the agency at 1410 H. together with the passports.

to be called for letters to

Dr. David S. HALPERIN, 5411 South University Ave. CHICAGO/ILL.

and Mrs. Hillel SANCHEZ, 4 de Kalb Place, MORRISTOWN /N.J.

Essential copies (numbered 5 & 6) of the contents are attached.

On 31 October the HALPERIN'S moved from Hotel "Schweizerhof" to the cheaper Hotel "Kunsthof". On this day they finally received the requested refund by the ALM airline's office.

Monday, 10 November the requested tourist visas were issued to the HALPERIN'S, valid for 6 days and including Hotel reservation for 5 days at Sw.Frs. 23.- per person. They immediately departed by train and left Switzerland via Bern/rail at 1824 H. for Austria, traveling on 2nd class tickets ZURICH-FRAGUE return.

In the period of 31 October to 12 November the couple did not make or receive any telephone calls and had no visitors, nor did they call on anybody.

12 November 1958.

SECRET
COMMUNIST CONTROL

TO: Director
Federal Bureau of Investigation
Attention: Mr. S. J. Papich

FROM: Deputy Director, Plans

SUBJECT: Maurice Hyman HALPERIN

1. Reference is made to our CSCI-3/751,683, dated 2 October 1958, and to other correspondence concerning Subject, an American Communist living at Medellin #36, Apartment 9, Mexico, D. F.

2. Enclosed for your information are photocopies of the following correspondence sent to Subject:

- a. Letter, dated 10 August 1958, from Jane Constance ROBERTS, at Hill Valley, California, mentions that she and Abraham Aaron HELLER have been at Hill Valley since 1 August. She also mentions that Albert MILTZ is in Los Angeles and that she and HELLER planned to travel through there in late August. She refers to two "youngish" lawyers from Los Angeles who came to San Francisco for a breath of "fresh air." She mentions Tim KELLY's kindness to her and HELLER at Hill Valley and that KELLY sends his love to Pablo [REDACTED]. She also encloses six photographs of herself and HELLER. (CSCI-3/751,016, dated 12 August 1958, reported that ROBERTS had asked HALPERIN to look for an apartment in Mexico City for her for the winter of 1958-59.)
- b. Letter, dated 2 September 1958, from Martin Robert ROBERTS, The Toll, Hume, Virginia, (son of Jane Constance ROBERTS) queries HALPERIN about effects to be shipped when the ROBERTS family goes to Mexico as immigrants. ROBERTS mentions that he and his family hope to be in Mexico by 1 December "unless HALPERIN doesn't periora." ROBERTS adds that "as a matter of fact,

we have to come anyway, and we'll enter as tourists if we can't get ready as immigrants." (Evidently a lawyer named HANHAUSEN is arranging the entrance of the ROSEN family to Mexico. There are two brothers named HANHAUSEN who are practicing lawyers in Mexico.)

- c. Letter, dated 4 September 1958, from Martin Robert ROSEN, The Dell, Hume, Virginia, requests HALPERIN to open a box in the main post office in Mexico City for his effective 1 November.

3. This correspondence was obtained from a usually reliable and highly sensitive source and should not be disseminated outside your Bureau. Photocopies of this correspondence have been furnished the representative of your Bureau in Mexico City.

UNITED STATES DEPARTMENT OF JUSTICE
FEDERAL BUREAU OF INVESTIGATION

DBF 12369

WASHINGTON 25, D. C.

In Reply, Please Refer to
File No. 100-424134

Date: October 29, 1958

To: Mr. E. Tomlin Bailey
Director
Office of Security
Department of State
515 22nd Street, N. W.
Washington 25, D. C.

From: John Edgar Hoover, Director
Federal Bureau of Investigation

Subject: EDITH FRISCH HALPERIN
SECURITY MATTER - C

Records of the Passport Division, Department of State, revealed that captioned individual was issued a passport in August, 1958, at the American Embassy, Mexico City, Mexico. Regarding her travel plans, she had previously stated she intended to depart from Mexico on July 12, 1958, for proposed travel to Europe and the Middle East for the purpose of business and pleasure. However, on August 27, 1958, the American Embassy advised the Department of State that at the time a passport was issued to the subject she refused to give specific travel data but stated she expected to travel to Israel, returning via Belgium to visit the World's Fair at Brussels and would probably stop at intervening points.

Information concerning Halperin has previously been furnished to the recipients of this letter. No investigation is requested since this matter is being handled through the appropriate Legal Attaches. It

067 12 369

Mr. E. Tomlin Bailey

would be appreciated, however, if this Bureau is furnished any pertinent information concerning Halperin which may come to the attention of the Department of State or the Central Intelligence Agency while she is outside the United States.

SUBJECT: Maurice Hyman HALPERIN

1. Reference is made to our CICI-3/751,165, dated 26 August 1958, and to other correspondence concerning Subject, an American Communist living at Medellin #36, Apartment 9, Mexico, D.F.

