lost laundry articles. He advised that there are 10 plain colors utilized in Thermo Seal machines plus three striped colors and that under the present system it would be possible to re-use the same number after a 72-week cycle. He stated that it is probable that in laundries throughout the United States there could be several instances of this exact code number coming up on red Thermo Seal tape. He further advised that there were no restrictions on utilization of any specific code on this machine.

SUBJECT: MURKIN

On 4/10/68, Mr. ARIS HARRIS, Manager, American Dry Cleaners, 1702 Allen Street, Allentown, Pa., advised that the Thermo Seal Marking Machine is ordinarily used by large commercial laundries to mark the garments of regular customers. Mr. HARRIS advised that the Thermo Seal cloth tag is permanently affixed to the garment and may be used for the life of the garment. He stated that the Thermo Seal tag is used most prevalently by industrial plants, clothing rental companies, and institutions such as nursing homes.

On 4/10/68, Mr. GORDON CHAMBERLAIN, Operations Department, Allen Laundry, Inc., 12th and Allen Streets, Allentown, Pa., advised that he is familiar with the Thermo Seal Laundry Tag but is unaware of its use in the Allentown, Bethlehem, and Easton, Pa., area. Mr. CHAMBERLAIN advised that his company had recently purchased a smaller laundry that used the Thermo Seal tag and made available an example of the tag for inspection. Mr. CHAMBERLAIN advised that the tag is no longer in use by his company, and the tag that was used is dissimilar to the tag in question.

Mr. CHAMBERLAIN advised that the Thermo Seal tag is ordinarily used by large institutions, such as mental hospitals or nursing homes, to identify an individual patient's garments. He advised that the ordinary neighborhood laundry would probably not use the Thermo Seal tag due to the expense involved. He stated that even large laundries would confine the use of the Thermo Seal tag to garments such as shirts, as it would be economically unfeasible to mark undergarments with the Thermo Seal tag due to the large amount of time involved in marking the garment.

Mr. CHAMBERLAIN advised that the primary advantage of the Thermo Seal tag is that it can withstand numerous launderings of the garment. It is applied by heat and can only be removed

by the application of heat of equal temperature. He stated that it would probably be used by an institution where people are kept for a longer period of time than six (6) months, as it would be unfeasible to mark the garment for a shorter period of time. He stated such institutions would probably be nursing homes, mental hospitals, or prisons. He further advised that some institutions probably have their own Thermo Seal Machines. Tags from these machines would be coded to a particular customer, patient, or inmate.

It is suggested that appropriate leads be set out by the Bureau or office of origin in this matter in that the rifle manufacturer and the scope manufacturer be contacted in this matter to determine if guarantee cards have been previously sent in on like rifle or like scope, as suspect scope and rifle, by ERIC STARVO GALT, HARVEY LOWMEYER or JOHN WILLARD.

It might be considered desirable to check all recent like scope purchasers with the last name of GALT and LOWMEYER particularly.

If scope was of Browning manufacture, their records would not go back too far as they are fairly new in that field and do not manufacture their own.

Memorandum

TO : SAC (44-1368)

FROM : SA MAX D. BROWN

SUBJECT: MURKIN

DATE: 4/10/68

It is suggested that appropriate leads be set out by the Bureau or office of origin in this matter in that the rifle manufacturer and the scope manufacturer be contacted in this matter to determine if guarantee cards have been previously sent in on like rifle or like scope, as suspect scope and rifle, by ERIC STARVO GALT, HARVEY LOWMEYER or JOHN WILLARD.

It might be considered desirable to check all recent like scope purchasers with the last name of GALT and LOWMEYER particularly.

If scope was of Browning manufacture, their records would not go back too far as they are fairly new in that field and do not manufacture their own.
