

Publication Number: M-1930

Publication Title: Enumeration District Maps for the Fifteenth Census of the United States, 1930

Date Published: 2001

ENUMERATION DISTRICT MAPS FOR THE FIFTEENTH CENSUS OF THE UNITED STATES, 1930

Introduction

On the 36 rolls of this microfilm publication, M1930, are reproduced the Enumeration District Maps for the Fifteenth Census of the United States, 1930. These maps number some 8,345 separate sheets and they are part of the Records of the Bureau of the Census, Record Group 29. They are housed at the National Archives and Records Administration Building in College Park, Maryland.

Background

An enumeration district, as used by the Bureau of the Census, was an area that could be covered by a single enumerator (census taker) in one census period (2-4 weeks for the 1930 Census). Enumeration districts varied in size from several city blocks in densely populated urban areas to an entire county in sparsely populated rural areas. Census jurisdictions, divisions, districts, or subdivisions were used in earlier censuses and the terms "enumeration district" and "enumerator" were first used in the 1880 Census.

Beginning with the 1880 count, the Census Bureau prepared Enumeration District Maps for the individual enumerators as well as an office copy of each map. The office copies of the Enumeration District Maps have been accessioned into the National Archives. This series currently consists of approximately 110,000 printed, photocopied, and manuscript maps of counties, cities, lesser political units, and unincorporated areas, 1880-1980. Only a small number of maps are available for 1880 and 1890, but the number of maps increases with each succeeding census. Beginning with the 1910 Census, these maps were drawn in such a way that the enumeration district boundaries coincided with other legal boundaries. Prior to the 1940 Census, enumeration districts were the smallest entities for which the Census Bureau published statistical data. Enumeration District Maps show the boundaries and the numbers of the census enumeration districts, which were established to help administer and control data collection. Wards, precincts, incorporated areas, urban unincorporated areas, townships, census supervisors' districts, and congressional districts may also appear on some maps. The content of Enumeration District Maps varies greatly between states and over time. The base maps were obtained locally and include postal route maps, General Land Office maps, soil survey maps, and maps produced by city, county, and state government offices as well as commercial printers. Census officials then drew the enumeration district boundaries and numbers on these base maps. The Enumeration District Maps for 1880-1940 are listed in *Cartographic Records of the Bureau of the Census*, Preliminary Inventory 103, compiled by James B. Rhoads and Charlotte M. Ashby (Washington: National Archives and Records Service, 1958). *Descriptions of Census Enumeration Districts, 1900*, National Archives Microfilm Publication T1210, 10 rolls, and *Descriptions of Census Enumeration Districts, 1830-1890 and 1910-1950*, National Archives Microfilm Publication T1224, 146 rolls, provide written descriptions of these census data collection areas based upon selected civil division boundaries, streets, and other features.

Records Description, Arrangement, and Filming Conventions

Two types of Enumeration District Maps were used for the Fifteenth Census: county maps and maps of minor civil divisions, such as cities, towns, villages, precincts, and townships. The basic Enumeration District Map is the county map. As noted above the base maps vary from state to state and even among counties in the same state, so there is little uniformity in map scale, size, or sheet numbers. The unifying feature of this series of maps is the annotations added by the Bureau of the Census. These annotations include the boundaries and numbers of individual enumeration districts, usually added in an orange grease or wax pencil; the range of enumeration district numbers for that county (e.g., 17-1 to 17-24); and a table of enumeration district numbers used for specific institutions, such as hospitals, asylums, jails, schools, sanitariums, and convents; and a listing of any supplementary maps of minor civil divisions in that county.

The base maps used for the minor civil divisions are even more varied than those used for the county maps. Ward maps are common for some large cities, but for smaller urban places there is little uniformity in map scale, size, or sheet numbers. Sketch maps are not uncommon among the minor civil division maps; and minor civil division maps were used when a populated place spread over one or more county lines. Again, the unifying feature of this series is the annotations added by the Bureau of the Census. The annotations on the minor civil division maps are similar to those used on the county maps described above. As with the county maps, any printed numbers on the Enumeration District Maps refer not to the enumeration districts, but to the wards, precincts, districts, or other areas that were the subjects of the base maps. Enumeration district numbers are handwritten in color, and the boundary lines are added in color.

