RECORDS DISPOSITION SCHEDULE 25

OFFICE OF CHIEF INFORMATION OFFICER (OCIO)

ENTERPRISE ARCHITECTURE MANAGEMENT SYSTEM (EAMS)

System Name: Enterprise Architecture Management System (EAMS)

System Code: P156

System Description: EAMS is a web-based tool used to track and analyze the layers (Stakeholder, Business, Data, Applications, and Technology) of the HUD Enterprise Architecture (EA) and the relationships between these layers. It serves as a repository for the information necessary to define the Department's baseline architecture and helps enable the definition and design of target architectures.

The HUD EA is a strategic information asset base defining the Department's business, the information necessary to deliver programs and operate the Department, technologies necessary to support these activities, and transitional processes for implementing new technologies in response to changing mission or objectives.

To facilitate the development of a target architecture, HUD EAMS accommodates data for multiple planning periods (i.e., baseline, transition phase(s), and target), and includes an administrative tool to create new planning periods. Planning periods can also be locked to ensure that architectures are built off of the same established baseline.

HUD EAMS allows users to create, edit, and delete architectural entities (e.g., business function, application, data class, etc.) from a centrally maintained database using a web interface. Users can also create, edit, and delete relationships between various entities in the database. The HUD EAMS user interface displays both the details and interrelationships of these entities and provides a means to navigate throughout the architecture.

HUD EAMS produces system generated analysis reports and a dynamically generated diagramming feature to aid in the analysis of EA information.

RECORDS DISPOSITION SCHEDULE 25

OFFICE OF CHIEF INFORMATION OFFICER (OCIO)

**ENTERPRISE ARCHITECTURE MANAGEMENT SYSTEM
(EAMS)**

ITEM NO. DESCRIPTION OF RECORDS DISPOSITION

~~1 **SOURCE DATA.** EAMS
source data are collected
manually and imported into
EAMS through the use of Excel
spreadsheets and/or user input
from the data entry screen. **TEMPORARY.** Destroy previous
planning periods, but keep the most
recent planning period data, and
target planning periods or individual
line of business areas.~~

*GRS 20
#2*

2 **MASTER DATA FILES**

EAMS Database. Data includes
FEA Reference Models,
Government-wide elements,
HUD elements, Stakeholders
Layer, Strategy Layer,
Performance Layer, Business
Layer, Data Layer, Applications
Layer, Service Components
Layer, Technology Components
Layer, and Security
Components Layer.

TEMPORARY. Cut off annually.
Delete or overwrite when superseded,
obsolete, or no longer needed for
administrative, legal, or fiscal
reference.

OUTPUTS .

~~3 (a) The system generates
approximately 20 canned
reports. These reports are static
and reside in the system. **TEMPORARY.** Destroy reports
pertaining to previous planning
periods, but keep the most recent
planning period data, and target
planning periods or individual line of
business areas.~~
