

AGENDA

Meeting with JFK ARRB Staff

Monday, 17 March 1997

2C06 IP Building

1:00 p.m.

1. Records Management Briefing

Becky Rant, DA/IRO

~~Carol Johnson~~, DA/IMO

2. Cable Process

John Rovito, Agency Network Mgt. Center, OIT

3. Questions & Answers

SECRET**RETURN TO CIA

John -

Thank you for agreeing to participate in briefing the JFK Assassination Records Review Board (ARRB) to be held on Monday, 17 March, at 2:00 p.m., in 2C06 IP Bldg. I regret the short notice. As we discussed, the ARRB has asked for information relating to the creation, transmission, and dissemination of cables and your name instantly came to mind. Their specific questions are:

1- Can you describe the cable process in place in the Agency during the 1960-1964 time period?

Prior to 1962 messages were delivered to the DPD *- handled V-2 + copy of Prop* (Development Products Division) at 1717 H Street or to the Communications Center at "L" ^{Building} Street. In addition there also was a Q building that received special traffic.

After 1962 messages came into the CIA Headquarters and were processed in different areas depending on the types of traffic.

Imagery traffic would be sent to to a specific floor for the imagery personnel. Intercept and Special Programs would either be passed to a Special Sections Area of the Communications Center or to the Cable Secretariat.

2- How did cables come in?

Messages came in from the field via the

3- How were they decrypted?

Messages were deciphered using a OTT (One Time Tape) or a OTP (One Time Pad) process.

4- What happened from the time a cable was sent from a field site until it arrived

on a desk at Headquarters?

Messages sent from a field site ^{decrypted & processed} would be passed to a communicator, ^{messages going out} encrypted and transmitted via

High Frequency Radio. The message received from

and relayed to headquarters and then it was decrypted.

The analyst of the Cable Secretariat would then read the message and match what they read against customer

requirements. They then would have a typist type the

dissemination on the message. The message then would be

picked up from the message center by the various staffs

and or divisions.

5- How were cables disseminated?

See item four.

Please let me or Becky Rant, DA/IRO, know if you have any other questions or concerns prior to the briefing.

CC: Becky L. Rant

TOPICS

- **CIA Information Services Strategic Plan**
- **Information Management Program Segments**
- **Information Management Goals**
- **Organization of Records Management In the Agency**
- **DA Information Management Officer (IMO)**
- **DA Information Review Officer (IRO)**
- **Deputy Director for Support (DDS) - 1965**
- **Deputy Director for Administration (DDA) - 1997**
- **DA Records**

Directorate of Administration

CIA Information Services Strategic Plan

- **“Information and Records Management, including Classification Management, is a fundamental and essential business requirement for the Agency.”**
- **“The CIA’s Information Services shall...ensure that each official record is appropriate, accurate, secure and retrievable throughout its life cycle regardless of physical form or media.”**

Legal obligation

Directorate of Administration

Information Management Program Segments

- Records Management - *identifier, storage*
- Classification Management - *Executive Orders*
- Information Disclosure - *search, retrieval, review
for disclosure*
- Information Automation - *electronic format*

Directorate of Administration

Information Management Goals

An effective and efficient information management ensures that records are available:

- **to meet day-to-day business needs**
- **to ensure the continuity and consistency of records**
- **to provide corporate memory and history**
- **to protect the rights and interests of the organization, the employees and the public**
- **to meet legal requirements**

- Office of Training & Education (OTE)
- Center for Security Evaluation (CSE)

Directorate of Administration

DA Records

- Information Management Officers

- Core functions

- ◆ 1960s
 - ◆ 1990s
- > basically the same*

- Records Life Cycle *- general system used by records management*

- ◆ Creation
- ◆ Maintenance & Use
- ◆ Disposition

*most records done by personal identifier - a name
medical files kept by code number*

- File organization *office takes with them relevant records with a reorganization - Nothing is left out or behind*

Directorate of Administration

DA Records

- **Records Control Schedules**

Records Manager Bible

- ◆ Temporary
- ◆ Permanent

*All categories of files in Aggregate are documented
new records series = new schedule
old records still reflected in current schedule*

- **Records Storage**

- Archive + Records Center

- ◆ Short term
- ◆ Long term

- **Accountability**

- ◆ Personal - *each person is responsible for create + retain information*
- ◆ Organization

- **Search & Retrieval**

*soft files or financial records for owners stations kept 56 years. =
↳ sources
↳ contacts
↳ staff
* other non personnel payroll
financials are kept 20 yrs*

Directorate of Administration

DA Records

- **Access**
- **Safeguarding**
- **Preservation**
 - ◆ **Hardcopy**
 - ◆ **Electronic**
- **OGC Retention List**
- **Automation**

DA Briefing 3/17/97

~~draft memo~~

Info Management chart

DO more centralized file management

DA more decentralized w/ 10 components w/ special jobs
each office manages their own programs

DA/IMO works w/ all 10 offices in DA
records management, policy, guidance

DA/IRO Emergency each Directorate + DCI
- tests 10 DA components
- component find info, + IRO reviews for possible release

IMOs in components do the records search for both
DA/IMO + DA/IRO.

Archive + Records Ctr

DA/OIT manage

47,440 cu ft of records for DA

181,000 cu ft of records total

most DA records are 'temporary'

personnel 75 yr

financial/payroll 56 yr

archive began early 50's

NS55

pe 55 in Policy

SECRET

2/7

Warehouse w/ shelving

Program ongoing to deal w/ expired records / purges

Records Management / Storage

- system that tells w/ what boxes are expiring
- OGC retention lists - not destroyed until OGC says so

Accountability -

Search + Retrieval

points to file level not document level
- file folder with the
query.

