I. RECORDS RETENTION SCHEDULE CUTOFF CATEGORY DESCRIPTION

The following provides an explanation of the cutoff categories referred to in this document

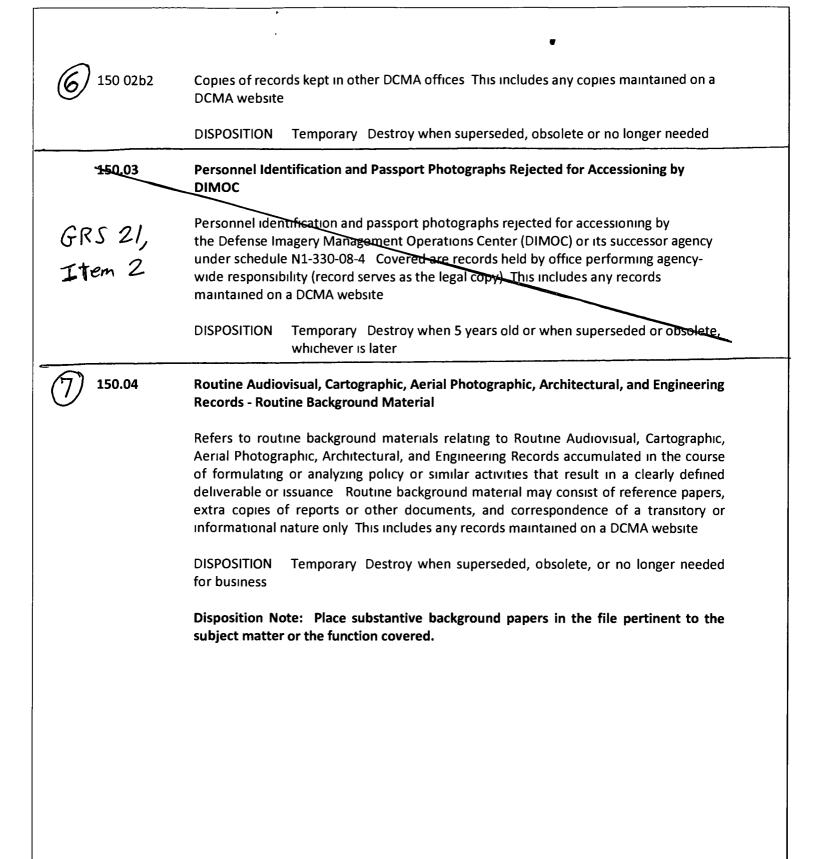

The amount of time a record is kept is called its retention period. A disposition rule is the definition of when a file begins its retention period, what that retention period is based on and the final disposition action for a record once its retention period is over. Disposition rules are made up of **cutoff** and disposition phases. **Cutoff (an event or date trigger) determines when a record enters its retention period.** Final disposition is what is done with the records once its retention period is over such as destruction by shredding, digitizing or transferring to another location.

When converting from a traditional retention schedule to a "Big Bucket" retention schedule the cutoff of a specific series of records do not always apply to all the records series types within the "Big Bucket" schedule In response, the following cutoff categories were fashioned Within the body of DCMA's records retention schedule several cutoff categories may be listed under a given record type, the records owner (or those with records management responsibilities) should determine which cutoff is appropriate based on their understanding of how information is organized within the project, activity or mission

- Category A) Cut off is when record is superseded or obsolete, applies to publications, issuances or like documents
- Category B) Cut off is when project or event is ended, or after final payment or final action, or after settlement of disputes/incidents, court order lifted or litigation concluded, whichever is applicable Applies to activities whose records are organized or grouped and maintained by a given task, job, assignment, agreement or situation and has clearly defined start and end dates
- Category C) Cut off is when employee transfers, separates or retires from federal service or where applicable, an employee or dependent spouse's eligibility is terminated or denied Applies to certain Human Resource records
- Category D) Cut off is after period covered by account, certificate of settlement is received, or when period for claims for which DCMA has right to collect is ended, or when DCMA determines collection is no longer required or terminated , whichever is later Applies to certain Accounting records in GRS 3, 6, 7and 8
- Category E) Cut off is annually Applies to records whose retention trigger is not based on a significant event such as the release of a new issuance, completed task, separation of personnel or settlement of dispute
