C. SIGNATURE OF AGENCY REPRESENTATIVE

Dorothy Christopher

D. TITLE

Records Manager

7. ITEM NO.

8. DESCRIPTION OF ITEM  
(With Inclusive Dates or Retention Periods)

9. GRS OR SUPERSEDED JOB CITATION

10. ACTION TAKEN (NARS USE ONLY)

The Minerals Management Service disposition schedule was approved by the NARA on October 20, 1986 (Job No. NC-1-57-84-7). While the basic mission of the organization has remained the same, close to 100 series of the schedule have needed revision for reasons ranging from regulatory requirements affecting release of certain geological and geophysical information and data, to broader or more specific records description needs, to accommodation of electronic media.

Attachment 1 reflects a description of the organizational functions.

Attachment 2 are the pages of the schedule affected by the changes; items changed are denoted by opening and closing arrows. (Runover pages are provided where added.)

Copy sent to Agency  
NOE, NNA, NMN, NM, NM-W 11/30/88

The Minerals Management Service (MMS) is headquartered in the Washington, D.C. metropolitan area with operational centers and support offices located throughout the United States.

Royalty Management is responsible for the collection of all royalty payments, rentals, bonus payments, fines, penalties and assessments, and other revenues due to the Federal Government and Indian lessors as monies or royalties-in-kind from the extraction of mineral resources from Federal and Indian lands onshore, and from the leasing and extraction of mineral resources on the Outer Continental Shelf (OCS).

Offshore Minerals Management is responsible for resource evaluation and classification, environmental review, leasing activities (including public liaison and planning functions), lease management, and inspection and enforcement programs for OCS lands.

Administrative functions include human resource management and training, safety and health program management, procurement and property management, personnel and physical security, information resources management, and financial and administrative management, including management analysis, records and paperwork, office services, and space.

Programmatic functions include assuring that the MMS's management resources are utilized effectively, planning for and utilizing budgetary resources in support of varied operating and support programs; delineating general, strategic and long-range goals and objectives; developing and evaluating policy initiatives; determining the effectiveness of management and internal controls in meeting program goals and objectives; and adjudicating appeals arising from the decisions of operating officials.

2.

Other series components appear duplicative, especially given the fact that the proposed authorized disposition calls for items to be transferred to a FRC at the end of each training class. If several training courses are repeated during a given year, the disposition authority, as currently written, almost ensures that incoming accessions to a FRC will mainly be composed of repetitive material.

6. Item 7 - Series description needs embellishment. How is this series distinct from Item 9? Both items have the same disposition instructions, can they be combined?

Please call Joseph Suster of my staff at FTS 353-0162 if you have any comments or questions concerning this memorandum.