ARSENS(?) automated query for archive information
can search for docs into early 50's
Old ~~at~~ shelf lists ~~not~~ inputted in mid 70's

paper search (hand search) of file is
not considered "reasonable" for FOIA

offices have indexes + file cabinets

* Records on destruction of records of the
file center are kept only a short
duration of time. (kept longer than legal
requirement.) (2-3 yrs?)

Office of Personnel Security enters records
destruction info in their indexes. Some do,
some don't.

SECRET

Cable Process - John Rovito - EOD 1963

1963
7/10/63
into

Stations can send messages literally w/o HQS knowledge

Special projects like U-2

Today or
appropriate

Zendline, CW, noise code, teletype
One time tapes - one time pad.

L Street were ^{wire} operators, cable secretariat

comm ctr → cable secretariat → disseminator
typed by typist based on requirements listed
in books for divisions/staff/directorate/field
or slip in message.

later cable secretariat could suspend info to
other directorates

"Special traffic" alert/commint/RT project

dn '63 shift to ~~W~~^{KW}-26 mechanical crypto.

decrypted using a like process - 3 tapes

Question Maximalty 63 - is there more than 1 channel/canno?

SCI ~~to~~ → 2 channels
Non sci

different Routers for each
area, 4 St, 9 St, etc etc
you can send messages
independently.

State & CI cover same links - charges are
routers & encryption
SCI + Non-SCI = different Networks

Privacy traffic is slugged for individual
Slugg tells who it is slugged for - tells
Cable Secretariat

P+L prescribed - limited - CI had that

Cable # put on as they are logged in
- can tell if #s from States are sequential
as well (if not, cables are missing)
need to return emit

W/IRM will
del } Are log schedules kept?

Chrono records kept?
cable
any records kept?

Now Cable maintenance is responsibility of the
office responsible for the information
not the COMMO CTR.

In 59-64 Cable Secretariat was under DCI
but records we kept for only a relatively
short period of time (microfilm?)
maybe up to '76.

Computer system put in 1977

prior to 77 - vital records were microfilmed
all messages were VR's every staff cable
no R/H's, SECRET away - microfilmed

5/7

post 64 - Comm picks up "special traffic"

A Building - did it handle RTH?

Per L? prescribed & limited

offices running a project determine the channels used.

* were special & regular traffic given sequential #'s or were they numbered on parallel tracks?

SCI - compartmented
special designee

all in effect from 1952 on

Military

State

NSA

intel channel

DA Questions

B & F

1. Financial Accounting vouchered, certified, & audited
Finance & Accounting Date, location, time period
indexing or kept by office in U.S.
2. HRM has microfilm of staffing complements
for that time period
3. C/Financial Services - doesn't think it was
maintained that way, if it was, it was
maintained in a 201, 301 or project file.
OF records were not organized by project
but by accounting practices
4. Station accounting on indigenous personnel
kept 36 yrs. Non natives kept only 20 yrs.

Personnel

1. Contract personnel
Independent Contractor - office of Finance & Logistics
post 1996
OP kept them before '96
Filed by name, ^{separate} security file, medical file,
payroll file

7/7

Security

1. get Wed from Barry

3 SRS - collected, developed, evaluated
incl. CI nature

5 Security clearance like activities for non employees
but "clearances" per se are not given
across the board staff like clearances.
They do national agency checks on contractors

6

SECRET

Types of Questions for DA Records Briefing
March 17, 1997

Budget and Finance

1. In Cold Warrior, (p. 52) Mangold refers to a CI secret slush fund which was tightly controlled by Angleton and never audited by the usual procedures. According to Mangold, it was this fund which allowed Angleton to run his own operations without supervision. Did the fund exist? Was this fund ever audited? Are there any records of CI operational expenses for the period 1959-63?
2. Mangold also refers (p. 53) to an unnamed CI/B&F officer who says he worked for Angleton from 1958-1964 and never dealt with him directly on a single matter. Is there a list of B&F officers assigned to the CI Staff from 1959-63. Do their records still exist?
3. We have seen Directorate of Operations monthly operational reports which contain information on the allocation/distribution of operational funds. Are there other DO or DA records which reflect how a certain project utilized its funding? Can this type of information from the early 1960's still be retrieved?
4. What records are kept on disbursements to sources in the field? If, hypothetically, LHO had received money from the Agency, what records would exist?

Personnel

1. What records are maintained on contract personnel? →

OP
→ OS
→ OMS
Payroll file

Security

1. For the period between 1955-65, what was the universe of files that OS had on individuals or groups? ✓

2. How are Office of Security records indexed? card to key punch

(SAG)

3. What was the function of the Office of Security/Security Research Staff (OS/SRS)? Why were defector records kept in this component? designated point - "CI function"

4. In the OS/SRS memo of Oct. 31, 1960, written by Marguerite D. Stevens, the file numbers of several defectors are listed: "Robert Edward Webster, EE-18854; Lee Harvey Oswald, MS-11163; Libero Ricciardelli, MS-8295; Vladimir Sloboda, MS-10565; and Joseph Dutkanicz, MS-10724." What do the "MS" and "EE" file prefixes designate? How are these designations assigned?

5. Does OS process security clearances for non-employees (e.g. sources) to receive access to classified information? What kinds of files are created by this process? How long are these files maintained. For example, Clay Shaw was given a security clearance and had access to classified information based on his "responsibilities" as a source for the Domestic Contacts Division (DCD).

6. Where are records that would describe liaison (etc.) cooperation or operations between OS and CI located? How are these records organized?

7. Where are records regarding operations that OS participated in or ran located. For example, where are the OS records on the Castro assassination attempts?

"16"

8. How many files did OS have on Oswald? Which OS components maintained files on Oswald? Why did OS have any files on Oswald?
