LA COSA NOSTRA
AR - CONSPIRACY

Re your telephone call 12/10/64.

The Bureau appreciates your desire to penetrate the activities of La Cosa Nostra by obtaining technical coverage at 902 South 8th Street, Philadelphia. The Bureau's primary requisite in considering use of such sources is the security of the installation.

Authority was previously granted for you to determine feasibility of misur coverage at this location. Since you have requested authority to use the RFMT technique, it is assumed you do not have access to the target location. Specifically advise whether or not you can effect entry with complete security into 902 South 8th Street, Philadelphia. To enable the Bureau to evaluate the technical aspects of your proposed installation, the following should be forwarded to the Laboratory:

Cable prints reflecting telephone service for the target instrument. These prints should be complete with all multiple appearances clearly shown and, in addition, if possible, obtain block diagram of the target area.

As you know, a RFMT installation requires interruption of the telephone line within 1,000 wire feet of the target instrument.

This necessitates having a plant to monitor the source. You have reported that located within the three-block area of the target are three separate parochial institutions. Furnish complete details regarding the advisability of using these locations as a monitoring point. Include your comments concerning whether Special Agents entering these locations on a regular basis would appear suspicious to the predominantly Italian population who live in this vicinity.

Under certain conditions, RFMT coverage can be relayed from the monitoring point to your central plant. This should be taken into consideration and your comments submitted when the above-requested information is forwarded.
