NOTICE - SOME ITEMS SUPERSEDED OR OBSOLETE

Schedule Number: NC1-AFU-76-36

Some items in this schedule are either obsolete or have been superseded by new NARA approved records schedules. This information is accurate as of: 12/1/2024

ACTIVE ITEMS

These items, unless subsequently superseded, may be used by the agency to disposition records. It is the responsibility of the user to verify the items are still active.

Item 93/2/1

SUPERSEDED AND OBSOLETE ITEMS

The remaining items on this schedule may no longer be used to disposition records. They are superseded, obsolete, filing instructions, non-records, or were lined off and not approved at the time of scheduling. References to more recent schedules are provided below as a courtesy. Some items listed here may have been previously annotated on the schedule itself.

In 1989, Air Force submitted N1-AFU-90-003 to cover all of their temporary items in AFR 12-50, Volume II, Disposition of Air Force Records under a single job number. It is therefore assumed that all of the temporary items on this schedule were superseded by N1-AFU-90-003.

| | The purpose of this submission is to establish | | | |

disposition criteria for documents created under the Rapid Engineering Deployable Heavy Operations Repair Squadrons, Engineering (RED HORSE) program. RED HORSE units provide highly mobile, self-sufficient, and rapidly deployable civil engineering capability. Their functions include heavy damage repair for restoration of Air Forcecontrolled facilities, heavy maintenance of air bases and remote sites, and engineering support for aircraft operations, particularly in bare base environments, during initial and sustained phases of contingency operations.

The RED HORSE program is an innovative Air Force approach for the provision of civil engineering support and operates as an independent function. The effectiveness of their operations during the Vietnam war and other crises support in the post-war era has generated keen interest in the program. HQ USAF has primary responsibility for policy formulation while the Air Force Civil Engineering Center (AFCEC) exercises managerial control. We feel that the documents described in Rule 1 of our proposed table document a major function of the Air Force and have sufficient value for historical and research purposes to warrant permanent retention.

|----------------|---|----------------------------|---------------------|
| | The deployment and project files are essentially duplicative of documents scheduled under AFM 12-50, Table 89-1. However, Table 89-1 does not provide adequate disposition authority for the records maintained by RED HORSE squadrons and other planning, management, and reportorial documents created under the program. | | |