These Enumeration District Maps were filmed in the order in which they are arranged: alphabetically by state, thereunder alphabetically by county, and thereunder alphabetically by minor civil division if such maps were used for that county. Maps of territories follow the maps of states. Because of this file arrangement and the lack of uniformity in this series of maps, a List of Maps was prepared to assist the user. The complete List of Maps is found as an appendix to this pamphlet and at the beginning of Roll 1, and the relevant part of the list was filmed at the beginning of each roll. There are some 8,345 Enumeration District Map sheets associated with the 1930 Census, and all extant maps were filmed for this publication. Some maps in this large body of records were filmed out of order. These exceptions to the hierarchical, alphabetical order are noted in the List of Maps. The maps are listed in the order in which they appear on the film even if it is not strict alphabetical order. Other maps were not filmed until after the initial photography was completed. These maps are listed with an asterisk (*) in the List of Maps and appear at the end of their respective states.

The large-format maps were photographed in multiple images to provide more detail to the user. Large maps were photographed once overall or once centered on the map title area, usually followed by four overlapping shots moving in sequence from the upper left corner (northwest) to the upper right corner (northeast) to the lower left corner (southwest) to the lower right corner (southeast). The largest maps were photographed in six, nine, or more detailed overlapping shots from the upper left corner to the lower right corner. Small-format maps were photographed in a single image. Some maps were photographed twice at different camera settings to maximize legibility. In some cases there are two or more Enumeration District Maps for a jurisdiction, and in these cases all maps were included.

Research Use and Related Records

The Enumeration District Maps photographed in this publication will serve, in part, as an index or guide to the 1930 Census Schedules that will be released April 1, 2002, as National Archives Microfilm Publication T626. These Enumeration District Maps are essential finding aids, as the 1930 census is indexed only for the following states:

Alabama Kentucky (part) South Carolina

Arkansas	Louisiana	Tennessee
Florida	Mississippi	Virginia
Georgia	North Carolina	West Virginia (part)

Consulting the appropriate Enumeration District Maps, researchers could determine the enumeration district numbers of areas in which they believe individuals were resident during the 1930 Census. Having these enumeration district numbers, or even a range of possible numbers, will make the search for individual names on the Census Schedules much more efficient. Secondly, the Enumeration District Maps can illustrate the areas in which listed individuals were resident during the 1930 head count. This geographic site and situation information can be useful in a more complete visualization of the recent past.

As noted above, *Descriptions of Census Enumeration Districts, 1830–1890 and 1910–1950*, National Archives Microfilm Publication T1224, rolls 61 through 90, provide detailed written descriptions of the 120,105 enumeration districts used for the 1930 census.

In addition, *Cross Index to Selected City Streets and Enumeration Districts, 1930 Census*, M1931, provides the enumeration district number by address for the following U.S. cities as well as most populated places in North Carolina:

Akron, OH	Miami, FL
Atlanta, GA	Newark, NJ
Baltimore, MD	Oklahoma City, OK
Berkeley, CA	Omaha, NE
Bronx and Brooklyn, NY	Paterson, NJ
Canton, OH	Peoria, IL
Chicago, IL	Philadelphia, PA
Cincinnati, Cleveland, and Dayton, OH	Phoenix, AZ
Denver, CO	Queens, NY
Detroit, MI	Reading, PA
District of Columbia	Richmond, NY
Elizabeth, NJ	Richmond, VA
Erie, PA	San Antonio, TX
Fort Wayne and Gary, IN	San Diego and San Francisco, CA
Grand Rapids, MI	South Bend, IN
Indianapolis, IN	Tampa, FL
Kansas City, MO	Tulsa, OK
Long Beach and Los Angeles, CA	Wichita, KS
Manhattan, NY	Youngstown, OH
Memphis, TN	

The 1930 Federal Population Census: Catalog of National Archives Microfilm, available in fall 2001, will list the cities, townships, and wards in each enumeration district. We hope that the written descriptions and the maps filmed in this publication make the 1930 Census Schedules more accessible to you.

LIST OF MAPS
