It is noted the indices of the Seattle Office contain no derogatory information identifiable with STEVENS. During the course of the interview with STEVENS he made several references to the tour which he made of many countries in Africa after leaving Moscow. In connection with this he referred to the way some South African nations are handling their "nigger problem" and said our country should learn a few things from them and get away from the current philosophy in which we are taking many rights away from white people and giving them to the black people who have no basic right to intrude on the private lives of white people. Mr. JONES said he feels very strongly on this matter and it was noted that he appeared to be very loud and outspoken. This is pointed out as of possible interest in the event future consideration should ever be given to using him as a witness. In this connection it is also noted that Washington Field Office letter dated October 10, 1963, said that Mr. McDANIEL described STEVENS as "an honest, loyal American, but one who could be described as an 'Ugly American', in that he did not like Russia, Russians or anything about them and let them know it at every opportunity."
