	Infant Screening Quality Assurance Program (ISQAP)		
	The Infant Screening Quality Assurance Program is responsible for maintaining an international quality assurance program for laboratories involved in newborn screening for preventable diseases, conducting targeted disease/exposure prevalence surveys/programs, and developing new technology.		
	1. <u>ISQAP Database</u>		
	Contains data from domestic and international participants for the 2 parts of the program: quality control (QC) and performance evaluation (PE).		
	 a. <u>Input</u>: Data is collected on 2 forms. The one for QC results is entitled the Analytical Results Reporting Form, Infant Screening Quality Assurance Program; and the one for PE results is entitled Infant Screening Performance Evaluation Program, Laboratory Results Reporting Form. The forms contain data from laboratory analyses by program participants. This data is converted to electronic media via Mainframe SAS. (In the future, the program will expand but will always utilize a QC reporting form and a PE reporting form). <u>Disposition</u>: Destroy ISQAP reporting forms when 3 years old or when no longer needed for administrative purposes, whichever is sooner. 	ł