2. Enclosed for your information are photocopies of the following correspondence sent to Subject:

- a) Letter, postmarked 28 April 1958, from David HALPERIN, Subject's son, a medical student in Chicago, Illinois, concerns David's studies and his health, and mentions that he was elected to the student government on the Student Representative Party ticket.
- b) Note, dated 3 May 1958, from Subject's mother, at 824 Bluehill Avenue, Dorchester, Massachusetts, concerns purely family matters.
- c) Letter, dated 9 May 1958, from Sadie F. BIPTRAU, 9 Chase Street, Lynn, Massachusetts, gives news of friends and relatives of the HALPERINS, including one Elinor COLMAN.
- d) Letter, postmarked 18 May 1958, from David HALPERIN, concerns his studies and living arrangements.

SECRET
COMMUNICATIONS CONTROL

- e) Letter, dated 29 April, from A. DORFMAN, in Santiago, Chile, indicates that HALPERIN may have asked the writer for help, possibly in finding a job. (A. DORFMAN is believed identical with Adolfo DORFMAN, a suspected Communist and former employee of the United Nations who is now in Argentina. DORFMAN and Fanny, his wife, were both born in the Soviet Union, but DORFMAN is believed to be a citizen of Argentina now.) The writer describes himself as a "well-known and uncompromising" supporter of (President) FRONTERO (of Argentina) and says that since the latter's election triumph he (the writer) has been "practically snowed under with requests for assistance, advice, etc." (It is believed that DORFMAN did, in fact, accept a position as an adviser in the FRONTERO government.) The letter also enclosed a hand-written note, signed "Fanny."
- f) Letter, dated 9 May 1958, from Bob and Terry ROGERS (aka Martin Robert ROGERS and Teresa Soracco ROGERS), in Venice, Italy, describes the Italian part of the ROGERS' European tour. Two parts of the letter may be of significance. First, ROGERS' comments on the Italian elections: "The CP is campaigning vigorously and spending a lot of money. They and the Christian Democrats are the only ones you seem to feel. The local papers seem resigned to leftist gains, so the immediate future of Italy will depend in large part on the coalitions that Nenni may be willing to form." Second, his "few random notes": "Just as many cops as in Benito's (MUSSOLOINI's) day. U.S. missile base straddles industrial Italy. U.S. army vehicles constantly on highways in this region (Turin-Milan-Venice)." The letter also mentions the fact that the ROGERS were going on to Austria and Brussels after completing their tour of Italy.

SECRET
COMMUNICATIONS CONTROL

SECRET
CONTINUED CONTROL

- g) Letter, dated 14 May 1958, from Oscar LEWIS, at the University of Illinois, concerns some translations HALPERIN was doing for LEWIS. LEWIS says that he has overdrawn his research account and asks HALPERIN to take this into account when computing his bill for the translations. LEWIS also says that he is hoping to be able to visit Mexico the first two weeks in June.

3. This correspondence was obtained from a usually reliable and highly sensitive source and should not be disseminated further.

DISPATCH		SECRET	1044-A-11154
TO Chief, WH Division		DATE 1 October 1958	
FROM Chief of Station, Mexico City		REASON FOR INDEXING X	
SUBJECT American Communists in Mexico		NO INDEXING REQUIRED	
ACTION REQUIRED MICROFILMED		INDEXING CAN BE JUDGED BY QUALIFIED HQ DESK ONLY	
<p>REF ID: A66343</p> <p>MEXI-2334 MEXI-2342</p> <p style="text-align: center;">(LIFEAT)</p> <p>1. Following an order issued by the President of Mexico on 6 September 1958 for enforcement of Article 33 of the Constitution a round-up was made in Mexico City of American Communists and other foreigners, allegedly Communists, currently residing here both as tourists and immigrants or inmigrados.</p> <p>2. Among the first Americans to be picked up and who were the only ones actually to leave due to this order were: Bernard BLASENHEIM, John BRIGHT and Allen LEWIS.</p> <p>3. Bernard BLASENHEIM entered Mexico in 1950 with "Immigrante" status and currently enjoyed status as an "Inmigrado" here. U. S. Ambassador Robert C. Hill received a call on 7 September 1958 from former Senator George BENDER of Ohio requesting that he intercede for Mr. BLASENHEIM who was being detained by Mexican authorities. According to local newspapers William O'DWYER, former U. S. Ambassador to Mexico, was requested by a phone call from New York to intercede for BLASENHEIM with local authorities. O'DWYER's office was unable to secure an "amparo" for BLASENHEIM. BLASENHEIM was deported from Mexico, arriving in San Antonio, Texas on American Airlines flt. 690 on 11 September 1958. (ODINCH) Ambassador Hill advised (former) Senator BENDER that he could not intercede that the procedure was completely legal (by Mexican law) and advised Mr. BENDER to check into BLASENHEIM's background. Mr. BENDER withdrew his request, said he did not know BLASENHEIM; had had a call from New York.</p> <p>4. John BRIGHT entered Mexico as a student immigrant originally but in March 1955 his status was changed to that of a "technical immigrant" retroactive to October 1946. BRIGHT had not yet attained "inmigrado" status. When picked up BRIGHT was incarcerated at Miguel Schulz 135 in solitary confinement (LIFEAT). He was deported from Mexico on the same flight as BLASENHEIM.</p> <p>5. (and) Allen LEWIS, who has been an instructor at the National University of Mexico, had "Immigrante" status in Mexico. He was picked up by persons claiming to come from Gobernacion during the night of 6 September 1958 and taken from his home in Coyocacan to the Detention Center at Miguel Schulz 135. Mrs. Brooke LEWIS, wife of Dr. LEWIS contacted the U. S. Embassy in an effort to ascertain the reason for his deportation on 9 September 1958. Dr. LEWIS called his wife from San Antonio on 9 September and stated that he and Mr. BLASENHEIM had been brought to San Antonio by the Mexican authorities. (Interview with Mrs. LEWIS by a U. S. Embassy official, 9 September 1958).</p> <p>6. During the drive by Mexican authorities the following Americans were picked up, held and released after period varying from several hours to several days:</p> <p>A. Noah ARBONER - authorities went to his home on 7 September but were unable to locate him there. He appeared voluntarily for a check of his documents and was detained at the Detention Center on 9 September. As a naturalized citizen of the U. S., he could not be returned to the U. S. without documentation and no documentation other than his Mexican "red book" was provided to the Mexican authorities. He was released on 12 September 1958. (LIFEAT)</p> <p>B. Elizabeth Catlett de WORA - picked up but released after short detention. She is married to a Mexican citizen.</p> <p>C. Ian ADONIAN - picked up on 9 September 1958 (LIFEAT). ADONIAN is a Russian-born naturalized American who entered Mexico as a U. S. citizen but sought Immigration papers in Mexico as a Spaniard in view of his claim to Spanish citizenship, having been a member of the Abraham Lincoln Brigade during the</p>

