RE: (Jesus Molina)<sup>6</sup>

Dear Dr. Maceo:

Mr. (Jesus Molina) is functioning quite well at the present time. He is adjusting well and seems to be in good contact. However, it should be kept in mind that he is still receiving the following medications:

- Thorazine 50 mg Qid
- Stelazine 2 mg Qid
- Cogentin 2 mg Daily

In all probability his present level of adjustment is greatly facilitated by the relatively high doses of medication he is receiving. We recommend that he continue under psychiatric outpatient care for at least another year.

Very truly yours,

*Jose Gurri*  
Jose Gurri, M. D.  
Director, Psychiatric  
Outpatient Service
