	<p><b>Background:</b> The disposition for SSIC 9085, paragraphs 1b(6), 1e(8), and 4 and SSIC 13000, paragraph 6 deal with engineering drawings contained in an electronic system used by COMNAVSEASYS COM and COMNAVAIRSYSCOM and are currently not scheduled. COMNAVAIRSYSCOM serves as the executive agent for this system, currently known as the Joint Engineering Data Management Information and Control System (JEDMICS). The input records currently consist of approximately 45 million aperture cards located in North Island and other sites. Many of these cards will not be converted to electronic or optical images. Dispositions are currently cited in SECNAV M-5210.1 of November 2007 as "DO NOT DESTROY. Disposition not authorized." This schedule requests approval for dispositions for these records.</p> <p style="text-align: center;"><b><u>SSIC 9085</u></b> <b><u>ENGINEERING DRAWINGS</u></b></p> <p>SSIC 9085 to 9085.1b(5). SSIC 9085.2 to 9085.3d. No change.

4. Master DoD Engineering Drawings Database Files. Database is an electronic/optical imaging system that provides electronic/optical image storage of all COMNAVSEASYS COM and COMNAVAIRSYS COM engineering drawings for all levels of the Naval establishment as well as for other DoD entities. This database is a major part of the DoD Computer-Aided Acquisition and Logistic Support Program (CALS). CALS automates the creation, handling, and storage of all technical documentation. Note: Since 1999 the engineering drawing database has been known under several names such as: Engineering Drawing Management Information and Control System (EDMICS) and Joint Engineering Data Management Information and Control System (JEDMICS). Technical manuals necessary to locate specific drawings contained in the master file database are contained in a separate electronic system known as the Technical Data Management Information System (TDMIS).

a. Master file and Historical Data Images Database Records. Database contains standard engineering data such as drawings and technical documents of ship, aircraft and weapons received from COMNAVSEASYS COM and COMNAVAIRSYS COM.

7. PERMANENT: Transfer annually to NARA as specified in 36 CFR 1235.40 or standards applicable at the time of transfer. Format and method of transfer to be determined by NARA and CNO (DNS-5) at the time of transfer. Delete data that has already been transferred to NARA from Master file database when 55 years old or when equipment is obsolete, whichever is earlier.

~~b. Input data:~~

8. Delete when data has been entered into the master file and verified, or when no longer required to support reconstruction of, or serve as backup to, the master file, and when no longer needed to support reconstruction or for legal or audit purposes or to support the reconstruction of, or serve as a backup to, the electronic records, whichever is later. Note: Offer to Naval Heritage and History Command (NHHC), or Historic Naval Ships Association (HNSA) if drawing configuration is included onboard ships maintained as museums. Note: Once converted see SSIC 9085.4(a) above for disposition.