<p><u>Spanish Civil War. He enjoys immigrant status in Mexico.</u></p> <p>D. <u>Martin OVERGAARD</u>, who was deported from the U. S. in 1950 as an undesirable alien, was another of the group who was picked up during this drive. He is listed by the Mexicans as a Dane.</p> <p>7. It is interesting to note that <u>Excelsior</u>, a reputable Mexican newspaper, commented that the major portion of group being detained were "pro-Soviet U. S. citizens, Europeans now naturalized Americans and some from Central and South America."</p> <p>8. <u>LINER-1</u> reported that as of 11 September 1958 the American Communists in Mexico expected the arrests to cease very shortly. From <u>LIFEAT</u> it was learned that consternation existed among the group and that they had scattered to various places, in and around Mexico, after the first onslaught by the local authorities.</p> <p>9. According to various newspaper articles the following persons were marked for detention if they could be located:</p> <p>A. <u>Ralph SCOTT</u>, former Alfred K. <u>STERN</u> chauffeur and currently handling the <u>STERN</u> residence in Cuernavaca (<u>LIMOUSINE</u> reported that <u>SCOTT</u> was in Cuernavaca on 21 September 1958. This station is not aware <u>SCOTT</u> a Communist but he is loyal to the <u>STERNS</u> - see various letters to and from Alfred K. and Martha Dodd <u>STERN</u> (in Prague)).</p> <p>B. <u>Max PSILAFROCK</u> - he and his family are in New York City now and have been there for several months.</p> <p>C. <u>Paul STEVENSON</u> (aka Pablo O'HIGGINS), lover of Martha Dodd <u>STERN</u> and painter. Known to associate with members of the Satellite diplomatic installations as well as with the Soviets. Has been attempting to regularize his status in Mexico.</p> <p>D. <u>Frederick Vanderbilt FIELD</u> - "inmigrado" in Mexico and presently married to <u>Nieves TILLET</u> (former wife of <u>James TILLET</u>) by whom he has a child born in summer 1958.</p> <p>E. <u>Maurice HALPERIN</u> - he and his wife left their residence on first hearing of the pick-ups. His son, <u>David</u> and family remained in their residence however. (<u>LIFEAT</u>)</p> <p>F. <u>Gray Dayton WELLS</u> - has small chicken farm in Ixtapalapa, suburb of Mexico City at last report. An American by birth and married to a Guatemalan Communist who was active in organizing canneries on West Coast of U. S. <u>WELLS</u> reportedly is ill. Has been "inmigrante" since April 1955 in Mexico.</p> <p>G. <u>Albert MALTZ</u>, one of the "Hollywood Ten." Local authorities are aware that <u>MALTZ</u> and family are in the United States at this time but were afraid that subject should re-enter Mexico under an assumed name. <u>MALTZ</u> is an "inmigrado." The papers also mentioned that <u>Helen SOBELL</u>, wife of <u>Morton SOBELL</u>, of the Rosenberg case, who is now in the Federal Penitentiary at Atlanta, Georgia, had been staying at the <u>MALTZ</u> residence during the time she was in Mexico (She departed Mexico on 10 September 1958 voluntarily.)</p> <p>H. <u>John ANUCCOR</u> (believed to be identical with <u>Joseph RASKOB</u>, painter) "inmigrante" in Mexico. If <u>Joseph RASKOB</u> is the one meant, he is believed to be in the U. S. A. exhibiting paintings. Reported as detained but no information that this was so.</p>
