	Enhanced List Maintenance Operation (ELMO) - List Frame (Cont'd) The Generalized Enhanced Sampling and Information System (GENESIS) became operational in 2005. GENESIS is used to support the Agency sampling needs by interacting with ELMO through modules so users can create groups of records or populations and samples based on sets of user-defined criteria. The modules included are		
	Profiler module Used to determine the best value for control data that is stored in the ELMO database		
	 Population module Used to define or classify the population and characteristics of the population based on control data stored in the ELMO database. 	3	
	 Sample module Used to select and mark samples in the ELMO database for inclusion in specific surveys. 		
	 Analysis module Used interactively to evaluate list quality, population characteristics, sampling methods, sample designs and sample performance 		
	ELMO Database.		
	a Input Documents, forms, and electronic records used to create, update, or modify records on the master list in the ELMO database	GRS 20 Item 2b	
	Disposition Temporary. Destroy when data entered into the database are verified or when no longer needed to support backing up the database, whichever is later.	-	
	b Master File Master list records for each State Field Office consisting of individuals (farmers and ranchers), businesses (Ag Businesses), or other entities (Ag related) that provide NASS with its survey sampling frames, release list frames, and census mail list frames		
	Disposition Temporary Destroy/delete when superseded or obsolete.		
	c Output Includes various reports, listings, and counts for reviewing the quality of records in the database, extracted records used as input/source records in the Generalized Enhanced Sampling and Information System (GENESIS), and survey and census mail list records used as input to the Survey Management System (SMS)		
	Disposition Temporary Delete/destroy when review is completed and the data are validated. Delete/destroy extracted records after data are processed in GENESIS and /or SMS and verified, or when no longer needed for administrative or other operational purposes, whichever is later.		
	d System documentation: Operation and maintenance manuals. Disposition. Temporary. Destroy/delete when superseded or obsolete	GRS 20 Item 11a

31	Survey Processing System (SPS) Edit		
	SPS edit is the edit system in the suite of Market Sensitive Surveys (MSS) Systems. This system is used to edit and validate survey responses before they are passed on to the summary system. The SPS edit system has evolved from its original beginnings in the late 1980s Most NASS surveys are edited on this system, exceptions are censuses and the large economic surveys. A copy of the edited survey input/source records file (Item 27) becomes the input file for the Survey Processing System (SPS) summary (Item 32). The final edited output files are posted to the data warehouse (Item 38).		
	a Input (See Item 26).		
	Disposition. (See Item 26)		
	b Master file: Contains edited input file data variables after editing process completed		
	Disposition Temporary. Destroy/delete when superseded or obsolete

	d System documentation. Operation and maintenance manuals	GRS 20	
	Disposition Temporary Destroy/delete when superseded or obsolete	Item 11a	
32	Survey Processing System (SPS) Summary		
	SPS summary is the summary system in the suite of Market Sensitive Surveys (MSS) Systems. This system summarizes survey responses after they have been edited and validated. The SPS summary system became operational in 1992 Most NASS surveys are summarized on this system; exceptions are censuses and the large economic surveys which are not market sensitive surveys. A copy of the output edited file (Item 31c) becomes the input file for the SPS summary.		
	a Input (See Item 27)		
	Disposition (See Item 27).		
	b Master file. Contains summarized input file data variables after summary process completed		
	Disposition: Temporary Destroy/delete when superseded or obsolete

33	NASS Estimates Database System (NEDS) also known as Estimates (EST) Processing System	N1-355-86-1 Item 37 Item 61a,	
	NEDS is also known as the Estimates (EST) processing system. NEDS is an internal working database system used by the Agricultural Statistics Board (ASB) in establishing commodity estimates and composing publications. The NEDS database contains State Field Office survey recommendations and comments, ASB estimates and comments, and the survey indications. The Analysis, Comments, Estimates and Review (ACER) tool component of NEDS is used to transfer recommendation and comments from State Field Offices to HQS and the ASB estimates and comments to State Field Offices. Indications are loaded directly from the survey summaries. Recommendations, comments, and estimates are posted manually and electronically. The Pub Tools component is used by the ASB to compose survey publications for print distribution and the Dissemination Tool is used to prepare electronic survey publication records.	item 62,	
	a. Input. Copies of recommendations, indications, and comments from Field Offices and copies of estimates and comments by ASB Disposition: Temporary Destroy when data are posted satisfactorily to database.	GRS 20 Item 2b	
	b Master file. Database records include: Field Office indications, recommendations, and comments as well as ASB estimates and comments.		
	Disposition Temporary Delete when no longer needed for reference.		
	c Output: Data file containing records for generating ASB publications		
	Disposition: Temporary Destroy/delete when superseded or obsolete.		
	d System documentation. Operation and maintenance manuals	GRS 20 Item 11a

34	Publication (PUB) System		
	The Publication (PUB) system is used to prepare and present ASB reports to the public in either report form or in a web based public use database. NASS releases about 400 reports a year. The reports cover a wide range of agricultural commodities and time periods that differ by reports. The PUB system uses data stored in NEDS, also known as the Estimates (EST) processing system, as input for creating reports to release to the public.		
	a Input (See Item 33c)		
	Disposition (See Item 33c)		
	b Master file Contains values extracted from NEDS to use for preparing ASB reports for the public		
	Disposition. Temporary. Delete after publication is released, or when no longer needed for reference, whichever is later		
	c Output		
	The PUB system outputs the following files a file to print (ASB) short run publications by the ASB print shop during lockup, a file to send to the Government Printing Office (GPO) for printing the long run of ASB publications, a file for Cornell University to post ASB publications to that library website, a file for NASS to post ASB publications to the Today's Report webpage (active for 24 hours only) on the NASS website, and a file for NASS to post data contents of ASB publications to Quick Stats. (See Item 39a for survey publications).		
	Disposition Temporary. Destroy/Delete after publication is released, validated as complete and satisfactory, or when no longer needed for reference, whichever is later.		
	d System documentation. Operation and maintenance manuals	GRS 20
