7. ITEM NO.	8. DESCRIPTION OF ITEM (With Inclusive Dates or Retention Periods)	9. SAMPLE OR JOB NO.	10. ACTION TAKEN
1	AEROSPACE SYSTEMS SECURITY RECORDS (207-1) (Applicable Air Force-Wide) See attached table 207-1, rules 2 and 3 which provide disposition for subject documentation. The permanent retention of these reports is necessary due to the possibility of the historical information they contain. This information may be needed to determine trends developing over the years in the effectiveness and efficiency of the electronic systems utilized in missile security. These reports would be the only record of past history from which the needed information could be gathered. The Air Force is currently investigating the performance data which could not be accomplished without the above documentation,	DLT 207-1 Rules 2 & 3	

207. **Aerospace Systems Security.** This table covers documentation relating to general policies and procedures governing philosophy, principles, and policy for protection of AF weapon systems, designated support systems, warning, and command / control systems against enemy clandestine operations, attack by hostile groups, and other ground threats. Also includes aerospace security system planning, emergency security procedures, internal control procedures, restricted areas, facilities and equipment, nuclear weapon security, and security standards for individual weapon systems.
