EXPLANATORY NOTES

FUNCTIONAL STATEMENT

The Bureau of Taxation (TAX) controls the activities associated with the taxation of annuities under the Railroad Retirement Act. The bureau makes the timely and accurate reports required by the Internal Revenue Service (IRS) Code. The bureau ensures that amounts are withheld properly from annuity payments.

ITEM 21-6

Tax Daily Update Listings

Series consists of computer generated listings, generated daily, that are maintained by the bureau to serve as a master record documenting all additions, deletions and adjustments to the Taxation Accounting System database. Document provides an audit trail of electronic activity to bureau managers.

It has been the experience of bureau personnel that the series has limited, if any, reference activity after the first 18 months. Proposed transfer to Federal Records Center after 18 months, therefore, is consistent with bureau reference activity. The proposed retention adequately satisfies bureau audit trail requirements and is consistent with agency policy and General Accounting Office guidelines for like records of this type.
