

INACTIVE - ALL ITEMS SUPERSEDED OR OBSOLETE

Schedule Number: NC1-AFU-84-006

All items in this schedule are inactive. Items are either obsolete or have been superseded by newer NARA approved records schedules.

Description:

Item 55/5/12 was superseded by N1-AFU-88-041 / 55/5/12.

In 1989, Air Force submitted N1-AFU-90-003 to cover all of their temporary items in AFR 12-50, Volume II, Disposition of Air Force Records under a single job number. All other temporary items on this schedule were superseded by N1-AFU-90-003.

**SEMIAUTOMATIC GROUND ENVIRONMENT (SAGE)/BACKUP INTERCEPT
CONTROL (BUIC) SYSTEM RECORDS (Table 55-5)
(Applicable Air Force-wide)**

Air Force is adding four rules and a note to Table 55-5 to cover disposition of SAGE/BUIC Technical Memoranda (Manuals). These manuals and their supporting documents describe how the SAGE and BUIC air defense systems are designed and operated. They include system specifications, logic and methods of operations. Also included are documents describing system data and data characteristics.

Rule 12. Recommend these record sets of SAGE/BUIC manuals for permanent retention because of their historical and future value. Historically, they describe the first semiautomated computerized air defense network for the United States and Canada. The ANFS-Q7 (SAGE) computers used in the system were developed at MIT and utilized the latest (1950 vintage) in computer technology and design. For the future, the latest air defense system was designed using SAGE and BUIC operational principles. While the equipment is archaic, the underlying principles for conducting air defense operations will be valid for many years to come. Though the manuals are identified as HQ ADC manuals, they are

	<p>actually developed by each SAGE and BUIC programming facility to suit their own needs, and they also maintain the record sets. The manuals are arranged numerically; consist of 3.5 cubic feet with none at federal records centers; and annual accumulation is .3 cubic foot. Sample Technical Manual and regulation extracts are attached; the regulation explaining how SAGE and BUIC programming facilities work. When documents are offered to the National Archives, no access is allowed for these documents that remain classified.</p> <p>2 Rule 13. These are copy versions of Rule 12 documents, but since they are located at other commands, it is not necessary to keep them when they are rescinded, superseded or no longer needed.</p> <p>3 Rule 14. These manuals and documents are valuable for describing data elements and the context for their use. As this system data is forever changing and being replaced, five years disposition at SAGE and BUIC programming facilities is sufficient.</p> <p>4 Rule 15. These are same documents as those of Rule 14, but since they are located at other commands, it is not necessary to keep them when they are rescinded, superseded or no longer needed.</p> <p>5 Note. Note states when record sets of technical manuals will be offered to the National Archives.</p>		<p><i>Deletion concurred in by R.P. DWYER, HQ USAF RECORDS OFFICER, 11-09-83.</i></p> <p><i>RC/NARE-NC</i></p>
