**Subject:** handwriting analyses for Foster note . . .

Can someone give me a full written run-down on all handwriting analyses that have been done of documents written by Foster in comparing them to the Foster note. In particular, who did analyses (was there analysis done in 1993, 1994, and 1995??); when; with what documents; were they originals; do we still have the original documents? We need to have this organized before the Senate goes charging down the same path next week.
