

ACTIVE ITEMS. There are no active items on this schedule. This schedule cannot be used to disposition records.

INACTIVE ITEMS. These items may no longer be used to disposition records. They are superseded or obsolete. References to more recent schedules are provided below as a courtesy. Some items may be annotated on the schedule.

NA ITEMS. These items have no applicable status (active or inactive). These items cannot be used for disposition.

For example, not applicable items were filing instructions, describe non-records, pointed to another disposition authority, listed as "reserved", were lined off and not approved at the time of scheduling or had an instruction of "disposition not approved".

(P) Permanent - item with permanent disposition

(T) Temporary - item with temporary disposition

Background:

The Project Tracking System (PTS) is a web-based system replacing multiple spreadsheets that supports IRS/MITS Information Technology budget allocation and execution. PTS captures projected spending and creates Spending Plan Items (SPIs) that provide information related to proposed and actual IT spending. Once the SPIs are reviewed and approved, information from PTS is uploaded into the Integrated Financial System (IFS) to create the financial plan used during the Budget Execution process. During the Budget Execution process, PTS is used to control and monitor changes to the financial plan. PTS also supports the Quarterly Spend Plan Review (QSPR) process, producing reports used for the executive level review of actual versus planned spending. PTS allows management to annually forecast projected budgets over a 5 year period.

Project Tracking System (PTS) Description:

System used to gather, track and manage projected IRS/MITS budget information for use during the financial plan development and budget execution processes.

Inputs:

Most of budget and related information is input into PTS by budget analysts in MITS. Some data is received from the Web Request Tracking System (WebRTS) and the Web Integrated Procurement System (WebIPS) via file transfers.

Disposition: TEMPORARY. Delete/Destroy when no longer needed by end user.

System Data:

Budget Data includes spending plans (SPI) that have narrative, appropriations, Cost Center data, Functional Area data, committed/obligated funds, cost elements, and internal orders.

Disposition: TEMPORARY. Cut off at the end of the FY, delete/destroy 3 years after cutoff.

Outputs:

Budget data is transferred to the Integrated Financial System (IFS). PTS also produces reports used for executive level review of actual versus planned spending.
