	<p>including seasonal crops, chemical products (tannins, essential oils, and medicinals); to gather data during the operation of an experimental forest nursery and testing grounds at Norris, Tennessee, for the development and application of new or improved techniques; and to explore and test techniques of harvesting, transporting, processing, and use of biomass materials as a supplemental or alternative energy source. Included in these records are correspondence, reports, studies, saw-mill and woodworking surveys, fence post data summaries, checklists for determining commercial trees, and Tennessee Valley-wide Forest Inventory and Volume Compilations.</p> <p>2. <u>A cooperative program with State, Federal and local agencies, landowners, timber operators, forest products trade associations and citizen groups</u> for watershed protection and forest development in tributary watersheds, forestry problem areas, and throughout the Tennessee Valley. This program was designed to secure and expedite economical forestry methods in woodland development and utilization, timber production, forest fire control and erosion control through reforestation. Labor for this program was provided by the Civilian Conservation Corp under the direction of the Tennessee Valley. TVA nurseries at Clinton, Tennessee, and Muscle Shoals, Alabama, produced and distributed forest planting stock in cooperation with Tennessee Valley State foresters. Also provided was technical advice in forest nursery planning and operation.</p> <p>3. <u>The fish and wildlife development program</u> included limnological studies of reservoirs and tributary streams; surveys and technical studies of resources and their environment that were affected by TVA reservoir development; analyses of problems and opportunities for development and utilization of fishery and wildlife resources; cooperation with U. S. Fish and Wildlife and Atomic Energy Commission (presently the Department of Energy) about the effect of reservoir operation, stream sanitation and disposition of radioactive wastes on fish life.</p> <p>These records are arranged under the TVA Divisional Filing System. Total accumulation is 123 cubic feet.</p>
