plans being made in Cuba and elsewhere by communist conspirators to train individuals who will invade many Western Hemisphere countries, including the U. S. Part of the alleged plan involves stopping of gasoline trucks and "taking over the gasoline," and the taking over of all small towns, especially those having many wooden homes. The paper also alleges that 50,000 Soviet marines who are already in Cuba would land at several places in North and South America. The paper was printed over the signature of "Anti Communist Underground General Headquarters: Bahamas." Since Miami has entree to sources who, in all likelihood, can furnish the identity of the group originating the paper, [this is not being referred to the British at this time.] (c)
