OFFICE OF COMMUNICATIONS AND CONSUMER INFORMATION

The mission of NHTSA's Office of Communications and Consumer Information is to represent the Agency to the news media, consumer groups, industry, and the general public, and to provide reliable, timely, and accurate traffic safety information. NHTSA acts to reduce deaths, injuries, and economic losses resulting from motor vehicle crashes by setting and enforcing safety performance standards for motor vehicles and motor vehicle equipment, and through grants to state and local governments to enable them to conduct effective local highway safety programs. The agency is also responsible for investigating safety defects in motor vehicles; setting and enforcing fuel economy standards; assisting states and local communities in reducing the threat of drunk drivers; promoting the use of safety belts, child safety seats, and air bags; establishing and enforcing vehicle anti-theft regulations; and providing consumer information on motor vehicle safety topics. NHTSA also conducts research on driver behavior and traffic safety, to develop the most efficient and effective means of bringing about safety improvements.

The Office of Communications and Consumer Information:

- implements a comprehensive media relations program
- develops comprehensive communication strategy for Agency priority programs
- designs, develops, and distributes highway safety, motor vehicle, and consumer information materials
- promotes highway safety messages
- coordinates market research for the development of traffic safety materials
- coordinates the development, design, and editing of all Agency traffic safety publications
- manages and disseminates all Agency publications
- provides in-house design services for print, electronic, and website products
- coordinates exhibits
- maintains an electronic library of photographs, logos, and other graphics for use by the media, public, and traffic safety partners.

With the Agency's reorganization in 2002, the scope of the Office's mission and activities expanded greatly as it was transformed from a small public relations office into a full-service communications and publications unit. The consumer outreach and information units that were distributed throughout many NHTSA offices were unified under the current Office of Communications and Consumer Information, while responsibility for Agency publications was transferred from the Administrator's office. The Office now serves as the primary source of information on traffic safety for the media and for consumers, and disseminates the Agency's message to the public.

The Office is comprised of three sections:

- Office of Media Relations
- Office of Communication Services
- Office of Consumer Information.

Unless otherwise noted, this schedule is media-neutral.
